Coronavirus Disease (COVID-19): Psychological Reactions to the Pandemic Joanna Sokolowska, Peter Ayton, Eduard Brandstätter, 2021-10-14. PsychoNeuroImmunology Nima Rezaei, Niloufar Yazdanpanah, 2025-01-16. This book seeks to represent the main concepts and theories related to psychoneuroimmunology with the aim of their application in clinical settings and formation of novel theories to further elucidate the mutual connection of the psyche and the physiology of humans' body. Psychoneuroimmunology as an integration of popular research fields such as psychology, immunology, neurology and neuroscience is a perfect example of interdisciplinary and transdisciplinary studies that could potentially result in developing alternative diagnostic tools and treatment strategies besides facilitating the understanding of the pathophysiology of some conditions that might not properly be understood with a single point of view. Considering the stressful lifestyle and the high prevalence of neuropsychiatric, metabolic and immune related disorders, psychoneuroimmunology could be the path to the management of these conditions and reduction of the burden of the diseases. THE INTERNATIONAL JOURNAL OF INDIAN PSYCHOLOGY, Volume 8, No. 4, Part 7 Dr. Suresh Makvana, Dr. Ankit Patel, 2021-01-01. Digital Roots Gabriele Balbi, Nelson Ribeiro, Valérie Schafer, Christian Schwarzenegger, 2021-09-07. As media environments and communication practices evolve over time so do theoretical concepts. This book analyzes some of the most well known and fiercely discussed concepts of the digital age from a historical perspective showing how many of them have pre-digital roots and how they have changed and still are constantly changing in the digital era. Written by leading authors in media and communication studies, the chapters historicize 16 concepts that have become central in the digital media literature focusing on three main areas. The first part: Technologies and Connections historicises concepts like network, media convergence, multimedia, interactivity and artificial intelligence. The second one is related to Agency and Politics and

explores global governance datafication fake news echo chambers digital media activism The last one Users and Practices is finally devoted to telepresence digital loneliness amateurism user generated content fandom and authenticity The book aims to shed light on how concepts emerge and are co shaped circulated used and reappropriated in different contexts It argues for the need for a conceptual media and communication history that will reveal new developments without concealing continuities and it demonstrates how the analogue digital dichotomy is often a misleading one

**The Art, Literature and Music of Solitude** Julian Stern, 2023-12-14 This book presents a thematic analysis of various aspects of solitude silence and loneliness from the ancient world to the present day explored thematically with consideration to the links between aloneness to other social and political issues The themes include exile expulsion from a community ecstasy getting out of oneself and ecstasy being comfortable within oneself to the Romantic idea of the artist as solitary There is work on aloneness in and through nature especially the importance of natural settings for positive experiences of solitude A central theme is alienation and its emotions with the idea of loneliness and the rejected self being a more modern experience The book explores modernism and postmodernism as presenting new forms of solitude in the twentieth century and how more recently there have been attempts to recover the self through therapeutic uses of the arts All of these types and experiences of aloneness are described through the lenses of artistic literary and musical forms of expression as aloneness is not only explored and articulated through these art forms but is in many ways created through these art forms

Peer Rejection in Childhood Steven R. Asher, John D. Coie, 1990-04-27 This important collection examines peer rejections among children

Lonely Children and Adolescents Malka Margalit, 2010-06-25 From texting and social networking sites to after school activities young people have many opportunities

to interact with one another and yet loneliness and isolation trouble today's youth in increasing numbers. Many children and teens report feeling lonely even in the midst of family and friends and childhood loneliness is a prime risk factor for adult alienation. *Lonely Children and Adolescents: Self Perceptions, Social Exclusion, and Hope* illuminates seldom explored experiences of social isolation among young people as well as the frustrations of the parents and teachers who wish to help. This groundbreaking book conceptualizes loneliness not simply as the absence of social connections but as a continuum of developmental experience often growing out of the conflict between opposite needs to be like one's peers yet be one's unique self. The author draws clear distinctions between loneliness and solitude and identifies genetic and environmental characteristics, i.e. social, psychological, familial and educational that can be reinforced to help children become more resilient and less isolated. In addition, therapeutic approaches are described that challenge loneliness by encouraging empowerment, resilience and hope from proven strategies to promising tech-based interventions. Highlights include: Developmental perspectives on loneliness; Schools and the role of teachers from preschool to high school; Peer relations, e.g. cliques, bullies, exclusion and popularity; Lonely children, lonely parents; models of coping; Loneliness in the virtual world; Prevention and intervention strategies at home, at school, in therapy. Asking its readers to rethink many of their assumptions about social competence and isolation, this volume is essential reading for researchers and professionals in clinical child, school, developmental and educational psychology, allied education disciplines, social work and social and personality psychology.

*The Routledge International Handbook of Human Significance and Mattering* Arie W. Kruglanski, Isaac Prilleltensky, Amiram Raviv, 2025-02-11. This innovative book addresses the need for significance and mattering as a universal human motivation. It examines the impact of significance and mattering considering how they manifest across our lifespan and in different parts of our lives. Written by a team of eminent authors with expertise in diverse psychological fields, the book explores how significance and mattering extend to almost all social domains including families, schools, colleges, groups, workplaces, communities and nations. The book is divided into four main parts which consider the impact of significance and mattering across the life span, across life domains, across societies and cultures and in mental health. The chapters outline how significance and mattering, power, race and gender, politics shape attitudes toward immigration, drive violent extremism and underlie mental health issues such as loneliness and narcissism. The book considers the quest for significance as a fundamental motive in our personal interactions and in how society operates as a whole. Providing a truly comprehensive coverage of a ubiquitous psychological dynamic that affects all aspects of our lives, this book will be highly relevant for researchers, academics, practitioners and students in psychology, social sciences, education, social work and therapeutic professions. In addition, the book should appeal to organizational, political and community leaders and the general public interested in human behavior and social problems.
