Impact of Gun Violence in School Systems Herron, Jeffrey, Sartin, Sharon R., 2024-04-29 The United States is a nation that has been facing a crisis of violence within its school system for decades. This disruptive and traumatic phenomenon has had lasting impacts on the systems in which education must exist, but the ripple effects of this require an extensive analysis. To advance society, quality education is necessary, and ensuring that quality demands that experts take a step back and look at the bigger picture. In the wake of rising concerns over safety in educational environments, *Impact of Gun Violence in School Systems* delves into the urgent issue of gun violence within the United States school systems. As educators, administrators, counselors, social workers, and policy makers grapple with the complex challenges presented by violence, this book serves as a comprehensive guide to understanding the multifaceted dimensions of the issue. Examining topics such as gun violence, mental health, school suspension, student success, bullying, violence reduction programs, alternative schools, inner city youth programs, and zero tolerance policies, the manuscript synthesizes current research, real world examples, and innovative solutions. *Impact of Gun Violence in School Systems* not only sheds light on the root causes of violence within educational settings but also provides actionable insights and recommendations, making it an indispensable resource for those committed to creating safer and more conducive learning environments for our youth.

Ethical Decision Making in School Mental Health James C. Raines, Nic T. Dibble, 2010-09-30 Ethical predicaments are endemic for mental health professionals working in a host setting like schools. New interventions, evolving technologies, and a patchwork of ethical guidelines and legal codes create a constant stream of new ethical dilemmas. Quick answers and simple solutions are rare, but with the seven stage model presented here, readers will learn to apply an ethical decision making process that minimizes their liability while better protecting their students. Beginning with an introduction to the moral, legal, and clinical foundations that undergird ethical practice, the authors outline an ethical decision making process to handle conundrums that includes seven major steps: know yourself, analyze the dilemma, seek consultation, identify courses of action, manage the clinical concerns, enact the decision, and reflect on the process. Each chapter describes these steps in detail, provides case examples to illustrate their application, and presents exercises that encourage readers to integrate them into their everyday practice. This handy guide is written for the school social workers, school psychologists, school nurses, and school counselors who are responsible for acting in their students' best interests, as well as post-secondary students studying to enter one of these professions. It will be a trusted resource for school services professionals seeking clear but nuanced guidance in resolving thorny ethical issues.

way to extend young people's attention beyond the classroom to the world as it actually is and to engage them in the process of devising solutions to the social and environmental problems they will confront as adults. This approach can increase students' engagement with learning and enhance their academic achievement. Envisioned as a primer and guide for educators and members of the public interested in incorporating the local into schools in their own communities, this book explains the purpose and nature of place and community based education and provides multiple examples of its practice. Therapeutic Practice in Schools

Volume Two The Contemporary Adolescent Lyn French, Reva Klein, 2014-07-17. In common with *Therapeutic Practice in Schools: Working with the Child Within* (Routledge, 2012), this second volume serves as a practical handbook for school-based counsellors, psychotherapists, arts therapists, and play therapists working with young people. Written in accessible language, it is eminently applicable to the practice of both qualified and trainee therapists. *Therapeutic Practice in Schools: The Contemporary Adolescent* begins with an overview of key psychoanalytic ideas informing our understanding of adolescence, before moving on to focus on life circumstances and issues which commonly bring young people to the therapist's consulting room in the school. Dedicated chapters on key themes including identity, relationships, sex and sexuality, anger, issues of self-harm, bereavement, and bullying aim to deepen our understanding of the adolescent experience while also providing the therapist with invaluable insights into what one might say in the here and now of the session. Chapter authors, all with considerable experience in the field, discuss approaches to sustaining the therapeutic relationship in the face of ambivalence or defiant resistance, as well as thinking about the impact of social media on all aspects of adolescent development. The advantages and limitations of working with adolescents in the educational setting, where school staff will have their own reasons for referring students for therapy while the young people themselves might come with a very different agenda, are also covered. It is widely acknowledged that engaging troubled or troublesome adolescents in therapy can make an enormous difference to their lives. This book ensures that both trainee and qualified therapists are supported in the often daunting yet ever stimulating and enlivening task of working with young people in the school setting.
