Fuzzy Mathematics John N. Mordeson, Premchand S. Nair, 2001-09-07 In the mid 1960 s I had the pleasure of attending a talk by Lotfi Zadeh at which he presented some of his basic and at the time recent work on fuzzy sets Lotfi s algebra of fuzzy subsets of a set struck me as very nice in fact as a graduate student in the mid 1950 s I had suggested similar ideas about continuous truth valued propositional calculus infor and sup for or to my advisor but he didn t go for it and in fact confused it with the foundations of probability theory so I ended up writing a thesis in a more conventional area of mathematics differential algebra I especially enjoyed Lotfi s discussion of fuzzy convexity I remember talking to him about possible ways of extending this work but I didn t pursue this at the time I have elsewhere told the story of how when I saw C L Chang s 1968 paper on fuzzy topological spaces I was impelled to try my hand at fuzzy algebra This led to my 1971 paper Fuzzy groups which became the starting point of an entire literature on fuzzy algebraic structures In 1974 King Sun Fu invited me to speak at a U S Japan seminar on Fuzzy Sets and their Applications which was to be held that summer in Berkeley

Fuzzy Graph Theory with Applications to Human Trafficking John N. Mordeson, Sunil Mathew, Davender S. Malik, 2018-03-14 This book reports on advanced concepts in fuzzy graph theory showing a set of tools that can be successfully applied to understanding and modeling illegal human trafficking Building on the previous book on fuzzy graph by the same authors which set the fundamentals for readers to understand this developing field of research this second book gives a special emphasis to applications of the theory For this authors introduce new concepts such as intuitionistic fuzzy graphs the concept of independence and domination in fuzzy graphs as well as directed fuzzy networks incidence graphs and many more
