**Gaia's Web** Karen Bakker, 2024-04-16 A riveting exploration of one of the most important dilemmas of our time will digital technology accelerate environmental degradation or could it play a role in ecological regeneration At the uncanny edge of the scientific frontier Gaia's Web explores the promise and pitfalls the Digital Age holds for the future of our planet Instead of the Internet of Things environmental scientist and tech entrepreneur Karen Bakker asks why not consider the Internet of Living Things At the surprising and inspiring confluence of our digital and ecological futures Bakker explores how the tools of the Digital Age could be mobilized to address our most pressing environmental challenges from climate change to biodiversity loss Interspersed with ten elegiac enigmatic parables each of which is based on an existing technology Gaia's Web evokes the conundrums we face as the World Wide Web intertwines with the Web of Life A new generation of innovators is deploying digital technology to come to the aid of the planet using spy satellites to track down environmental criminals inviting animals to the Metaverse and biohacking Frankenstein like biobots as environmental sentinels But will they end up doing more harm than good In an engaging take on conservation technology Bakker looks at the digital tech applications to environmental issues from predatory harvesting of environmental data to human bycatch and eco surveillance capitalism If we address these issues and mobilize digitally mediated forms of citizen science she argues digital tech could help reverse environmental harms and advance environmental sustainability And in the process Big Tech might be transformed for the better With its uniquely broad scope combining insights from computer science ecology engineering environmental science and environmental law Gaia's Web introduces profoundly novel ways of addressing our most pressing environmental challenges mitigating climate change protecting endangered species and creating new possibilities for ecological justice by empowering nonhumans to participate in environmental regulation *Gaia's Awakening: The Avatars of Balance*

Tarakeswar Bhattacharya, 2025-07-03 Gaia The Eternal Mother The Wounded Guardian She was the first breath the ancient heartbeat Gaia Bhumi Devi the sacred mother of all life From Vedic chants to Hellenic verse she is the eternal feminine creator sustainer and sorrowed witness to a world that has forsaken her Her grief whispers in the wind her rage roars in fire Across yugas she has endured But in the twilight of Kali Yuga she rises Not with gods but through us leaders rebels everyday souls daring to restore balance The call echoes through time Will we rise as Gaia's guardians or repeat the sins of the past

**The Ends of the World** Déborah Danowski, Eduardo Viveiros de Castro, 2017-05-23 The end of the world is a seemingly interminable topic at least of course until it happens Environmental catastrophe and planetary apocalypse are subjects of enduring fascination and as ethnographic studies show human cultures have approached them in very different ways Indeed in the face of the growing perception of the dire effects of global warming some of these visions have been given a new lease on life Information and analyses concerning the human causes and the catastrophic consequences of the planetary crisis have been accumulating at an ever increasing rate mobilising popular opinion as well as academic reflection In this book

philosopher D borah Danowski and anthropologist Eduardo Viveiros de Castro offer a bold overview and interpretation of these current discourses on the end of the world reading them as thought experiments on the decline of the West s anthropological adventure that is as attempts though not necessarily intentional ones at inventing a mythology that is adequate to the present This work has important implications for the future development of ecological practices and it will appeal to a broad audience interested in contemporary anthropology philosophy and environmentalism , [Existential Threats](#) Lisa Vox,2017-05-12 Americans have long been enthralled by visions of the apocalypse Will the world end through nuclear war environmental degradation and declining biodiversity Or perhaps through the second coming of Christ rapture of the faithful and arrival of the Antichrist a set of beliefs known as dispensationalist premillennialism These seemingly competing apocalyptic fantasies are not as dissimilar as we might think In fact Lisa Vox argues although these secular and religious visions of the end of the world developed independently they have converged to create the landscape of our current apocalyptic imagination In Existential Threats Vox assembles a wide range of media science fiction movies biblical tractates rapture fiction to develop a critical history of the apocalyptic imagination from the late 1800s to the present Apocalypticism was once solely a religious ideology Vox contends which has secularized in response to increasing technological and political threats to American safety Vox reads texts ranging from Christianity Today articles on ecology and the atomic bomb to Dr Strangelove and from Mary Shelley s The Last Man to the Left Behind series by Tim LaHaye and Jerry B Jenkins demonstrating along the way that conservative evangelicals have not been as resistant to science as popularly believed and that scientists and science writers have unwittingly reproduced evangelical eschatological themes and scenarios in their own works Existential Threats argues that American apocalypticism reflects and propagates our ongoing debates over the authority of science the place of religion uses of technology and America s evolving role in global politics [French Philosophy Today](#) Christopher Watkin,2016-05-03 No detailed description available for French Philosophy Today

Rockefeller,2016-02-18 The ancient Greeks told stories about their gods and these stories were later called myths and became part of Greek mythology Even today myths about ancient Greek gods goddesses and heroes are quite popular In fact many of the products we buy today get their names from Greek mythology The very popular Amazon com got its name from a race of mythical female warriors The ever popular Nike got its name from the goddess of victory That s not all The Titans the Spartans and Trojans are popular sports teams but their names are actually derived from ancient Greek stories There is no single original text in Greek mythology In fact it is known mostly from Greek literature Among the earliest literary sources are Iliad and Odyssey epics written by Homer which date back to 8th century BC The epics talk about the mythical Trojan War was both a divine as well as a human war The epics don t explain the different gods and goddesses but

assume that the readers are already familiar with them A possible contemporary of Homer Hesiod wrote Theogony or the Origin of Gods He mentions the earliest Greek myths in this literary source including the ones about the origin of the gods and the creation of the world He also introduces the myths of Prometheus Pandora and the Five Ages in another book of his which went by the name of Works and Days Basically stories about ancient Greece have actually been picked up from various literary sources and there are so many gods and goddesses so many monsters and heroes and so many places and events to describe that even thousands of pages would probably not be enough to describe all of them In this book we will be discussing some of the most popular figures and events of Greek mythology and we hope you enjoy reading about them as much as everyone who has known these stories for ages

*Staying with the Trouble* Donna J. Haraway, 2016-08-25 In the midst of spiraling ecological devastation multispecies feminist theorist Donna J Haraway offers provocative new ways to reconfigure our relations to the earth and all its inhabitants She eschews referring to our current epoch as the Anthropocene preferring to conceptualize it as what she calls the Chthulucene as it more aptly and fully describes our epoch as one in which the human and nonhuman are inextricably linked in tentacular practices The Chthulucene Haraway explains requires sym poiesis or making with rather than auto poiesis or self making Learning to stay with the trouble of living and dying together on a damaged earth will prove more conducive to the kind of thinking that would provide the means to building more livable futures Theoretically and methodologically driven by the signifier SF string figures science fact science fiction speculative feminism speculative fabulation so far Staying with the Trouble further cements Haraway's reputation as one of the most daring and original thinkers of our time

**Gaia's Wager** Gary C. Bryner, 2001 Can environmentalism evolve into a powerful social movement that transforms human practices in ways that are ecologically sustainable Gary C Bryner contends that it is in our self interest as a species to ensure that environmental movements coalesce in the service of sustainability From the very first Earth Day to the setting of Agenda 21 for the new millennium this book traces the actors the issues and the institutions involved in moving environmentalism from a loose collection of fuzzy groups and goals to a new global force for change Will the next phase of environmental action resemble the WTO protests in Seattle the UN Kyoto Protocols or a Think Tank inside the Washington Beltway Gaia's Wager shows that movements play an important role between political parties and interest groups on the domestic scene and the unruly forces of globalization internationally Only social movements can catalyze a response to the global environmental threat that has a chance of both capturing imaginations and institutionalizing progress toward environmental sustainability Above all Gaia's Wager bets on the confluence of big ideas and social action to yield a more hopeful environmental future
