*Values in Cities* James Lesh, 2022-09-23 Examining urban heritage in twentieth century Australia James Lesh reveals how evolving ideas of value and significance shaped cities and places Over decades a growing number of sites and areas were found to be valuable by communities and professionals Places perceived to have value were often conserved Places perceived to lack value became subject to modernisation redevelopment and renewal From the 1970s alongside strengthened activism and legislation with the innovative Burra Charter 1979 the values based model emerged for managing the aesthetic historic scientific and social significance of historic environments Values thus transitioned from an implicit to an overt component of urban architectural and planning conservation The field of conservation became a noted profession and discipline Conservation also had a broader role in celebrating the Australian nation and in reconciling settler colonialism for the twentieth century Integrating urban history and heritage studies this book provides the first longitudinal study of the twentieth century Australian heritage movement It advocates for innovative and reflexive modes of heritage practice responsive to urban social and environmental imperatives As the values based model continues to shape conservation worldwide this book is an essential reference for researchers students and practitioners concerned with the past and future of cities and heritage The Foreword and Chapter 1 Introduction of this book are available for free in PDF format as Open Access from the individual product page at [www.routledge.com](http://www.routledge.com) It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

**Immigrants in cities : a study of the population of selected districts in New York, Chicago, Philadelphia, Boston, Cleveland, Buffalo, and Milwaukee** United States. Immigration Commission (1907-1910), 1911

**Entrepreneurship in Cities** Colin Mason, Darja Reuschke, Stephen Syrett, Maarten van Ham, 2015-12-18

Entrepreneurship in Cities focuses on the neglected role of the home and the residential neighbourhood context for entrepreneurship and businesses within cities. The overall objective of the book is to develop a new interdisciplinary perspective that links entrepreneurship research with neighbourhood and urban studies. A key contribution is to show that entrepreneurship in cities is more than agglomeration economies and high tech clusters. This is the first book to connect entrepreneurship with neighbourhoods and homes, recognising that business activity in the city is not confined to central business districts, high streets and industrial estates but is also found in residential neighbourhoods. It highlights the importance of home based businesses for the economy of cities. These often overlooked types of businesses and workers significantly contribute to the buzz that makes cities favourable places to live and work. Walking in Cities Evrick Brown, Timothy Shortell, 2016. Walking connects the rhythms of urban life to the configuration of urban spaces. As the contributors and editors show in *Walking in Cities*, walking also reflects the systematic inequalities that order contemporary urban life. Walking has different meanings because it can be a way of temporarily taking possession of urban space or it can make the relatively powerless more vulnerable to crime. The essays in *Walking in Cities* explore how walking intersects with sociological dimensions such as gender, race and ethnicity, social class and power. Various chapters explore the flâneuse or female urban drifter in Tehran's shopping malls, Hispanic neighborhoods in New York, San Diego and El Paso, and the intra-neighborhood and inter-class dynamics of gentrification in Greenpoint, Brooklyn. The essays in *Walking in Cities* provide important lessons about urban life. Housing Dynamics in Korea: Building Inclusive and Smart Cities OECD, 2018-04-18. Housing in Korea has been part of the government policy development agenda for the past three decades, contributing to reducing the historical housing shortage and improving the quality of dwellings. Despite its achievements, Korea now faces a housing affordability challenge as prices are too high. *Walking in Cities* Jaspar Joseph-Lester, Ahuvia Kahane, Simon King, Esther Leslie, 2024-09-30. This book brings together an international group of artists and writers to respond to the question of how our new world orders force us to reconsider urban walking and urban spaces in ways which extend into the digital sphere of online dialogue and screen sharing. In their reflections on walking cities in lockdown, the artists and writers contributing to this book share a number of complementary themes. Key to this is the question of how we walk in post-pandemic cities and how such walking might motivate or be motivated by transgressive, atomised or collective thoughts, affects, relations and experiences. Here we see how navigating cities in lockdown requires us to re-territorialise, improvise, create and de/re-politise. There is, for example, a clear distinction between the severe lockdown measures that were introduced in Cape Town and the liberal appeal to good citizenship that northern hemisphere cities such as Stockholm chose to rely on. These measures impact on the way we experience urban walking and in each case lead to deeper reflections about the heightened presence of ideological structures embedded within the urban. *Air Quality in Cities* Nicolas Moussiopoulos, 2013-11-11. Urban areas are major sources of air pollution. Pollutant emissions affecting air quality in cities are considered to have

adverse consequences for human health Public and government concern about environmental issues arising from urban air pollution has increased over the last decades The urban air pollution problem is widespread throughout the world and it is important to find ways of eliminating or at least reducing the risks for human health The fundamentals of the physical and chemical processes occurring during air pollutant transport in the atmosphere are nowadays understood to a large extent In particular modelling of such processes has experienced a remarkable growth in the last decades Monitoring capabilities have also improved markedly in the most urban areas around the world However neither modelling nor monitoring can solve urban air pollution problems as they are only a first step in improving useful information for future regulations The defining of efficient control strategies can not be achieved without a clear knowledge of the complete pollution process i e emission atmospheric transport and transformation and deposition at the receptor Improving our ability to establish valid urban scale source receptor relations has been the objective of SATURN one of the 14 subprojects of EURO TRAC 2 Similar to the other subprojects of this coordinated environmental project within the EUREKA initiative SATURN brought together international groups of scientists to work on problems directly related to atmospheric chemistry and physics The present volume summarises the scientific results of SATURN

**The Power of Culture in City Planning** Tom

Borrup, 2020-11-29 The Power of Culture in City Planning focuses on human diversity strengths needs and ways of living together in geographic communities The book turns attention to the anthropological definition of culture encouraging planners in both urban and cultural planning to focus on characteristics of humanity in all their variety It calls for a paradigm shift re positioning city planners base maps to start with a richer understanding of human cultures Borrup argues for cultural master plans in parallel to transportation housing parks and other specialized plans while also changing the approach of city comprehensive planning to put people or users first rather than land uses as does the dominant practice Cultural plans as currently conceived are not sufficient to help cities keep pace with dizzying impacts of globalization immigration and rapidly changing cultural interests Cultural planners need to up their game and enriching their own and city planners cultural competencies is only one step Both planning practices have much to learn from one another and already overlap in more ways than most recognize This book highlights some of the strengths of the lesser known practice of cultural planning to help forge greater understanding and collaboration between the two practices empowering city planners with new tools to bring about more equitable communities This will be an important resource for students teachers and practitioners of city and cultural planning as well as municipal policymakers of all stripes

**Future Transport in Cities** Brian Richards, 2012-09-10

Cities around the world are being wrecked by the ever increasing burden of traffic A significant part of the problem is the enduring popularity of the private car still an attractive and convenient option to many who turn a blind eye to the

environmental and public health impact Public transport has always seemed to take second place to the car and yet alternative ways of moving around cities are possible Measures to improve public transport as well as initiatives to encourage walking and cycling have been introduced in many large cities to decrease car use or at least persuade people to use their cars in different ways This book explores many of the measures being tried It takes the best examples from around the world and illustrates the work of those architects and urban planners who have produced some of the most significant models of transport architecture and city planning The book examines the ways in which new systems are evolving and how these are being integrated into the urban environment It suggests a future where it could be mandatory to provide systems of horizontal movement within large scale development using the analogy of the lift upon which every high rise building depends In so doing future cities could evolve without dependence on the private car      **Fiscal Stress in Cities** Richard Rose, Edward C. Page, 1982 This book identifies the extent the causes and consequences of fiscal stress as it affected local government in the 1980s

## **In Cities Introduction**

In the digital age, access to information has become easier than ever before. The ability to download In Cities has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download In Cities has opened up a world of possibilities. Downloading In Cities provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading In Cities has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download In Cities. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading In Cities. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading In Cities, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download In Cities has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.
