**modern architecture 1851-1919; Kenneth Frampton**, 1981      *GA Houses*, 1995      **Architecture and Identity** Chris  
Abel, Norman Foster, 2012-10-02 Instead of tuning the consumer to the machine we can now tune the machine to the  
consumer This edited collection of essays now in its second edition brings together the author's key writings on the cultural  
technological and theoretical developments reshaping Modern architecture into a responsive and diverse movement for the  
twenty first century Chris Abel approaches his subject from a wide range of knowledge including cybernetics philosophy new  
human science and development planning as well as his experience as a teacher and critic on four continents The result is a  
unique global perspective on the changing nature of Modern architecture at the turn of the millennium Including two new  
chapters this revised and expanded second edition offers radical insights into such topics as the impact of information  
technology on customized architecture production the relations between tradition and innovation prospects for a global eco  
culture and the local and global forces shaping the architecture and cities of Asia Chris Abel is an architectural writer and  
educator based in Malta He has taught at major universities in the UK North and South America Southeast Asia and the  
Middle East and is a contributor to numerous international journals and other publications He currently holds visiting  
appointments at the University of Malta and the University of the Philippines      **The extended self** Chris Abel, 2016-10-28  
In this wide ranging study of architecture and cultural evolution the author argues that underlying the global environmental  
crisis is a general resistance to changing personal and social identities shaped by a technology based culture and its energy  
hungry products The book traces the roots of that culture to the coevolution of Homo sapiens and technology from the first  
use of tools as artificial extensions of the human body to the motorised cities spreading around the world whose uncontrolled  
effects are changing the planet itself Advancing a new concept of the meme called the technical meme as the primary agent  
of cognitive extension and technical embodiment the author proposes a theory of the extended self encompassing material  
and spatial as well as psychological and social elements Drawing upon research from philosophy psychology and the  
neurosciences the book presents a new approach to environmental and cultural studies that will appeal to a broad readership  
searching for insights into the crisis      **The Emerging Generation in U.S.A.** Wayne N. T. Fujii, 1987      Building  
Institution Kim Förster, 2024-02-21 Building Institution chronicles the expansion of architecture as a profession and discipline  
in the postmodern era Kim Förster traces the compelling history of the Institute for Architecture and Urban Studies which  
was active in New York from 1967 to 1985 Drawing on extensive archival research and oral histories he constructs a  
collective biography that details the Institute's diverse roles and the dynamic interplay between research and design  
education culture and publishing By exploring the transformation of cultural production into a practice as well as the  
culturalization and global postmodernization of architecture the volume contributes significantly to the institutional history of
