*Moving Beyond the Crisis : Reclaiming and Reaffirming our Common Administrative Space* Demetrios Argyriades, Gérard Timsit, 2013-03-14 With the financial meltdown and the economic crisis in their fifth year already no one can any longer be in doubt about their exceptional gravity their truly global impact and their profound effects hurting vulnerable groups and the very poor especially As the world looks for an exit from this economic crisis the worst in eight decades the focus of attention is naturally on the causes the factors that account for its wide reach and severity as well as on strategies that might bring it to a closure The quest for exit strategies is at the very centre of the issues and concerns explored in the present volume produced by the IIAS Like the preceding volumes but even more emphatically this volume representing a collective endeavour of scholars and practitioners from many parts of the globe finds cause to lay the blame for our difficult predicament on the institutional deficit the policies the practices and values that have followed in the trail of a highly misleading and erroneous model of governance The Market Model of Governance as it is known sought to reform the structures and culture of administration and government in private sector ways While instrumental values like efficiency and effectiveness were raised and praised profusely those of democratic governance were discounted by comparison In particular integrity the rule of law and due process equity legality and public service professionalism suffered a steep decline in several parts of the world Likewise the invasion and the capture of public space inevitably led to an unprecedented surge of greed abuse and corruption that contributed directly to the crisis which is upon us Looking for exit strategies as its title aptly suggests the present volume offers a rich menu of ideas drawn from the current experience of all the world's main regions Not surprisingly two concepts stand out throughout the book as necessary correctives as well as pressing remedies to the world's ongoing malaise They call for the recapture of our common administrative space and the reaffirmation of the values and virtues appropriate for democratic governance To the IIAS none perhaps are more important than public service professionalism and none other can contribute more effectively to the reform and consolidation of sound institutions for national sub national global and regional governance For these reasons at this juncture the new volume like the others should be featured in every public library and become a vademecum of all scholars and practitioners of public administration

Hurni,2018-10-26 Intellectual traditions are commonly regarded as cultural variations historical legacies or path dependencies By analyzing road junctions between different traditions of Public Administration this book contests the dominant perspective of path dependent national silos and highlights the ways in which they are hybrid and open to exogenous ideas Analyzing the hybridity of administrative traditions from an historical perspective this book provides a new approach to the history of Public Administration as a scientific discipline Original and interdisciplinary chapters address the question of how scholars from the U S Germany and France mutually influenced each other from the closing years of the 19th Century up until the neo liberal turn of the 1970s Offering a thorough analysis of the transatlantic history of Public Administration the conclusion argues that it is vital to learn from the past in order to make Public Administration more realistic in theory as well as more successful in practice Advanced undergraduate and postgraduate political science scholars will find this to be a valuable tool in understanding the foundations of transatlantic Public Administration This book will also greatly benefit researchers on comparative and transnational history with a keen interest in Public Administration

**From the "Democratic Deficit" to a "Democratic Surplus"** Athanasios Psygkas,2017-10-17 Challenging the conventional narrative that the European Union suffers from a democratic deficit Athanasios Psygkas argues that EU mandates have enhanced the democratic accountability of national regulatory agencies This is because EU law has created entry points for stakeholder participation in the operation of national regulators these avenues for public participation were formerly either not open or not institutionalized to this degree By focusing on how the EU formally adopted procedural mandates to advance the substantive goal of creating an internal market in electronic communications Psygkas demonstrates that EU requirements have had significant implications for the nature of administrative governance in the member states Drawing on theoretical arguments in favor of decentralization traditionally applied to substantive policy making this book provides insight into regulatory processes to show how the decentralized EU structure may transform national regulatory authorities into individual loci of experimentation that might in turn develop innovative results It thus contributes to debates about federalism governance and public policy as well as about deliberative and participatory democracy in the United States and Europe This book informs current understandings of regulatory agency operations and institutional design by drawing on an original dataset of public consultations and interviews with agency officials industry and consumer group representatives in

Paris Athens Brussels and London The on the ground original research provides a strong foundation for the directions the case law could take and small and larger scale institutional reforms that balance the goals of democracy accountability and efficiency

Bills of Rights in the Common Law Robert Leckey, 2015-05-05 Scholars have addressed at length the what of judicial review under a bill of rights scrutinizing legislation and striking it down but neglected the how Adopting an internal legal perspective Robert Leckey addresses that gap by reporting on the processes and activities of judges of the highest courts of Canada South Africa and the United Kingdom as they apply their relatively new bills of rights Rejecting the tendency to view rights adjudication as novel and unique he connects it to the tradition of judging and judicial review in the Commonwealth and identifies respects in which judges activities in rights cases genuinely are novel and problematic Highlighting inventiveness in rights adjudication including creative remedies and guidance to legislative drafters he challenges classifications of review as strong or weak Disputing claims that it is modest and dialogic he also argues that remedial discretion denies justice to individuals and undermines constitutional supremacy
