Gaining Ground Evenkis Land And Reform In Southeastern Siberia:

Gaining Ground? Gail Fondahl, 1998 *Gaining Ground Evenkis Land and Reform in Southeastern Siberia* provides an assessment of how land reform in the Russian Federation is affecting indigenous peoples. Based on fieldwork in thirteen native Evenki villages in Southeastern Siberia, it contrasts the intent of legislation passed in Moscow with the real life experiences of indigenous persons who are trying to gain greater control over their lives and historic homelands. *Gaining Ground* situates the current reforms and their implementation in the historical geography of land alienation experienced by the Evenkis since the coming of the Russians to this part of Siberia. The book offers information on traditional land tenure systems, the persistence of these during various reforms, and the gradual erosion of access to resources which the Evenkis experienced under Soviet rule. It catalogues the hurdles Evenkis face today in trying to realize new opportunities provided by the federal government in terms of gaining rights to land. Part of the Cultural Survival Studies in Ethnicity and Change series, edited by David Maybury Lewis and Theodore Macdonald Jr. of Cultural Survival Inc., Harvard University. Sharply focused on key issues affecting indigenous and ethnic groups worldwide, this series of ethnographies builds on introductory material by going further in depth and allowing students to explore virtually first hand a particular issue and its impact on a culture.

Narrating the Future in Siberia Olga Ulturgasheva, 2012. The wider cultural universe of contemporary Eveny is a specific and revealing subset of post-Soviet society. From an anthropological perspective, the author seeks to reveal not only the Eveny cultural universe but also the universe of the children and adolescents within this universe. The first full-length ethnographic study among the adolescence of Siberian indigenous peoples, it presents the young people's narratives about their own future and shows how they form constructs of time, space, agency, and personhood through the process of growing up and experiencing their social world. The study brings a new perspective to the anthropology of childhood and uncovers a quite unexpected dynamic in narrating and foreshadowing the future while relating it to cultural patterns of prediction and fulfillment in nomadic cosmology. Olga Ulturgasheva is Research Fellow in Social Anthropology at the Scott Polar Research Institute and Clare Hall University of Cambridge. She has carried out fieldwork for a decade in Siberia on childhood, youth, religion, reindeer herding, and hunting, and co-edited *Animism in Rainforest and Tundra: Personhood, Animals, Plants, and Things in Contemporary Amazonia and Siberia* (Berghahn Books, 2012).

Tundra Passages Petra Rethmann, 2010-11-01. A 1990s study on how the indigenous people in the northern Kamchatka peninsula in the Russian Far East experienced, interpreted, and struggled with the changing living conditions of post-Soviet Russia. The book describes how Koriak women and men actively negotiated the manifold historical and social process from tsardom to Soviet state to democracy by protesting, accommodating, and reinterpreting the factors by which their conditions were made and remade. Special emphasis is on how the women in this culture are adjusting and combating their oppressed position in society. Annotation copyrighted by Book News Inc., Portland, OR.

Exploring Sustainable Development Martin Purvis, Alan Grainger, 2013-06-17. Sustainable

development is capturing the attention of planners politicians and business leaders Within the academic sphere its study is increasingly breaching disciplinary boundaries to become a focus of attention for natural and social scientists alike But in studying such a key concept it is vital that there is a clear definition of what it means how it is applied on the ground and the influence it exerts upon people s perceptions of change in the physical environment economic activity and society Exploring Sustainable Development is a major new text which provides a multifaceted introduction to key areas of study in this field examining sustainability at the full range of spatial scales from the local to the global Building on existing theory it demonstrates the unique contributions that thinking geographically about space place and human environment relationships can bring to the analysis of sustainable development This book explores different interpretations of sustainable development in both theory and practice in developed and developing countries and in rural and urban areas It pays particular attention to the local national and international politics of implementation the future of climate and energy the role of business and different conceptions of agricultural sustainability This wide ranging text is ideal for undergraduates and postgraduates in geography environmental science development studies and related social and political sciences

Order and Disorder

Keebet von Benda-Beckmann,Fernanda Pirie,2008-02-01 Disorder and instability are matters of continuing public concern Terrorism as a threat to global order has been added to preoccupations with political unrest deviance and crime Such considerations have prompted the return to the classic anthropological issues of order and disorder Examining order within the political and legal spheres and in contrasting local settings the papers in this volume highlight its complex and contested nature Elaborate displays of order seem necessary to legitimate the institutionalization of violence by military and legal establishments yet violent behaviour can be incorporated into the social order by the development of boundaries rituals and established processes of conflict resolution Order is said to depend upon justice yet injustice legitimates disruptive protest Case studies from Siberia India Indonesia Tibet West Africa Morocco and the Ottoman Empire show that local responses are often inconsistent in their valorization acceptance and condemnation of disorder

Teen Lives around the World

include a description of a typical day in the life of a teen in various countries Students will be able to gain a better understanding of what life is like around the world for their peers and will be able to easily make cross cultural comparisons between different countries

A Fractured North Erich Kasten,Igor Krupnik,Gail Fondahl,2025-03-03 The volumes of the Fractured North series address research collaborations in Siberia and the Russian North that are now at risk or frozen and how partnerships might be restored under the evolving political situation The first two volumes explored ethical and moral dilemmas of continuing collaborative studies in the fractured North and the ramifications of ceasing such collaborations While many scholars have pivoted their attention to other regions others have maintained their focus on the Russian North striving to sustain the circumpolar approach of the past decades Contributions in this third volume deal with how we might move forward despite the many fissures in our field Moving forward includes a variety of approaches adopting new er methodologies for carrying out studies from afar e g netography establishing new connection hubs at Western institutions maintaining already established collaborations via joint meetings on neutral territory and more We anticipate that these volumes together will provide a record of the reflections concerns anguish and inspirations of over fifty social scientists who chose the Russian North as their locus of research We also dearly hope that it will serve as a historic account of a period of fracture that will before long heal

Redefining Shamanisms David Gordon Wilson,2013-01-31 Spiritualism and mediumship are often regarded as the product of lingering superstition in the Victorian era and as having limited relevance in modern Anglo American society Scholarship to date which has considered Spiritualism as a distinct religious tradition has focussed on analysing the phenomenon in terms of spirit possession only This volume analyses the development of shamanism communication with the spiritual world as a concept within North American English speaking scholarship with particular focus on Mircea Eliade s influential cross cultural presentation of shamanism By re examining the work of Sergei Shirokogoroff one of Eliade s principal sources the traditional Evenki shamanic apprenticeship is compared and identified with the new Spiritualist apprenticeship The author demonstrates that Spiritualism is best understood as a traditional shamanism as distinct from contemporary appropriations or neo shamanisms He argues that shamanism is the outcome of an apprenticeship in the management of psychic experiences and which follows the same pattern as that of the apprentice medium In doing so the author offers fresh insights into the mechanisms that are key to sustaining mediumship as a social institution

Power and the People Yulian Konstantinov,2023-09-02 This book discusses state periphery relations from the view point of a reindeer husbandry community in the Russian Far North Murmansk Region The time is the current period of Putin led Russia The analysis is based on the premise that the mode of current top power governance can be described as selective de centralization Below a certain level of state power interests conflicts get resolved in favour of local communities That gains support for the supreme leadership and reproduces a Soviet like reality Termed sovkhoism the latter holds the Soviet state farm sovkhos as creating an ideal socio economic environment When issues are of significant interest to superior

power selection favours cavalier bypassing of people friendly concerns At this level power acts in an authoritarian mode favouring the interests of state power structures in conjunction with the upper tiers of the loyal oligarchate It is shown how this governing mode contains significant potential for escalating centre vs periphery tensions

Forest Dwellers, Forest Protectors Richard Reed, 2015-09-07 The Guarani of Paraguay have survived over four centuries of contact with the commercial system while keeping in tact their traditions of leadership religion and kinship This concise ethnography examines how the Guarani have adapted over time in concert with Paraguay's subtropical forest system New To This Edition Expanded historical background and updated demographic information on the Guarani brings the research to the present day Chapter 1 Expands and strengthens the discussion of sustainability to include more recent advances in the concept Chapter 1 and introduces the idea of subsidy from nature into the discussion of conventional tropical development Chapter 3 Develops the discussion of women's labor in horticulture Chapter 3 Analyzes the effects of indigenous mixed agro forestry in stemming the high rates of Paraguayan deforestation of the 1990s Chapter 4 Discusses the recent globalization of the yerba mate market and the economy's effect on Paraguay's protected areas Chapter 4 Describes Guarani ethnic federations as a means to engage the national and international political institutions Chapter 4 Explores the rapid growth in Guarani population in native communities which results from lower infant mortality more land pressure and more reliable census data Chapter 4 This brief introductory text makes the ideal supplementary text for students of anthropology

Nomadic and Indigenous Spaces Judith Miggelbrink, Joachim Otto Habeck, Nuccio Mazzullo, Peter Koch, 2016-05-06 This volume is devoted to aspects of space that have thus far been largely unexplored How space is perceived and cognised has been discussed from different stances but there are few analyses of nomadic approaches to spatiality Nor is there a sufficient number of studies on indigenous interpretations of space despite the importance of territory and place in definitions of indigeneity At the intersection of geography and anthropology the authors of this volume combine general reflections on spatiality with case studies from the Circumpolar North and other nomadic settings Spatial perceptions and practices have been profoundly transformed by new technologies as well as by new modes of social and political interaction How do these changes play out in the everyday lives identifications and political projects of nomadic and indigenous people This question has been broached from two seemingly divergent stances spatial cognition on the one hand and production of space on the other Bringing these two approaches together this volume re-aligns the different strings of scholarship on spatiality making them applicable and relevant for indigenous and nomadic conceptualizations of space place and territory

Lifestyle and Livelihood Changes Among Formerly Nomadic Peoples A. Allan Degen, Léo-Paul Dana, 2024-02-29 Contemporary policymakers as their predecessors continue to view nomadic people as a weak minority and their way of life and raising livestock as a backward and inefficient paradigm Wherever nomads are not the dominant group the trend to settle them continues even today as in the past This book describes the changes forced upon formerly nomadic groups and how they still attempt to maintain their

traditional social and cultural practices in their new settings The book deals with the several modes of livelihood of these communities including entrepreneurship and demonstrates the impact of investment oriented urbanization policies leading to eviction from ancestral lands and hurdles for nomadic mobility ultimately threatening their survival The book illustrates how some groups like the Borana and the Maasai practice livelihood diversity and raise productive livestock and how other groups migrate to urban centers in search of employment and remit money to family members left in the rural areas The book aims to raise awareness among the research community especially those who work on regional and demographic labor policies It helps in understanding why society needs to help build business and livelihood strategies without harming the values of nomadic groups

The Culture of Russia Emily Sebastian, 2018-07-15 Though current events have brought Russia into the spotlight of late many Americans still have only the haziest notion of Russian culture This wide ranging reference introduces the peoples languages and religions of Russia and also delves into such facets of Russian culture as sports the media holidays traditional foods and education Chapters devoted to architecture the visual arts literature and the performing arts highlight the best of Russia's cultural heritage including the novels of Leo Tolstoy and Fyodor Dostoyevsky the films of Sergey Eisenstein the music of Tchaikovsky and Sergey Prokofiev and the churches of Pskov Readers will find this volume to be a fascinating introduction to a rich complex culture

The Cambridge Encyclopedia of Hunters and Gatherers Richard B. Lee, Richard Heywood Daly, Richard Daly, 1999-12-16 Hunting and gathering is humanity's first and most successful adaptation Until 12 000 years ago all humanity lived this way Surprisingly in an increasingly urbanized and technological world dozens of hunting and gathering societies have persisted and thrive worldwide resilient in the face of change their ancient ways now combined with the trappings of modernity The Encyclopedia is divided into three parts The first contains case studies by leading experts of over fifty hunting and gathering peoples in seven major world regions There is a general introduction and an archaeological overview for each region Part II contains thematic essays on prehistory social life gender music and art health religion and indigenous knowledge The final part surveys the complex histories of hunter gatherers encounters with colonialism and the state and their ongoing struggles for dignity and human rights as part of the worldwide movement of indigenous peoples

In the Way of Development Mario Blaser, Harvey A. Feit, Glenn McRae, 2004 Authored as a result of a remarkable collaboration between indigenous people's own leaders other social activists and scholars from a wide range of disciplines this volume explores what is happening today to indigenous peoples as they are enmeshed almost inevitably in the remorseless expansion of the modern economy and development at the behest of the pressures of the market place and government It is particularly timely given the rise in criticism of free market capitalism generally as well as of development The volume seeks to capture the complex power laden often contradictory features of indigenous agency and relationships It shows how peoples do not just resist or react to the pressures of market and state but also initiate and sustain life projects of their own which embody local history and incorporate plans to improve their social

and economic ways of living The Postsocialist Agrarian Question C. M. Hann, 2003 This is an age of neo liberalism in which the advantages and virtues of private property are often taken for granted Post socialist governments have privatized and broken up state farms and socialist cooperatives However economic outcomes and the social insecurity now experienced by many rural inhabitants highlight the need for a broader anthropological analysis of property relations which go beyond changes of legal form A century after Kautsky addressed The Agrarian Question in Germany it is necessary to address a post socialist Agrarian Question throughout Central and Eastern Europe the former Soviet Union and China The studies collected here derive from the first cycle of projects carried out at the Max Planck Institute for Social Anthropology They are prefaced by a substantial introduction by Chris Hann Chris Hann is Director of the Max Planck Institute for Social Anthropology Halle Saale **Settlers on the Edge** Niobe Thompson, 2009-01-01 Based on extensive research in the Arctic Russian region of Chukotka *Settlers on the Edge* is the first English language account of settler life anywhere in the circumpolar north to appear since Robert Paine's *The White Arctic* 1977 and the first to explore the experiences of Soviet era migrants to the far north Niobe Thompson describes the remarkable transformation of a population once dedicated to establishing colonial power on a northern frontier into a rooted community of locals now resisting a renewed colonial project He also provides unique insights into the future of identity politics in the Arctic the role of resource capital and the oligarchs in the Russian provinces and the fundamental human questions of belonging and transience The Integration Imperative Michael P. Gillingham, Greg R. Halseth, Chris J. Johnson, Margot W. Parkes, 2016-04-05 The purpose of this work is to develop a better understanding and thinking about the cumulative impacts of multiple natural resource development projects Cumulative impacts are now one of the most pressing but complex challenges facing governments industry communities and conservation and natural resource professionals There has been technical and policy research exploring how cumulative environmental impacts can be assessed and managed These studies however have failed to consider the necessary integration of community environment and health Informed by knowledge and experience in northern British Columbia this book seeks to expand our understanding of the cumulative impacts of natural resource development through an integrated lens The book offers a timely response to a growing imperative proposing integrative response to multiple natural resource developments in a way that addresses converging environment community and health issues Informed by the editors' experiences across several complementary areas of expertise we envision this book as appealing to a wide range of researchers educators and practitioners with relevance to a growing audience with appetite for and interest in integrative approaches **Meanings and Values of Water in Russian Culture** Jane Costlow, Arja Rosenholm, 2016-11-25 Bringing together a team of scholars from the diverse fields of geography literary studies and history this is the first volume to study water as a cultural phenomenon within the Russian Soviet context Water in this context is both a cognitive and cultural construct and a geographical and physical phenomenon representing particular rivers the Volga the Chusovaia in the Urals

the Neva and bodies of water from Baikal to sacred springs and the flowing water of nineteenth century estates but also powerful systems of meaning from traditional cultures and those forged in the radical restructuring undertaken in the 1930s Individual chapters explore the polyvalence and contestation of meanings dimensions and values given to water in various times and spaces in Russian history The reservoir of symbolic association is tapped by poets and film makers but also by policy makers the popular press and advertisers seeking to incite reaction or drive sales The volume s emphasis on the cultural dimensions of water will link material that is often widely disparate in time and space it will also serve as the methodological framework for the analysis undertaken both within chapters and in the editors introduction
