## **Installexe Jodi:**

**INSTALL.EXE-JODI.** Christoph Merian, 2002      **Unstable Aesthetics** Eddie Lohmeyer, 2021-01-28 Throughout the 1990s artists experimented with game engine technologies to disrupt our habitual relationships to video games. They hacked, glitched, and dismantled popular first person shooters such as Doom 1993 and Quake 1996 to engage players in new kinds of embodied activity. In *Unstable Aesthetics: Game Engines and the Strangeness of Art Modding*, Eddie Lohmeyer investigates historical episodes of art modding practices: the alteration of a game system's existing code or hardware to generate abstract spaces situated around a recent archaeology of the game engine software for rendering two and three dimensional gameworlds. The contemporary artists highlighted throughout this book—Cory Arcangel, JODI, Julian Oliver, Krista Hoefle, and Brent Watanabe, among others—were attracted to the architectures of engines because they allowed them to explore vital relationships among abstraction, technology, and the body. Artists employed a range of modding techniques: hacking the ROM chips on Nintendo cartridges to produce experimental video; deconstructing source code to generate psychedelic glitch patterns; and collaging together surreal gameworlds to intentionally dissect the engine's operations and unveil illusions of movement within algorithmic spaces. Through key moments in game engine history, Lohmeyer formulates a rich phenomenology of video games by focusing on the liminal spaces of interaction among system and body, or rather the strangeness of art modding.

**Confronting the Machine** Boris Magrini, 2017-03-20 Artists who work with new media generally adopt a critical media approach in contrast to artists who work with traditional art media. Where does the difference lie between media artists and artists who produce modern art? Which key art objects illustrate this trend? The author investigates the relationship between art and technology on the basis of work produced by Edward Ihnatowicz and Harald Cohen, and on the basis of the pioneering computer art exhibition at *Dokumenta X* in 1997. His line of argument counters the generally held view that computer art straddles the gap between art and technology. Instead, he is seeking a genuine interpretation of the origin of media art and to develop new perspectives for it.

**Tactical Publishing** Alessandro Ludovico, 2024-12-17 How to level up to the next transformative phase of publishing with a critical methodology that transcends the dichotomy of paper and digital media production. Publishing is experiencing one of the most transformative phases in its history. In *Tactical Publishing*, a sequel to *Post-Digital Print*, Alessandro Ludovico explores the forces driving this historical phase, highlighting the tremendous opportunities it presents. Our task, he believes, is to develop an alternative publishing system that transcends the dichotomy between paper and digital media. He focuses first on the two activities on which publishing is premised: reading and writing, with an emphasis on writing machines and post-truth in the latter, and then deconstructs the concept, proposing alternative strategies inspired by recent practices and unconventional uses of technology. Ludovico shows how the radical and strategic use of print in the past can serve as the basis for our transition to the next phase of publishing. He argues that the new ecology of publishing should be based on three main elements: the stimulation of

our senses the role of software in forming the publishing infrastructure and the importance of archives During this transition from the current post digital phase to the next phase independent publishers and artists as well as readers and machines will enable new structures and actions that realize the potential of publishing and the preservation of content thereby enriching social practices The author also considers the crucial social role played by new forms of libraries as artists and publishers shape the coming publishing world in its various manifestations Combining analytical accounts of tactical strategies with examples from artworks and experimental practices the book concludes with a manifesto for publishing in the twenty first century and an appendix with a selection of one hundred publications representing the periodic table of future publishing
