Future Of The Peace Movements:

European Peace Movements and the Future of the Western Alliance Walter Laqueur, 2017-09-08 This extraordinary compendium concerns the future of the Western alliance and the development of the peace movements in Europe and in the United States The peace movement is an old phenomenon given new life by NATO decisions concerning nuclear deployment in Europe and the Soviet responses along the same lines After a long postwar marriage Europeans and Americans alike are reexamining the premises of the Western alliance The contributors provide a variety of scenarios extending from the maintenance of the status quo to the complete dismantling of the Western alliance or at least of its NATO component In a context of rapid change and new challenges to the democratic bloc the editors and authors argue for higher levels of economic integration and caution that competition might spill over into political collapse The work deals with thorny security issues in a frank and policy oriented way While each contributor expresses a unique standpoint a surprising consensus emerges The need for democratic nations to move toward a higher policy ground in order to preserve the fundamental alliance that led to the postwar consensus to begin with Some contributors feel this is still possible others that the time has passed and that national rather than regional interests will once more prevail The work contains an extraordinary array of talent from both the American and European perspectives Among the major contributors and their themes are Henry Kissinger on A Plan to Reshape NATO William G Hyland on The European Peace Movement and NATO Irving Kristol on What s Wrong with NATO Theodore Draper on The Western Misalliance Niels Haagerup on The Nordic Peace Movements Martin Ceadel on The British Nuclear Disarmers and Jeffrey Herf on The SPD and the Peace Movement in West Germany This is a well integrated text with no random essays **Towards a Future European Peace Order?**

Stephen K. Badzik, Josef B. Binter, Karl E. Birnbaum, 2016-07-27 Towards a Future European Peace Order explores the prospects for an international peace process emerging in the aftermath of the Cold War Inspired by the basically peaceful revolutions of 1989 in Eastern Europe fourteen contributors from both East and West present their views and visions for a continent undergoing rapid transformation on the eve of the twenty first century Their perspectives are based on analyses of the underlying political historical societal psychological strategic and economic preconditions for a European peace order

Future Peace Robert H. Latiff, 2022-03-01 Future Peace urges extreme caution in the adoption of new weapons technology and is an impassioned plea for peace from an individual who spent decades preparing for war Today s militaries are increasingly reliant on highly networked autonomous systems artificial intelligence and advanced weapons that were previously the domain of science fiction writers In a world where these complex technologies clash with escalating international tensions what can we do to decrease the chances of war In Future Peace the eagerly awaited sequel to Future War Robert H Latiff questions our overreliance on technology and examines the pressure cooker scenario created by the growing animosity between the United States and its adversaries our globally deployed and thinly stretched military the

capacity for advanced technology to catalyze violence and the American public's lack of familiarity with these topics. Future Peace describes the many provocations to violence and how technologies are abetting those urges and it explores what can be done to mitigate not only dangerous human behaviors but also dangerous technical behaviors. Latiff concludes that peace is possible but will require intense cooperative efforts on the part of technologists, military leaders, diplomats, politicians, and citizens. Future Peace amplifies some well-known ideas about how to address the issues and provides far, mid, and short-term recommendations for actions that are necessary to reverse the apparent headlong rush into conflict. This compelling and timely book will captivate general readers, students, and scholars of global affairs, international security, arms control, and military ethics.

The Future of the International Legal Order, Volume 4 Cyril E. Black, Richard A. Falk, 2015-03-08. The issues of conflict management treated in this volume are relatively recent consequences of the scientific and technological revolution and are in significant respects unprecedented in man's history: food distribution, population, ocean resources, air and water pollution. Such new global problems cannot be adequately solved except by international effort, effort that requires adjustments in the present international system. What adjustments are practicable and at least minimally necessary are assessed by seventeen lawyers and specialists in international affairs. They approach the subject from two perspectives: the international legal aspects of man in his environment and the institutions, agencies, and movements that must be further adapted to the rapidly changing needs of mankind. Contributors: Harold Lasswell, Mary Ellen Caldwell, Dennis Livingston, Howard J. and Rita F. Taubenfeld, L. F. E. Goldie, Leon Gordenker, John Carey, Hans Baade, Gidon Gotlieb, Richard B. Lillich, Joseph Nye, Donald McNemar, James Patrick Sewell, Gerald F. Sumida, Harold and Margaret Sprout. Originally published in 1972. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. As peace activists have faced increased government repression and accusations of being unpatriotic since 9/11, Toussaint examines how current attempts to control dissent impact the peace movement. This study offers an analysis of self-identified peace activists in terms of their demographic characteristics, motivation for activism, political opportunities, and views of the peace movement. It also discusses the processes involved in successfully mobilizing an increasingly diverse constituency and how broad-based support can be sustained beyond reacting to crises.
