

The background of the image is a landscape photograph. The sky is filled with large, white, fluffy clouds against a blue background. Below the horizon line, the ground is covered in dark, jagged rocks and patches of dry, brownish vegetation. The overall tone is somewhat somber and contemplative.

For me, the only
sources of moral values
are the pursuit of
understanding and the
pursuit of happiness.

In Pursuit Of Moral Value

R. Scott Smith

In Pursuit Of Moral Value:

Moral Values Nicolai Hartmann, 2017-09-29 Nicolai Hartmann 1882 1950 along with Henri Bergson and Martin Heidegger was instrumental in restoring metaphysics to the study of philosophy Unlike his contemporaries however Hartmann was clearly influenced by Plato His tour de force *Ethik* published in English in 1932 as *Ethics* may be the most outstanding work on moral philosophy produced in the twentieth century In the first part of *Ethics* *Moral Phenomena* Hartmann was concerned with the structure of ethical phenomena and criticized utilitarianism Kantianism and relativism as misleading approaches In the second part *Moral Values* the author describes all values as forming a complex and as yet imperfectly known system The actualization of the non moral and elementary moral values is a necessary condition for the actualization of the higher values It is on this account that rudimentary values have a prior claim Hartmann outlines the main features of the chief virtues and shows that the moral disposition required in any exigency is always a specific synthesis of various and often conflicting values Specifically describing fundamental moral values such as goodness nobility and vitality and special moral values such as justice wisdom courage self control trustworthiness and modesty Hartmann takes theoretical philosophy and brings it very much into the realm of the practical A compelling and insightful volume *Moral Values* remains an essential contribution to the moral and ethical literature of the twentieth century Hartmann offers a self contained system of ethics that yet offers a conservative outlook on social life

In Search of Moral Knowledge R. Scott Smith, 2014-05-02 For most of the church's history people have seen Christian ethics as normative and universally applicable Recently however this view has been lost thanks to naturalism and relativism R Scott Smith argues that Christians need to overcome Kant's fact value dichotomy and recover the possibility of genuine moral and theological knowledge

Values and Intentions J. N. Findlay, 2014-11-20 Professor Findlay in this book originally published in 1961 set out to justify and to some extent carry out a material value ethic ie A systematic setting forth of the ends of rational action The book is in the tradition of Moore Rashdall Ross Scheler and Hartmann though it avoids altogether dogmatic intuitive methods It argues that an organised framework of ends of action follows from the attitude underlying our moral pronouncements and that this framework while allowing personal elaboration is not a matter for individual decision The relations connecting our fundamental value judgements with one another and the frames of mind behind them are not rigorously deductive but are sufficiently compelling to be called logical Something of a transcendental deduction of a well ordered family for our basic heads of valuation is both possible and necessary The work is further critical of the notion of obligation which has been extended far beyond legal contracts and understandings The book also contains a chapter on religion

In Pursuit of Love Vincent J. Genovesi, 1996 While retaining the basic structure of the original book this new edition has been thoroughly updated in light of some official Catholic documents and other theological writings dealing with sexual morality that have appeared since 1986 The Catechism of the Catholic Church Pope John Paul II's encyclicals *Veritatis splendor* and *Evangelium*

vitae and the 1986 and 1992 statements of the Congregation for the Doctrine of the Faith on pastoral care of homosexuals and the issue of discrimination against them are among the more recent magisterial publications considered in this text. This edition also contains several new sections: the misuses of sex, adultery, pornography, prostitution, sexual violence, four rationales for viewing a committed love relationship as the only appropriate context for sexual intercourse, marriage as a sacrament and marital sexuality and love as embodiments of commitment, intimacy and passion, and public policy and the civil rights of homosexuals. This edition also includes an expanded discussion of topics such as sexism, sexually transmitted diseases, especially HIV/AIDS, and the moral questions raised by new family planning methods: Norplant, Depo Provera, RU-486, postcoital hormonal interventions against pregnancy, the start of human life, and abortion.

Vincent J. Genovesi, SJ, received his PhD in Christian ethics from Emory University. He is a professor at St. Joseph's University in Philadelphia. His articles have appeared in such journals as *The Thomist*, *The Way*, *America*, and *Review for Religious*.

Ethics, Emotion and the Unity of the Self (Routledge Revivals) Oliver Letwin, 2010-07-02. This Routledge Revival reissues Oliver Letwin's philosophical treatise *Ethics, Emotion and the Unity of the Self*, first published in 1987, which concerns the applicability of the artistic classifications of romanticism and classicism to philosophical doctrine. Dr. Letwin examines three particular theses associated with philosophical romanticism: that there is within us a high self and a low self; that there is a moral self in inevitable conflict with an amoral self; and that there is a rational self disjoined from and in tension with a passionate self. He argues that these notions of philosophical romanticism are in fact radically false and instead takes the view that man can be a unified being of the sort described by philosophical classicists. But man has to work to achieve this status. The intrinsic unity of the human personality is not a guarantee of a coherent life but a challenge to be met.

Moral Values and the Idea of God William Ritchie Sorley, 1921.

In Search of Moral Authority Van Nguyen-Marshall, 2008. *In Search of Moral Authority: The Discourse on Poverty, Poor Relief, and Charity in French Colonial Vietnam* is a pioneering exploration of the discourses on poverty and poor relief activities in early twentieth-century Northern Vietnam. Treating poverty as a socially constructed idea, Van Nguyen Marshall argues that poor relief was a domain where both French colonialists and Vietnamese intellectuals vied for moral authority. For the French colonial officials, poor relief fell within the purview of the French civilizing mission, the official justification for imperialism. However, the colonial agenda, racial prejudices, and the French administrators' own ambivalent attitudes toward the poor made any attempt at poor relief doomed for failure. For Vietnamese intellectuals, the discourse and activities on poor relief became a rallying call for patriotism, nationalism, and for some, anti-colonialism. *In Search of Moral Authority* deals with social issues such as charity and poor relief, as well as the construction of national and gender identity by Vietnamese intellectuals. This book is essential reading for students and specialists of Vietnamese history, as well as those interested in issues of poverty, public welfare, and charity.

Thinking in Moral Terms Sigrún Svavarsdóttir, 2001. This work examines the nature of

moral judgements In the course of developing an account of moral judgements the author discusses issues such as moral motivation the nature of desire the justification of commitments the relation between morality and rationality the difference between moral and scientific inquiry and the nature of properties of concepts and of normativity The author argues non cognitivists who construe moral judgements as mere expressions of sentiments that moral thought employs concepts which figure into the content of both cognitive and conative states of mind She argues that this view is not a cause for any metaphysical worries about moral properties and rejects the idea that the difference in the distinctive action guiding role of moral judgements is to be understood in terms of the metaphysical nature of the facts which render them true She also rejects the widespread idea that the distinctive action guiding role of moral judgements amounts to their being intrinsically motivating and argues that moral judgements motivate in collaboration with a desire which employs moral concepts in representing the desired state of affairs Against some moral naturalists the author argues that it is not a condition on the acceptance of a moral theory that its concepts have some explanatory function and that this marks the crucial difference between the concepts unique to moral thought and those characteristic of scientific or proto scientific thought She suggests that this reflects a difference in the aims of moral and scientific inquiry Appreciation of the distinctive aim of moral practice is required for the mastery of moral concepts and this is why moral judgements are invariably understood as action guiding even if they are not in all cases motivating

Ethics, Value, and Reality Aurel Kolnai, 2017-09-29 Ethics Value and Reality is a collection of essays written after Kolnai settled in England in 1955 These essays from Kolnai's mature years sit atop a remarkable gestation of moral and political thinking At the heart of his thought is the special role of privilege in a good social order Kolnai relies heavily on the work of late nineteenth and early twentieth century value theorists such as Alexius Meinong Nicolai Hartmann and Max Scheler He blends this continental tradition of ethics with British intuitionism and Scottish Enlightenment articulations For Kolnai ethical life cannot be adequately understood except by reference to moral emphasis and thus Kolnai can be thought of as a liberal conservative He acknowledges myriad values moral and non moral and accepts that all can have some claim upon us Low values as much as high values have a legitimate claim His is a tolerant conservatism though not for a moment does he forgo the necessity of judgment a readily graspable hierarchy keeps the respective demands of values in proportion Kolnai welcomes the call to seriousness which is the hallmark of existentialism The ground of Kolnai's thought is the idea of emotion as cognitive He saw the typical analytical philosopher's fascination with simplicity of explanation not only thoroughly refuted by the gains in understanding wrought by phenomenological method with its deference to the richness of phenomena but sensed in the monistic inclination he dreaded a harbinger of totalitarianism Never denying his emotionalism he nonetheless made his points well enough by adopting an analytical approach to philosophy and ethics This is a major work crossing moral and political philosophy
