centralized hierarchical organization Recruiting and retention data bear this out Several factors have combined to force the Army to think about the way it develops and nurtures its leaders Yet Vandergriff maintains mere modifications to today's paradigm may not be enough Today's Army has to do more than post rhetoric about adaptability on briefing slides and in literature One cannot divorce the way the Army accesses promotes and selects its leaders from its leadership development model The Army cannot expect to maintain leaders who grasp and practice adaptability if these officers encounter an organization that is neither adaptive nor innovative Instead Army culture must become adaptive and the personnel system must evolve into one that nurtures adaptability in its policies practices and beliefs Only a detailed comprehensive plan where nothing is sacred will pave the way to cultural evolution *Routledge Handbook of the Future of Warfare* Artur Gruszczak, Sebastian Kaempf, 2023-09-19 This handbook provides a comprehensive problem driven and dynamic overview of the future of warfare The volatilities and uncertainties of the global security environment raise timely and important questions about the future of humanity's oldest occupation war This volume addresses these questions through a collection of cutting edge contributions by leading scholars in the field Its overall focus is prognostic rather than futuristic highlighting discernible trends key developments and themes without downplaying the lessons from the past By making the past meet the present in order to envision the future the handbook offers a diversified outlook on the future of warfare which will be indispensable for researchers students and military practitioners alike The volume is divided into six thematic sections Section I draws out general trends in the phenomenon of war and sketches the most significant developments from the past to the present and into the future Section II looks at the areas and domains which actively shape the future of warfare Section III engages with the main theories and conceptions of warfare capturing those attributes of contemporary conflicts which will most likely persist and determine the dynamics and directions of their transformations The fourth section addresses differentiation and complexity in the domain of warfare pointing to those factors which will exert a strong impact on the structure and properties of that domain Section V focuses on technology as the principal trigger of changes and alterations in the essence of warfare The final section draws on the general trends identified in Section I and sheds light on how those trends have manifested in specific local contexts This section zooms in on particular geographies which are seen and anticipated as hotbeds where future warfare will most likely assume its shape and reveal its true colours This book will be of great interest to students of strategic studies defence studies war and technology and International Relations Peace Education Ian M. Harris, 1988 Here is a tool for teachers church leaders community activists and concerned citizens interested in using educational strategies to bring about a peaceful world It presents the goals and key issues of peace education describes the difficulties and obstacles educators are likely to meet and how to overcome them and suggests approaches and programs for different age groups Other information includes religious resources an annotated list of curricular materials an annotated bibliography in several categories and grade levels and a directory of organizations
