Improving Educational Outcomes Jobeybab Higher Education Series:

Improving Quality in American Higher Education Richard Arum, Josipa Roksa, Amanda Cook, 2016-05-02 An ambitious comprehensive reimagining of 21st century higher education *Improving Quality in American Higher Education* outlines the fundamental concepts and competencies society demands from today's college graduates and provides a vision of the future for students, faculty, and administrators. Based on a national multidisciplinary effort to define and measure learning outcomes, the Measuring College Learning project, this book identifies essential concepts and competencies for six disciplines. These essential concepts and competencies represent efforts towards articulating a consensus among faculty in biology, business, communication, economics, history, and sociology disciplines that account for nearly 40 percent of undergraduate majors in the United States. Contributions from thought leaders in higher education, including Ira Katznelson, George Kuh, and Carol Geary Schneider, offer expert perspectives and persuasive arguments for the need for greater clarity, intentionality, and quality in U.S. higher education. College faculty are our best resource for improving the quality of undergraduate education. This book offers a path forward based on faculty perspectives nationwide. Clarify program structure and aims. Articulate high quality learning goals. Rigorously measure student progress. Prioritize higher order competencies and disciplinarily grounded conceptual understandings. A culmination of over two years of efforts by faculty and association leaders from six disciplines, this book distills the national conversation into a delineated set of fundamental ideas and practices and advocates for the development and use of rigorous assessment tools that are valued by faculty, students, and society. *Improving Quality in American Higher Education* brings faculty voices to the fore of the conversation and offers an insightful look at the state of higher education and a realistic strategy for better serving our students. *Improving Higher Education* Ronald Barnett, 1992

Using Evidence of Student Learning to Improve Higher Education George D. Kuh, Stanley O. Ikenberry, Natasha A. Jankowski, Timothy Reese Cain, Peter T. Ewell, Pat Hutchings, Jillian Kinzie, 2015-01-20 American higher education needs a major reframing of student learning outcomes assessment. Dynamic changes are underway in American higher education. New providers, emerging technologies, cost concerns, student debt, and nagging doubts about quality all call out the need for institutions to show evidence of student learning. From scholars at the National Institute for Learning Outcomes Assessment (NILOA), *Using Evidence of Student Learning to Improve Higher Education* presents a reframed conception and approach to student learning outcomes assessment. The authors explain why it is counterproductive to view collecting and using evidence of student accomplishment as primarily a compliance activity. Today's circumstances demand a fresh and more strategic approach to the processes by which evidence about student learning is obtained and used to inform efforts to improve teaching, learning, and decision making. Whether you're in the classroom, an administrative office, or on an assessment committee, data about what students know and are able to do are critical for guiding changes that are needed in institutional policies and practices to improve student learning and success. Use this book

to Understand how and why student learning outcomes assessment can enhance student accomplishment and increase institutional effectiveness Shift the view of assessment from being externally driven to internally motivated Learn how assessment results can help inform decision making Use assessment data to manage change and improve student success Gauging student learning is necessary if institutions are to prepare students to meet the 21st century needs of employers and live an economically independent civically responsible life For assessment professionals and educational leaders Using Evidence of Student Learning to Improve Higher Education offers both a compelling rationale and practical advice for making student learning outcomes assessment more effective and efficient *Pursuing Quality, Access, and Affordability* Stephen C. Ehrmann, 2023-07-03 Whether they recognize it or not virtually all colleges and universities face three Grand Challenges Improve the learning outcomes of a higher education A large majority of college graduates are weak in capabilities that faculty and employers both see as crucial Extend more equitable access to degrees Too often students from underserved groups and poor households either don't enter college or else drop out without a degree The latter group may be worse off economically than if they'd never attempted college Make academic programs more affordable in money and time for students and other important stakeholder groups Many potential students believe they lack the money or time needed for academic success Many faculty believe they don't have time to make their courses and degree programs more effective Many institutions believe they can't afford to improve outcomes These challenges are global But in a higher education system such as that in the United States the primary response must be institutional This book analyzes how over the years six pioneering colleges and universities have begun to make visible cumulative progress on all three fronts

Improving Teaching, Learning, Equity, and Success in Gateway Courses Andrew K. Koch, 2018-01-22 As long as there have been U S colleges and universities there have been entry courses that pose difficulties for students courses that have served more as weeding out rather than gearing up experiences for undergraduates This volume makes the case that the weed out dynamic is no longer acceptable if it ever was Contemporary postsecondary education is characterized by vastly expanded access for historically underserved populations of students and this new level of access is coupled with increased scrutiny of retention and graduation outcomes Chapters in this volume define and explore issues in gateway courses and provide various examples of how to improve teaching learning and outcomes in these foundational components of the undergraduate experience This is the 180th volume of the Jossey Bass quarterly report series New Directions for Higher Education Addressed to presidents vice presidents deans and other higher education decision makers on all kinds of campuses it provides timely information and authoritative advice about major issues and administrative problems confronting every institution *Enhancing Student Learning Outcomes in Higher Education* KAYOKO ENOMOTO; RICHARD WARNER., Kayoko Enomoto, 2023 *The Attainment Agenda* Laura W. Perna, Joni E. Finney, Patrick M. Callan, 2014-05 While the federal government seeks to promote educational attainment and equity through its extensive investment in student

financial aid states have primary responsibility for policies that affect the educational attainment of their populations. Despite the centrality of state policy, however, we know relatively little about the relationship between state policy and these outcomes. This book addresses this knowledge gap. Drawing on data collected from descriptive case studies of the relationship between public policy and higher education performance in five states: Georgia, Illinois, Maryland, Texas, and Washington, this book offers a more complete conceptual framework for understanding how state public policy can promote educational attainment. The resulting framework has five central tenets that help us understand how to improve overall educational attainment and increase equity in that attainment. At its core, the model assumes that higher education performance is determined by effective state policy leadership for higher education. The book also illustrates the need for state policies that reduce the cumulative negative implications of policies that perpetuate differences in educational outcomes across groups and that proactively address the barriers that limit educational attainment for underachieving groups. This book has important implications for public policymakers, college and university leaders, educational researchers, and others who are interested in understanding how public policy can improve educational attainment and equity in attainment across groups. Enhancing Student Learning Outcomes in Higher Education

Kayoko Enomoto, Richard Warner, Claus Nygaard, 2023-10-31 In the evolving landscape of higher education, this book is a vital resource which addresses a fundamental concern: how to effectively enhance student learning outcomes and adequately prepare students for their professional futures. The book presents a central model for enhancing student learning outcomes: the ESLO model, which is a meticulously crafted framework designed to optimise the academic experience and outcomes for students in higher education. Each stage represents a critical step in the instructional journey, ensuring that teaching and learning methodologies are tailored to students' unique needs, effectively implemented, and subsequently assessed for their impact. The development of the ESLO model is a response to the growing demand for a more systematic, evidence-based approach in education, one that prioritises student learning outcomes and prepares students effectively for their future careers. Comprising 15 chapters, the book presents a wide range of perspectives from university educators spanning four continents: Australia, Asia, Europe, and North America. Their contributions detail their systematic approaches to designing, enacting, and assessing teaching and learning activities to enhance specific learning outcomes. **Enhancing Student Learning Outcomes in Higher Education** is an inspiring read for educators dedicated to advancing their pedagogical techniques and optimising student success.

Improving Student Learning at Scale

Keston H. Fulcher, Caroline Prendergast, 2023-07-03 This book is a step-by-step guide for improving student learning in higher education. The authors argue that a fundamental obstacle to improvement is that higher education administrators and assessment professionals do not know how to improve student learning at scale. By this, they mean improvement efforts that span an entire program affecting all affiliated students. The authors found that faculty and administrators particularly struggle to conceptualize and implement multi-section, multi-

course improvement efforts It is unsurprising that ambitious wide reaching improvement efforts like these would pose difficulty in their organization and implementation This is precisely the problem the authors address The book provides practical strategies for learning improvement enabling faculty to collaborate and integrating leadership social dynamics curriculum pedagogy assessment and faculty development In Chapter 2 the authors tell a program level improvement story from the perspective of a faculty member Chapter 3 inverts Chapter 2 Beginning from the re assess stage the authors work their way back to the individual faculty member first pondering whether she can do something to impact students skills They peel back each layer of the process and imagine how learning improvement efforts might be thwarted at each stage Chapters 4 through 9 dig deeper into the learning improvement steps introduced in Chapters 2 and 3 Each chapter provides strategies to help higher educators climb each step successfully Chapter 10 paints a picture of what higher education could look like in 2041 if learning improvement were embraced And finally Chapter 11 describes what you can do to support the movement

The Intersection of High-Impact Practices Shauna Reilly, Samantha Langley-Turnbaugh, 2021-05-03 The Intersection of High Impact Practices What's Next for Higher Education examines high impact practices and their impacts individually and collectively to demonstrate the added value of connecting high impact practices The research presented by Drs Reilly and Turnbaugh Langley illustrates that student success is not just a function of participation in one or many high impact practices but rather the order timing and interaction of these practices that yields the highest impact These chapters discuss various high impact practices such as study abroad experiences student research initiatives and internships to explore how these kinds of activities augment and enrich the success of students The authors also speculate on where schools could increase the funding for these high impact practices to maximize the institution's return on investment Ultimately this book strongly advocates for not only the benefits of high impact practices but making sure students have multiple experiences with them

Innovations in Higher Education Allan M. Hoffman, Stephen D. Spanghel, 2011-12-01 Rising costs and increasing global competition press institutions to do more with less At the same time deep budget cuts and a general social and political impatience have revived calls for reform in educational affordability curriculum and outcome measurement Yet within this environment a myriad of success stories are being forged among educational institutions supporting industries and educational consortia that are embracing innovative approaches to all aspects of the higher education system This book spotlights those fresh approaches and aims to bring higher education professionals together as part of a broad national movement to motivate reflection and encourage similar dynamic efforts The editors and expert contributors focus in particular on areas such as measures of academic quality benchmarking faculty development retention curriculum development technology and facilities In each case this book illustrates successful pilot programs and documents tools that have proven to maximize efficiencies crucial to the continued success of the entire higher learning community

Improvement in Action Anthony S. Bryk, 2021-02-09 Improvement in Action Anthony S Bryk's sequel to Learning to

Improve illustrates how educators have effectively applied the six core principles of continuous improvement in practice The book highlights relevant examples of rigorous high quality improvement work in districts schools and professional development networks across the country The organizations featured in the book have addressed with remarkable results long standing inequitable educational outcomes in high school graduation rates college readiness and absenteeism The cases emphasize the measures the educators took and the thinking that motivated their actions Bryk describes how improvers working in different contexts and confronting different problems used select principles tools and methods to make improvement come to life Brief analytic reflections are embedded throughout the narratives and each chapter concludes with an analysis of a set of larger lessons illuminated by the organization s story Taken as a set these examples offer readers valuable insights about the actual dynamics of doing improvement work Improvement in Action paired with Learning to Improve provides readers with a comprehensive understanding of the practice method and theory of large scale continuous improvement in education

Degrees That Matter Natasha A. Jankowski, David W. Marshall, 2023-07-03 Sponsored by

Concerned by ongoing debates about higher education that talk past one another the authors of this book show how to move beyond these and other obstacles to improve the student learning experience and further successful college outcomes Offering an alternative to the culture of compliance in assessment and accreditation they propose a different approach which they call the Learning System Paradigm Building on the shift in focus from teaching to learning the new paradigm encourages faculty and staff to systematically seek out information on how well students are learning and how well various areas of the institution are supporting the student experience and to use that information to create more coherent and explicit learning experiences for students The authors begin by surveying the crowded terrain of reform in higher education and proceed from there to explore the emergence of this alternative paradigm that brings all these efforts together in a coherent way The Learning System Paradigm presented in chapter two includes four key elements consensus alignment student centeredness and communication Chapter three focuses upon developing an encompassing notion of alignment that enables faculty staff and administrators to reshape institutional practice in ways that promote synergistic integrative learning Chapters four and five turn to practice exploring the application of the paradigm to the work of curriculum mapping and assignment design Chapter six focuses upon barriers to the work and presents ways to start and options for moving around barriers and the final chapter explores ongoing implications of the new paradigm offering strategies for communicating the impact of alignment on student learning The book draws upon two recent initiatives in the United States the Tuning process adapted from a European approach to breaking down siloes in the European Union educational space and the Degree Qualifications Profile DQP a document that identifies and describes core areas of learning that are common to institutions in the US Many of the examples are drawn from site visit reports self reported activities workshops and project experience collected by the National Institute for Learning Outcomes Assessment NILOA between 2010 and 2016 In that six

year window NILOA witnessed the use of Tuning and or the DQP in hundreds of institutions across the nation

Overcoming Disadvantage in Education Stephen Gorard, Beng See, 2013-08-22 Governments local authorities school leaders and teachers all over the world want to improve the educational attainment and participation of all students and to minimise any systematic differences in outcomes for social and economic groups A particular concern is for those students from backgrounds that may objectively disadvantage them at school and beyond However considerable effort and money is currently being wasted on policies practices and interventions that have very little hope of success and that may indeed endanger the progress that is being made otherwise The poor quality of much education research evidence coupled with an unwillingness among users of evidence to discriminate appropriately between what we know and do not know means that opportunities are being missed At a time of reduced public spending it is important that proposed interventions are both effective and efficient *Overcoming Disadvantage in Education* is unique in the way that it Shows where the solutions to underachievement and poverty lie combines primary new secondary official and published review evidence distinguishes between those possible causes of underachievement that are largely fixed for individuals and those that are modifiable There are evidence informed ways forward in handling under achievement and increasing social justice in education This book shows which the more likely approaches are and where further work could yield further benefits This book will be a key text for students developing academic researchers and supervisors in the social sciences and for those research users charged with improving educational outcomes *Improving Teaching And Learning In Higher Education: A Whole Institution Approach* D'Andrea, Vaneeta, Gosling, David, 2005-08-01 Universities are increasingly being required to pay greater attention to improving teaching and enhancing student learning This text will assist universities and colleges to achieve these goals by establishing an approach to institutional change which is well founded on both research and practical experience

Advancing Equity Graciela Perez, 2020 Talented students from underserved backgrounds face many barriers to attaining higher education Two of the most significant impediments are the low quality of primary and secondary schools they attend and the lack of access to top tier universities providing sufficient financial aid and targeted support Lower levels of educational attainment are linked to higher unemployment rates lower earnings and higher risk of poor health outcomes This dissertation builds upon the extant body of literature evaluating the effectiveness of large scale interventions that pursue a more egalitarian inclusive and diverse educational system Specifically I assess the effectiveness of education policy efforts in i improving the quality of teachers to equalize low income students educational opportunities at earlier stages of schooling and ii increasing the representation of low income high achieving students at top tier universities My research is concerned with the effectiveness of education policy efforts in Chile a middle income country in Latin America with high levels of educational attainment but social class segregation of students that undermines the provision of equal opportunities The country has implemented innovative policies and programs to address educational inequity yet the impacts of these

programs have not been systematically studied This dissertation aims to fill this gap The findings can be used by policymakers university officials and administrators as well as governmental agencies In the first paper The Effects of Educational Supports for the Missing One Offs in Vocational High Schools I study a two year early college program that prepares low income high achieving students from underserved vocational public high schools to enter and graduate from the most selective universities in Chile A growing body of evidence suggests that vocationally focused programs of study substantially improve high school completion and longer run economic success However the corresponding recommendations to expand vocational programs may have unintended negative consequences for low income academically successful students who have the capacity and motivation to attend highly selective universities i e the missing one offs This study contributes to the understanding of these issues by examining an innovative college preparatory program targeted to academically successful Chilean students attending vocational high schools serving lower income communities This program Escuela Desarrollo de Talentos EDT provides academic and social emotional support aligned with admission to selective universities I examine the educational effects of EDT program participation using a fuzzy regression discontinuity design based on its eligibility rules I find that the EDT program did not increase the probability of graduating from high school but did increase performance in math courses I also find corresponding evidence suggesting that EDT participation increased math performance on college entrance exams and shifted students away from further postsecondary vocational training and towards matriculation at elite universities In the second paper The Effects of Priority Admissions in Elite Universities for High Achieving Low Income Students I study the effectiveness of a special admissions quota program at the University of Chile Sistema de Ingreso Prioritario de Equidad Educativa SIPEE that assigns seats to underrepresented students prioritizing those from more disadvantaged socioeconomic backgrounds By lowering the required university entrance exam score threshold the University of Chile admits intellectually talented students who due to their family or high school backgrounds cannot surmount the barrier of minimum curriculum knowledge required by this exam Based on the score threshold required in admissions I use a regression discontinuity design to assess the educational effects of the SIPEE program on its first four cohorts of beneficiaries 2012 to 2015 I find evidence that SIPEE eligibility increased the probability of underserved students application to the University of Chile degree programs Also matriculation and retention rates significantly increased in seven of the 37 degree programs commercial engineering public administration history psychology architecture agricultural engineering and engineering Depending on the degree program the increase in the likelihood of matriculation ranges between 0.3 and 2 percentage points and the increase in the likelihood of retention ranges between 0.2 and 1.3 percentage points Overall the most effective degree programs in increasing matriculation provide academic support to ease the transition between high school and college for low income high achieving students admitted via SIPEE Teachers are one of the most important resources for equalizing opportunities and improving outcomes in schools Unfortunately a growing body

of evidence indicates increasing quality teacher shortages and that these high quality teachers are unequally distributed among schools Disadvantaged students are more likely to experience the adverse effects of teacher shortages and turnover related to this unequal teacher distribution In the third paper Building a Teacher Pipeline Evidence from a Merit Based Tuition Scholarship I study a public policy that addresses the pipeline of Chilean teachers This program Beca Vocación de Profesor BVP provides a full tuition scholarship for high performing individuals who apply to university teacher education programs and requires them to teach in publicly funded schools after graduation I examine the educational and labor effects of BVP program adoption using a regression discontinuity design based on the program's merit based eligibility rules Using a comprehensive dataset that tracks individuals progression from high school to higher education and to their future jobs I assess the causal effect of the BVP program on the 2011 to 2014 cohorts of all applicants to higher education in Chile As a result of the BVP program I find that matriculation in teacher education programs increased by 2 percentage points i.e. 25% of the total enrollees in the four cohorts teacher degree attainment increased by 1 percentage point i.e. 22% of the total of the new certified teachers produced in the four cohorts and the number of teachers working in schools increased by 1 percentage point i.e. 27% of the teachers working in schools from the four cohorts The vast majority of these new teachers end up working in publicly funded schools This represented 4 124 new teachers working in publicly funded schools due to BVP program eligibility and 56 324 new teachers as a result of actually receiving the BVP scholarship In the first four cohorts of grantees the resulting supply of teachers increased by almost 30 percent This study contributes valuable empirical evidence to the policy debate surrounding effective ways to improve teachers recruitment and the allocation of higher quality teachers to under resourced schools This research has implications for how selective universities can play a more active role in mitigating achievement gaps rooted in unequal educational opportunities and meet goals for increasing student body diversity Similarly policies that increase the number of quality teachers and promote their early assignment to public schools have the potential to improve learning opportunities especially for marginalized students The conclusions of this dissertation contribute policy relevant information on the effectiveness of programs designed to equalize educational opportunities and improve academic outcomes for underserved students

The Realities of Change in Higher Education Lynne

Hunt, Adrian Bromage, Bland Tomkinson, 2006 The Realities of Change in Higher Education explores the theory and practice of the everyday reality of change to promote learning and teaching in universities Drawing on international case studies it analyses a range of practical strategies to promote change that enhance students learning Structured to flow from analysis of policy level change through to small scale change at curriculum level experienced practitioners consider key topics including national policies and strategies different leadership styles the advancement of teaching and learning through research and scholarship how communities of practice may be effective agents for change in higher education the relationship between technology and change student assessment as a strategic tool for enhancing teaching and learning With practical advice to

enhance the learning experience of increasing numbers of university students this book will appeal to all practitioners involved in improving learning and teaching outcomes in higher education **Higher Education Reconsidered** Jason E. Lane, 2015-10-15 Focuses on the opportunities and challenges of using the science of change to improve the academic enterprise This is not another book about why higher education needs to change This volume is about how to facilitate change What could higher education achieve if varied stakeholders decided to work together to accomplish a shared vision by using data and scaling up evidence based interventions The contributors offer examples and instructions to help execute change in order to drive collective impact When we understand large scale change in other sectors such as healthcare business and the social sector it can help inform us of what collective impact looks like and how to get there A deeper investigation into the science of change will enable us to work towards increasing access overcoming racial disparities reducing the need for remediation and improving learning outcomes **Improvement Science as a Tool for School**
