Radical Islam in America Chris Heffelfinger,2011-04-30 The radicalization of Muslims and Islamic institutions in the United States Europe and across the Islamic world has fostered a new generation of Islamist activists many of them willing to

use violence to achieve their aims In *Radical Islam in America* Chris Heffelfinger describes the development of the Islamist movement examines its efforts and influence in the West and suggests strategies to reduce or eliminate the threat of Islamist terrorism The book distinguishes Islamism the fundamentalist political movement based on Islamic identity and values from the Muslim faith and explores Islamists substantial inroads with Muslims and Muslim educational institutions in the West since the 1960s as well as the larger relationship between Islamist political activism and militancy Heffelfinger argues that the West has often mischaracterized jihadists as a nihilistic irrational force desiring nothing but death and destruction Instead we need to recognize that Islamists are part of a much broader struggle over the political social economic and legal direction of Muslims around the world Our failure to understand the motives behind terrorist tactics has resulted not only in ineffective counterterrorism strategies but also in the proliferation of Islamist militants and sympathizers Among the hundreds of terrorism related arrests since 9 11 a large number were young socially alienated Muslims who were moved by the jihadist message but not directed by jihadist networks overseas That phenomenon and the ideology behind it is what Western society and governments must fully understand in order to construct a viable policy to confront it This book will appeal to scholars and general readers interested in global politics current affairs Middle East terrorism and counterterrorism

Planet Neptune and the Modern US Presidents: Franklin Roosevelt to Barack Obama Suzanne Angioli, 2016-04-05 While studying the astrological birth charts of all the US presidents I discovered that those of the thirteen modern US presidents from Franklin Roosevelt to Barack Obama all had the natal Sun the planet most associated with ones basic identity making an aspect certain designated degrees between two planets to their natal Neptune This was surprising since I would have thought that politicians particularly those aspiring to the presidency would have an overwhelming emphasis on the Sun Mars aspect but not on the Sun Neptune aspect What I discovered in my research was that good politicians are not warriors Sun Mars per se who use the techniques of warfare to muscle their way through adversity Rather they are good actors Sun Neptune who are essentially chameleons Sun Neptune operating in the foggy Neptune realm of subtlety Neptune and seduction using their sensitivity Neptune and charm Neptune to serve their intuitive Neptune sides to try to achieve their goals It became apparent that a good politician is excellent at assuming different roles in order to fit a given political situation and move his agenda forward The Sun in aspect to Neptune is not unusual but there is no aggregate population that has 100 percent of its members with this aspect like the modern presidents I was intrigued with this occurrence and thus set out to research their individual biographies to see just how this aspect played out in their lives After all it seemed to be almost a prerequisite for being elected to the modern Oval Office
