In Old French Prisons:

Early French Prisons Arthur Griffiths, 2022-06-13 In *Early French Prisons* Arthur Griffiths offers a meticulous exploration of the history architecture and philosophy surrounding penitentiary systems in France from their inception to the early modern era Griffiths employs a scholarly narrative style rich in detail yet accessible weaving together historical accounts architectural analysis and sociological insight His examination situates French penal practices within the broader context of European criminal justice addressing the societal implications of confinement and discipline during pivotal moments such as the French Revolution and the establishment of modern statehood Arthur Griffiths a prominent Victorian era criminologist and historian was deeply influenced by the contemporary debates on prison reform and rehabilitation His extensive research and personal observations of prisons informed his empathic perspective on the human condition and the complexities of justice The cultural and political milieu of his time coupled with his own advocacy for humane treatment of offenders shaped his insights making *Early French Prisons* not only a historical document but also a reflective commentary on morality and society This work is highly recommended for scholars students and general readers interested in criminology history and social reform Griffiths's thoughtful analysis not only illuminates the evolution of penal systems but also encourages critical reflection on contemporary justice practices making it a relevant and enlightening read

The Old French Lays of Ignaure, Oiselet and Amours Glyn Sheridan Burgess, Leslie C. Brook, 2010 New editions with translations and introductions The three narrative lays presented here form a sequel to the authors *French Arthurian Literature IV Eleven Old French Narrative Lays* published in 2007 No new edition of *Ignaure* has appeared since 1938 and in the meantime this poem has generated a considerable amount of critical comment especially as it provides the first full length example in medieval European literature of the theme of the *Eaten Heart* *Oiselet* recounts a bird's use of three truths as a means of escaping from the clutches of an uncultivated villain In the extant manuscripts these truths occur in two different orders both of which are provided in the present edition *Amours* which follows the progress of a love affair between a nobleman and his beloved has not been edited since 1878 All three poems challenge our understanding of the term *lay* especially if we regard the lays of Marie de France as defining the principal features of this genre GLYN S BURGESS is Emeritus Professor of French at the University of Liverpool LESLIE C BROOK is Honorary Senior Research Fellow in French at the University of Birmingham

The History and Romance of Crime: Modern French Prisons Arthur George Frederick Griffiths, 1830-01-01 The period in French prison practice treated in this volume is one of transition between the end of the Old Regime and the beginning of the New It presents first a view of the prisons of the period immediately following the Revolution and concludes with the consideration of a great model penitentiary which may be said to be the last word in the purely physical aspects of the whole question while its very perfection of structure and equipment gives rise to important moral questions which must dominate the future of prison conduct Throughout the first half of the nineteenth century the combat with the great army of

depredators was unceasingly waged by the champions of law and order in France to whom in the long run victory chiefly inclined. As yet none of the new views held by prison reformers in other countries had made any progress in France. No ideas of combining coercion with persuasion of going beyond deterrence by attempting reformation by exhortation of curing the wrong doer and weaning him from his evil practices when once more sent out into the world obtained in French penology. At that earlier date all the old methods worked by the same machinery still prevailed and were as ever ineffective in checking crime. An active and for the most part intelligent police was indefatigable in the pursuit of offenders who when caught and sentenced travelled the old beaten track passing from prison to prison making long halts at the bagnes and concluding their persistent trespasses upon the guillotine but that was all. French prisons long lagged behind advanced practices abroad not only in respect of their structural fitness and physical condition but also in the measure in which the method of conducting them effected the morals of those who passed through them. When the question was at last presented it was considered with the logical thoroughness and carried out with the administrative efficiency characteristic of the French government when impressed with the necessity for action in any given line. The question for the French prison authorities as indeed it is the question of questions for the prison government of all nations is now: What can be and shall be done for the reform of the convict rather than for his mere repression and punishment. The material aspects of the French prison system have attained almost to perfection. These as well as the moral aspects of the subject which that very physical perfection inevitably presents it is the purpose of this volume to consider.

Russian And French Prison

Kropotkin Peter Kropotkin, 2021-02-15

With an introduction by George Woodcock. Nearly a century has passed since Kropotkin wrote *In Russian and French Prisons* yet his criticisms of the penal system have lost none of their relevance. Prisons far from reforming the offender or deterring crime are in themselves schools of crime. Every year thousands of prisoners are returned to society without hope without a trade or without any means of subsistence and statistics show that once a man has been in prison he is likely to return. Moreover the new offense is likely to be more serious than the first. Although Kropotkin makes extensive use of the memoirs of former prisoners and the works of contemporary penologists it is his own experience in prison he spent five years behind bars two in Russia three in France that gives this book its power. He shows from first hand knowledge the immense human suffering caused by prison life how it destroys the mind and body how it degrades and humiliates how it perverts the prisoner's character and robs him of his dignity how it reduces him to the condition of a caged animal how his whole life is subjected to a deadly mechanical routine how everything is done to break his spirit and kill his inner strength.
