novel in three ways Firstly whereas almost all existing typologies are single layered classifications the functions of tag questions are categorized into two parallel dimensions of interpersonal meaning the speech function and the stance layer Secondly semantic generalizations are proposed for clusters of grammatical intonational and conversational properties Thirdly the bottom up description is based on a sizeable amount of authentic spontaneous conversations which are analysed both qualitatively and quantitatively

*Talking About Troubles in Conversation* Gail Jefferson,2015-05-01 Few

conversational topics can be as significant as our troubles in life whether everyday and commonplace or more exceptional and disturbing In groundbreaking research conducted with John Lee at the University of Manchester UK Gail Jefferson turned the microscope on how people talk about their troubles not in any professional or therapeutic setting but in their ordinary conversations with family and friends Through recordings of interactions in which people talk about problems they're having with their children concerns about their health financial problems marital and relationship difficulties their own or other people's examination failures dramatic events such as burglaries or a house fire and other such troubles Jefferson explores the interactional dynamics and complexities of introducing such topics of how speakers sustain and elaborate their descriptions and accounts of their troubles how participants align and affiliate with one another and finally manage to move away from such topics The studies Jefferson published out of that remarkable period of research have been collected together in this volume They are as insightful and informative about how we talk about our troubles as they are innovative in the development and application of Conversation Analysis Gail Jefferson 1938-2008 was one of the co-founders of Conversation Analysis CA through her early collaboration with Harvey Sacks and in her subsequent research she laid the foundations for what has become an immensely important interdisciplinary paradigm She co-authored with Harvey Sacks and Emanuel Schegloff two of the most highly cited articles ever published in Language on turn taking and repair These papers were foundational as was the transcription system that she developed and that is used by conversation analysts world wide Her research papers were a distinctive and original voice in the emerging micro analysis of interaction in everyday life

**Syntax and Lexis in Conversation** Auli Hakulinen, Margret Selting, 2005-09-28 This volume is a collection of current work at the interface of linguistics and conversation analysis The focus is on linguistic items in their action contexts syntactic structures and lexical items in data from natural conversations in six European languages Danish English Finnish German Italian and Swedish Some of the studies deal with similar practices in two different languages which enables cross linguistic comparisons The notion of construction is brought together with an interactional perspective the fact that constructions cannot always be clearly analysed as either syntactic or lexico semantic has its reflection in this volume So far there have been fewer attempts at interactionally oriented work on lexical and semantic phenomena than on syntactic constructions In this volume several papers show the interactional relevance of word selection and lexical semantic issues In the future studies on syntax and lexico semantics in interaction will enrich realistic grammars of our languages and cross linguistic description of comparable practices of organizing talk in interaction will be invaluable for the study of both inter European and international communication

Code-Switching in Conversation Peter Auer, 2013-07-04 Code Switching the alternating use of two or more languages ation has become an increasingly topical and important field of research Now available in paperback Code Switching in Conversation brings together contributions from a wide variety of sociolinguistics settings in which the phenomenon is observed It addresses not only the structure and the function but also the ideological values of

such bilingual behaviour The contributors question many views of code switching on the empirical basis of many European and non European contexts By bringing together linguistics anthropological and socio psychological research they move towards a more realistic conception of bilingual conversation action      *(Non)referentiality in Conversation* Michael C. Ewing, Ritva Laury, 2024-08-01 Although there is a large literature on referentiality going back to at least the nineteenth and early twentieth century much of this early work is based on constructed data and most of it is on English The chapters in this volume contribute to a growing body of work that examines referentiality through naturalistic data in context Taking an interactional approach to non referentiality contributors to this volume ask how participants talk in real time about persons and things as individuals or as categories and what distinguishes referential from nonreferential specific from nonspecific and generic from nongeneric Crucially we ask whether these distinctions even matter to participants in conversation and if they do what the evidence for that would be Contributors investigate these issues using data from conversational interaction in a variety of social contexts including between close friends and family to more casual acquaintances in service encounters and between adults and children and in a range of languages English Finnish French Indonesian Japanese and Mandarin Collectively the chapters develop insights showing that reference is often fluid dynamic and indeterminate that referential indeterminacy is typically unproblematic for participants that shifts in referentiality tend to be tied to specific social goals and that reference and referentiality emerge dialogically and interactionally      *Charles Wright in Conversation* Robert D. Denham, 2008-10-15 Because Charles Wright occupies a large space in contemporary American poetry it is only natural that his readers over the years have wanted to engage him in conversation and discover more about his career and inspirations In this collection of richly detailed interviews conducted between 1979 and 2006 Wright eloquently discusses a range of topics including the beginning of his poetic career in Italy his experiences at the University of Iowa the American and European influences on his work contemporary poets he admires his place in Southern literature the art of translating poetry and such formal matters as his lineation and rhythmic phrasing his use of syllabics and the development of his characteristic style An extensive bibliography of writings by and about Wright supplements the interviews      *George Grant in Conversation* David Cayley, 1995-10-01 Historian Ramsay Cook called George Grant one of Canada's two most important political thinkers in the twentieth century In these lively conversations recorded not long before Grant's death David Cayley explores with Grant the deep roots of his faith his evolution as a thinker and his views on the future of Canada      *The Morality of Knowledge in Conversation* Tanya Stivers, Lorenza Mondada, Jakob Steensig, 2011-06-02 Each time we take a turn in conversation we indicate what we know and what we think others know However knowledge is neither static nor absolute It is shaped by those we interact with and governed by social norms we monitor one another for whether we are fulfilling our rights and responsibilities with respect to knowledge and for who has relatively more rights to assert knowledge over some state of affairs This book brings together an international team of leading linguists sociologists and anthropologists working across a

range of European and Asian languages to document some of the ways in which speakers manage the moral domain of knowledge in conversation The volume demonstrates that if we are to understand how speakers manage issues of agreement affiliation and alignment something clearly at the heart of human sociality we must understand the social norms surrounding epistemic access primacy and responsibilities      *Democratic Theorists in Conversation* J. Gagnon, 2015-12-11 Democracy has changed considerably in recent years to the extent that our contemporary understanding differs greatly from long held democratic values In this collection renowned democratic theorists from Noam Chomsky to Francis Fukuyama give their thoughts on new democratic theory and its implications for the study and practice of democracy      **On Charity in Conversation: from the French ...** Père Huguet, 1860      **Riopelle in Conversation** Gilbert Erouart, Jean-Paul Riopelle, Fernand Seguin, 1995 Jean Paul Riopelle is without question one of the great painters of our time he is the only Quebec artist whose work has a truly international reputation Riopelle in Conversation takes stock of a life steeped in the most vital works produced during the last fifty years of art and literature Also included is a Radio Canada interview by Fernand Seguin Two glimpses into a fascinating and brilliant mind      **The Art of Complaisance Or The Means to Oblige in Conversation ...** S. C., 1673      **Grammar and Inference in Conversation** Michael C. Ewing, 2005-01-01 This study analyzes how morphosyntactic structures and information flow characteristics are used by interlocutors in producing and understanding clauses in conversational Javanese focusing on the Cirebon variety of the language While some clauses display grammatical mechanisms used to code their structure explicitly and redundantly many other clauses include few if any of these grammatical resources These extremes mark a cline between the morphosyntactic and paratactic expression of clauses The situation is thrown into relief by the frequency of unexpressed referents and conversationalists heavy reliance on shared experience and cultural knowledge In all cases pragmatic inference grounded in the interactional context is essential for establishing not only the discourse functions but indeed also the very structure of clauses in conversational Javanese This study contributes to our understanding of transitivity emergent constituency prosodic organization and the co construction of meaning and structure by conversational interlocutors      **French Music and Jazz in Conversation** Deborah Mawer, 2014-12-04 This book explores the historical cultural interactions between French concert music and American jazz across 1900 65 from both perspectives
