**Popular Music, Critique and Manic Street Preachers** Mathijs Peters, 2020-07-29 This book explores the ways in which popular music can criticise political social and economic structures through the lens of alternate rock band Manic Street Preachers Unlike most recent work on popular music Peters concentrates largely on lyrical content to defend the provocative claim that the Welsh band pushes the critical message shaped in their lyrics to the forefront Their music this suggests along with sleeve art body art video clips clothes interviews and performances serves to emphasise this critical message and the primary role played by the band s lyrics Blending the disciplines of popular music studies culture studies and philosophy Peters confronts the ideas of German philosopher and social critic Theodor W Adorno with the entire catalogue of Manic Street Preachers from their 1988 single Suicide Alley to their 2018 album Resistance is Futile Although Adorno argues that popular music is unable to resist the standardising machinery of consumption culture Peters paradoxically uses his ideas to show that Manic Street Preachers releases shape critical models with which to formulate social and political critique This notion of the critical model enables Peters to argue that the catalogue of Manic Street Preachers critically addresses a wide range of themes from totalitarianism to Holocaust representation postmodern temporality to Europeanism and from Nietzsche s ideas about self overcoming to reflections on digimodernism and post truth politics The book therefore persuasively shows that Manic Street Preacher lyrics constitute an intertextual network of links between diverse cultural and political phenomena encouraging listeners to critically reflect on the structures that shape our lives

**From Revolutionary Cadres to Party Technocrats in Socialist China** Hong Yung Lee, 2024-07-26 Using a wide variety of previously unavailable sources Hong Yung Lee offers a theoretical and historical perspective on China s ruling elite examining their politics and the bureaucratic system in which they participate He traces the evolution of these cadres from the guerrilla fighters who first joined the communist movement and founded the new regime in 1949 to the technocratic specialists who wield power today In the revolution communist leaders built a peasant based party organization whose members were largely recruited from uneducated poor peasants and hired laborers Even after they became the founders of a new regime their rural orientation and revolutionary experiences continued to affect the political process Lee shows how the requirements of modernization compelled the state to replace the revolutionary cadres with bureaucratic technocrats Selected from the postliberation generation the new leaders are more

committed to problem solving than to socialism Despite uncertainties in the immediate future this elite transformation signifies an end to modern China's revolutionary era Lee argues that it seems only a matter of time before China will have a bureaucratic authoritarian regime led by technocrats possessing a managerial perspective and a pragmatic economic orientation This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1991
