Future Of The Past Archaeologists Native Americans And Repatriation:

The Future of the Past Tamara L. Bray, 2001 To date the notion of repatriation has been formulated as a highly polarized debate with museums archaeologists and anthropologists on one side and Native Americans on the other This volume offers both a retrospective and a prospective look at the topic of repatriation By juxtaposing the divergent views of native peoples anthropologists museum professionals and members of the legal profession it illustrates the complexity of the repatriation issue Archaeologists and the Dead Howard Williams, Melanie Giles, 2016-06-24 This volume addresses the relationship between archaeologists and the dead through the many dimensions of their relationships in the field through practical and legal issues in the lab through their analysis and interpretation and in their written visual and exhibitionary practice disseminated to a variety of academic and public audiences Written from a variety of perspectives its authors address the experience effect ethical considerations and cultural politics of working with mortuary archaeology Whilst some papers reflect institutional or organisational approaches others are more personal in their view creating exciting and frank insights into contemporary issues which have hitherto often remained unspoken amongst the discipline Reframing funerary archaeologists as death workers of a kind the contributors reflect on their own experience to provide both guidance and inspiration to future practitioners arguing strongly that we have a central role to play in engaging the public with themes of mortality and commemoration through the lens of the past Spurred by the recent debates in the UK papers from Scandinavia Austria Italy the US and the mid Atlantic frame these issues within a much wider international context which highlights the importance of cultural and historical context in which this work takes place **The Oxford Handbook of Public Archaeology** Robin Skeates, Carol McDavid, John Carman, 2012-01-05 The Oxford Handbook of Public Archaeology seeks to reappraise the place of archaeology in the contemporary world by providing a series of essays that critically engage with both old and current debates in the field of public archaeology Divided into four distinct sections and drawing across disciplines in this dynamic field the volume aims to evaluate the range of research strategies and methods used in archaeological heritage and museum studies identify and contribute to key contemporary debates critically explore the history of archaeological resource management and question the fundamental principles and practices through which the archaeological past is understood and used today **Kennewick Man** Heather Burke, Claire E Smith, Dorothy Lippert, Joe E Watkins, Larry J Zimmerman, 2016-09-17 Kennewick Man known as the Ancient One to Native Americans has been the lightning rod for conflict between archaeologists and indigenous peoples in the United States A decade long legal case pitted scientists against Native American communities and highlighted the shortcomings of the Native American Graves and Repatriation Act NAGPRA designed to protect Native remains In this volume we hear from the many sides of this issue archaeologists tribal leaders and others as well as views from the international community The wider implications of the case and its resolution is explored Comparisons are made to similar cases in other countries and how they have been handled

Max Friesen, Owen K. Mason, 2016-08-05 The North American Arctic was one of the last regions on Earth to be settled by humans due to its extreme climate limited range of resources and remoteness from populated areas Despite these factors it holds a complex and lengthy history relating to Inuit Iupiat Inuvialuit Yup'ik and Aleut peoples and their ancestors The artifacts dwellings and food remains of these ancient peoples are remarkably well preserved due to cold temperatures and permafrost allowing archaeologists to reconstruct their lifeways with great accuracy Furthermore the combination of modern Elders traditional knowledge with the region's high resolution ethnographic record allows past peoples lives to be reconstructed to a level simply not possible elsewhere Combined these factors yield an archaeological record of global significance the Arctic provides ideal case studies relating to issues as diverse as the impacts of climate change on human societies the complex process of interaction between indigenous peoples and Europeans and the dynamic relationships between environment economy social organization and ideology in hunter gatherer societies In the *The Oxford Handbook of the Prehistoric Arctic* each arctic cultural tradition is described in detail with up to date coverage of recent interpretations of all aspects of their lifeways Additional chapters cover broad

Cunliffe, Wendy Davies, Colin Renfrew, 2002 Twenty six leading scholars from around the world have come together to celebrate the strengths the energies and the sheer intellectual excitement of their discipline They unashamedly proclaim that over the last hundred years archaeology has transformed itself from a genteel antiquarian pursuit deeply rooted in the classical tradition to a rigorous and demanding discipline spanning the humanities and the sciences yet at the same time one widely accessible to the public at large The contributors show how our understanding of the past has changed reveal the exciting ideas under current debate and offer their visions of the future The result is a remarkable overview of world archaeology focusing on new and unexpected themes at the cutting edge of the discipline The Routledge Handbook of Classics, Colonialism, and Postcolonial Theory Katherine Blouin, Ben Akrigg, 2024-07-29 This handbook explores the ways in which histories of colonialism and postcolonial thought and theory cast light on our understanding of the ancient Mediterranean world and the discipline of Classics utilizing a wide body of case studies and providing avenues for future research and discussion It brings together chapters by a wide international and intersectional range of scholars coming from a variety of backgrounds and sub disciplinary perspectives and from across the chronological and geographical scope of Classics Chapters cover the state of current research into ancient Mediterranean and South Central and West Asian histories They provide case studies to illustrate both how postcolonial thought has already illuminated our understanding of the ancient Mediterranean world and beyond as well as its potential for the future Chapters also provide opportunities for reflection on the current state of the discipline An introduction by the volume editors offers a survey of the development of postcolonial theory its relationship to other bodies of theory and its connections to Classics Toward the end of the book three scholars with different career and disciplinary perspectives provide short reflections on the themes of the volume and the directions of future research The Routledge Handbook of Classics Colonialism and Postcolonial Theory offers an impressive collection of current research and thought on the subject for students and scholars in classical studies understood in its larger sense as well as in related disciplines such as Archaeology Ancient History Imperial History and the History of Colonialism Reception Studies and Museum Studies For anyone interested in classical antiquity it provides an engaging introduction to a potentially bewildering but ultimately vital and enriching body of thought and theory **Cemetery Protections in Urban Environments** Ryan M. Seidemann explains current legal and law enforcement realities and discusses how to prevent future damage and development in urban burial grounds Seidemann shows that while legal measures are put in place to honor the dead and uphold the maintenance of burial sites these laws are unevenly enforced and can be ineffective often failing to protect cemeteries important to people who do not have the power to fight developers Offering case studies from his own work in Louisiana Seidemann demonstrates that priorities of urban planning and private property are often emphasized at the expense of local communities Cemetery Protections in Urban Environments illustrates the knowledge and specialization that both archaeology and the legal world contribute to the preservation of burial locations This book provides a concise overview of the legal tools that exist and the tools that are needed to preserve such sites useful for researchers and practitioners in a variety of fields

After Ethics Alejandro Haber, Nick Shepherd, 2014-11-05 While books on archaeological and anthropological ethics have proliferated in recent years few attempt to move beyond a conventional discourse on ethics to consider how a discussion of the social and political implications of archaeological practice might be conceptualized differently The conceptual ideas about ethics posited in this volume make it of interest to readers outside of the discipline in fact to anyone interested in contemporary debates around the possibilities and limitations of a discourse on ethics The authors in this volume set out to do three things The first is to track the historical development of a discussion around ethics in tandem with the development and disciplining of archaeology The second is to examine the meanings consequences and efficacies of a discourse on ethics in contemporary worlds of practice in archaeology The third is to push beyond the language of ethics to consider other ways of framing a set of concerns around rights accountabilities and meanings in relation to practitioners descendent and affected communities sites material cultures the ancestors and so on
