ranging across the entire historical spectrum while more than 200 other entries describe the fantasy subgenres key images in fantasy literature technical terms used in fantasy criticism and the intimately convoluted relationship between literary fantasies scholarly fantasies and lifestyle fantasies The book concludes with an extensive bibliography that ranges from general textbooks and specialized accounts of the history and scholarship of fantasy literature through bibliographies and accounts of the fantasy literature of different nations to individual author studies and useful websites

Displacing the Anxieties of Our World Ildikó Limpár, 2017-01-06 Monster studies dystopian literature and film studies have become central to research on the now proliferating works that give voice to culture specific anxieties This new development in scholarship reinforces the notion that the genres of fantasy and science fiction call for interpretations that see their spaces of imagination as reflections of reality not as spaces invented merely to escape the real world In this vein *Displacing the Anxieties of Our World* discusses fictive spaces of literature film and video gaming The eleven essays that follow the Introduction are grouped into four parts I Imagined Journeys through History Gaming and Travel II Political Anxieties and Fear of Dominance III The Space of Fantastic Science and Scholarship and IV Spaces Natural and Spaces Artificial The studies produce a dialogue among disciplinary fields that bridges the imagined space between sixteenth century utopia and twenty first century dystopia with analyses penetrating fictitious spaces beyond utopian and dystopian spheres This volume argues consequently that the space of imagination that conjures up versions of the world's frustrations also offers a virtual battleground and the possibility of triumph coming from a valuable gain of cognizance once we perceive the correspondence between spaces of the fantastic and those of the mundane

Fantasy Brian Attebery, 2022-06-30 An exciting and accessible study of the genre of fantasy One of the dominant modes of storytelling in the twenty first century fantasy can mirror contemporary experiences and convey our anxieties and longings better than any representation of the merely real It is the lie that speaks truth This book addresses two central questions about fantastic storytelling first how can it be meaningful if it doesn't claim to represent things as they are and second what kind of change can it make in the world How can a form of storytelling that alters physical laws and denies facts about the past be at the same time a source of insight into human nature and the workings of the world What kind of social political cultural intellectual work does fantasy perform in the world the world of the reader that is not that of the characters Focusing on various aspects of fantastic world building and story creation in classic and contemporary fantasy from the use of symbolic structures to the way new stories incorporate bits of significance from earlier texts this book shows how fantasy allows writers such as Michael Cunningham Hans Christian Anderson Helene Wecker C S Lewis Ursula K Le Guin Nnedi Okorafor Nalo Hopkinson George MacDonald Aliette de Bodard and Patricia Wrightson to test new modes of understanding and interaction and thus to rethink political institutions social practices and models of reality
