**In Physicam Aristotelis** Richard Rufus of Cornwall, 2003 As one of the earliest Western physics teachers Richard Rufus of Cornwall helped transform Western natural philosophy in the 13th century But despite the importance of Rufus's works they were effectively lost for 500 years and the Physics commentary is the first complete work of his ever to be printed Rufus taught at the Universities of Paris and Oxford from 1231 to 1256 at the very time when exposure to Aristotle's *libri naturales* was revolutionizing the academic curriculum indeed Rufus gave the earliest surviving lectures on physics and metaphysics Rufus not only expounded the views of Aristotle and the commentator Averroes but he also challenged them and this lively discussion proved to be enormously influential Rufus rejected Aristotle's theory of projectile motion and this rival view was later adopted by Franciscus de Marchia His revised account of the place of the heavens was taken up by Roger Bacon and Thomas Aquinas and his defence of creation still considered a cogent reply to Aristotle's claims for a beginningless universe was to be embraced by both Bacon and Bonaventure Professor Wood's meticulous edition sheds light on that crucial period when the medieval West for the first time acquired a comprehensive scientific account of the cosmos [Encyclopedia of Medieval Philosophy](#) Henrik Lagerlund, 2010-12-07 This is the first reference ever devoted to medieval philosophy It covers all areas of the field from 500-1500 including philosophers philosophies key terms and concepts It also provides analyses of particular theories plus cultural and social contexts *The Reception of John Philoponus's Natural Philosophy* Emmanuele Vimercati, 2024-11-14 In some of his most famous works John Philoponus c 490-570 CE confronts numerous aspects of Aristotle's philosophy and science Yet the influence of these reinterpretations and critiques remains under examined This volume fills this gap by uncovering the considerable impact of Philoponus' natural philosophy in both the medieval and Renaissance periods Divided into three parts the first part of the volume introduces central concepts in Philoponus' philosophy Highlighting the areas of crossover as well as of disagreement with Aristotle chapters dedicate specific attention to Philoponus' theories of place matter and vacuum his ideas of motion his discussion of the heavens and the fifth element and his anthropology This is followed in parts two and three by a focus on Philoponus' reception in the Middle Ages and the Renaissance respectively Shedding light on the scientific ideas circulating in these periods international experts explore a range of topics from the renewal of Aristotelianism in the Arab world through the medieval Byzantine and Latin traditions to Philoponus' appearance in the early works of Galileo Engaging with a number of Philoponus' key tracts *The Reception of John Philoponus' Natural Philosophy* is both a much needed study of Philoponus' influence and a revealing analysis of how Aristotelian science was received adapted critiqued and mediated throughout the Middle Ages and the Renaissance

[Medieval Commentaries on Aristotle's Categories](#) Lloyd Newton, 2008-08-31 Medieval commentary writing has often been described as a way of doing philosophy and not without reason The various commentaries on Aristotle's *Categories* we have from this period did not simply elaborate a dialectical exercise for training students rather they provided their authors with

an unparalleled opportunity to work through crucial philosophical problems many of which remain with us today As such this unique commentary tradition is important not only in its own right but also to the history and development of philosophy as a whole The contributors to this volume take a fresh look at it examining a wide range of medieval commentators from Simplicius to John Wyclif and discussing such issues as the compatibility of Platonism with Aristotelianism the influence of Avicenna the relationship between grammar logic and metaphysics the number of the categories the status of the categories as a science realism vs nominalism and the relationship between categories
