Forthcoming Books Rose Arny, 2003-04 The Publishers Weekly, 2002 **The Routledge Companion to Transnational Web Archive Studies** Susan Aasman, Anat Ben-David, Niels Brügger, 2024-12-30 The Routledge Companion to Transnational Web Archive Studies explores the untapped potential of web archives for researching transnational digital history and communication. It covers cross border cross collection and cross institutional examination of web archives on a global scale. This comprehensive collaborative work emerging from the WARCnet research network presents an exploration of the ways web archive research can transcend technological and legal challenges to allow for new comparative transnational studies of the web's pasts and of global events. By combining interdisciplinary work and fostering collaboration between web archivists and researchers, the book provides readers with cutting edge approaches to analyzing digital cultural heritage across countries. The book contains concrete examples on how to research national web domains through a transnational perspective, provides case studies with grounded explorations of the COVID 19 crisis as a distinctly transnational event captured by web archives, offers methodological considerations while unpacking techniques and skill sets for conducting transnational web archive research and critically engages the politics and power dynamics inherent to web archives as institutionalised collections. The Routledge Companion to Transnational Web Archive Studies is an essential read for graduate students and scholars from internet and media studies, cultural studies, history and digital humanities. It will also appeal to web archiving practitioners including librarians, web curators and IT developers.

Creativity and Innovation in the Fashion Business Helen Goworek, Fiona Bailey, 2024-10-11 Creativity and Innovation in the Fashion Business explores the ways in which creativity and innovation play a central role across the fashion industry, paying particular attention to design and technical perspectives. This topic is examined through careful theoretical analysis incorporating the perspectives of multiple contributors who together possess a wealth of combined experience in creative and technical roles in the fashion business. Broad in scope, this textbook first provides a wide overview of creativity and innovative developments across the industry, before considering technical and digital innovation in production and product development as well as trend forecasting. The final part of the book then consists of an exploration of sustainable innovation in design for fashion brands and retailers. Each chapter includes aims and summaries to structure learning and highlight key points, academic insights from thought leaders and interviews from industry and academia. A vital introductory textbook, Creativity and Innovation in the Fashion Industry is well suited to undergraduate and postgraduate modules across subjects such as Fashion Business, Fashion Design and Manufacturing, Product Development, Innovation Management and Buying and Merchandising. Online resources include PowerPoint slides and a test bank.

Avalöök Katrin Kivimaa, 2004 Children's Mobilities Lesley Murray, Susana Cortés-Morales, 2019-05-04 This book offers a critical and comprehensive analysis of children's mobilities by focusing on its interdependent imagined and relational aspects. In doing so, it challenges existing literature which in mobilities studies tends to overlook the mobilities of marginalised social groups. In social science more generally, tends to immobilize children's studies and in children's mobility studies has mainly focused on the independent and corporeal travel of children. The book situates children's mobilities in wider contexts, offering an interdisciplinary and critical perspective throughout and drawing on scholarship at the confluence of childhood and mobilities and a range of research to offer new insights that inform the field of mobilities and studies of childhood. In this way, the book aims at widening the perspective on children's mobility towards the inclusion of diverse age groups and of the manifold forms of mobilities that are part of children's lives from an interdependent and relational point of view.

Dot-Com Design Megan Sapnar Ankerson, 2018-07-24 From dial up to wi fi an engaging cultural history of the commercial web industry. In the 1990s the World Wide Web helped transform the Internet from the domain of computer scientists to a playground for mass audiences. As URLs leapt off computer screens and onto cereal boxes, billboards and film trailers, the web changed the way many Americans experienced media, socialized and interacted with brands. Businesses rushed online to set up corporate home pages and as a result a new cultural industry was born: web design. For today's internet users who are more familiar sharing social media posts than collecting hotlists of cool sites, the early web may seem primitive, clunky and graphically inferior. After the dot-com bubble burst in 2000, this pre-crash era was dubbed Web 1.0, a retronym meant to distinguish the early web from the social user-centered and participatory values that were embodied in the internet industry's resurgence as Web 2.0 in the 21st century. Tracking shifts in the rules of good web design, Ankerson reimagines speculation and design as a series of contests and collaborations to conceive the boundaries of a new digitally networked future. What was it like to go online and surf the Web in the 1990s? How and why did the look and feel of the web change over time? How do new design paradigms like user experience design, UX, gain traction? Bringing together media studies, internet studies and design theory, *Dot-com Design* traces the shifts in and struggles over the web's production, aesthetics and design to provide a comprehensive look at the evolution of the web industry and into the vast internet we browse today.

A John Heskett Reader John Heskett, 2017-11-02 *A John Heskett Reader* brings together a selection of the celebrated design historian John Heskett's key works introduced and edited by Clive Dilnot of Parsons The New School USA. Heskett, who passed away in early 2014, was a pioneering British-born writer and lecturer. His research was foundational for the study of industrial design and his research into the relationship between design, policy and economic value is still a regular reference point for academics and students alike. This anthology represents well the great range of his work covering such varied topics as the growth of Japanese industrialism, modernism in the Third Reich and 1980s corporate design.

management Including both hard to access and previously unpublished material like Crafts Commerce and Industry and Economic Value of Design the book demonstrates Heskett s passionate interest in exploring the relationship of design and making with economic value across the entirety of human history Featured texts include What is Design Chinese Design what can we learn from the past The American System and Mass Production The Industrial Applications of Tubular Steel Creative Destruction the nature and consequences of change through design Reflections on Design and Hong Kong besides many others
