stands to benefit every bit as much as the operators thanks largely to the Web3 construct of necessitating distributed consumer ownership of assets. Simpler put when you own a piece of the action it's easier to win. Now combine that with the fact these new platforms are populated with unskilled players many of whom are there for metaverse experiences play to earn tokenomics including being staked or pure digital asset speculation and you have a formula for the best stocked fish pond since the early days of online poker. In fact there has never been anything like this because a widely fluctuating secondary market for digital asset trading is also tied in. Drew Kasch's latest book will prep you for being a shark ready to feed in the new pond. Whether you are already a probability game sharpie and just need acclimation to Web3 tokenomics or are active in crypto communities but lack solid iGaming strategies or even if you need both the following pages will equip you for mining your share of the next great internet gold rush which is just now ramping up to speed.
