Future Perspectives of 2nd Generation Biofuels Rainer Zah, 2010 Fossil independence and substantial reductions in CO2 emissions seem to be possible with 2nd generation biofuels New technologies allow a full carbon to fuel

conversion of non edible plant parts such as straw or wood and the cultivation of algae or salt resistant plants uncouples bioenergy from food production Nevertheless impacts on biodiversity global land and water use are widely unclear and their competitiveness with 1st generation biofuels and electric mobility is an open question An interdisciplinary team of Empa University of Zurich and the Institute of Climate Environment and Energy in Wuppertal evaluated the most sustainable production techniques and assessed their potential for our future mobility Zielpublikum Energie und Umweltfachleute Entwicklungsingenieure Klima Energiebeauftragte Behörden Politiker *Conference on Future Automotive Technology* Markus Lienkamp, 2012-12-09 The increasing trend towards electric cars leads to several challenges for the automobile industry research institutes and politics as well as for the society Research and serial development move closer together to meet automotive standards with new components like traction batteries integrated into hybrid and electrical drivetrains Furthermore the influence of e mobility on the daily mobility behavior the effects on the automotive supply chain and the impact on industrial production have to be taken into account According to these complex aspects it is crucial to not only acquire specific knowledge in the particular fields but also to consider their functional interaction Therefore it seems essential to merge competence from science economy and politics This year the annual Conference on Future Automotive Technology as the follow up of the 2 Automobiltechnisches Kolloquium München focuses on the economical realization of widespread automotive electromobility **Future Autonomous Road Vehicles** Joseph Giacomin, 2024-05-10 This book provides a comprehensive overview of the past present and future of autonomous road vehicles for professionals and students Split into three parts the first section of the book brings together the key historical developments in autonomous road vehicle design and the primary explorations of the design possibilities from science fiction This historical analysis draws upon significant test vehicles from history and explores their roles as landmarks in the evolution of the field In addition it also reviews the history of science fiction and outlines the key speculations about autonomous road vehicles which emerged from that world In the second section of the book Joseph Giacomin introduces five of the most popular future facing speculative approaches used by designers In doing so he identifies the major user facing challenges which affect ideation product design service design and business modelling In the final part science fiction prototyping is identified as the speculative approach best suited to autonomous road vehicle application Connecting theory with practice Giacomin provides examples of sixteen science fiction prototypes which cover a comprehensive range of physical psychological sociological and ethical design challenges Written as an accessible guide for design practitioners and students this book will be of use to those interested in the psychological sociological and ethical factors involved in automotive design human centred design industrial design and technology **Future Automotive Fuels** Joseph Colucci, 2013-03-09 In October 1975 while the United States was still acutely feeling the aftermath of the 1973 Arab Oil Embargo the General Motors Research Laboratories held its nineteenth annual symposium The proceedings of this timely symposium on Future Automotive Fuels Prospects Performance and

Perspective are reported in this book We hope that it will serve not only as a permanent record of the papers and discussions but also as a stimulus and inspiration for ideas research and development in the vital field of automotive fuels The economy of the United States and the lifestyle of her people are woven together with energy into a unique fabric Reducing the energy content of this fabric weakens it and can even destroy it The Oil Embargo stunningly demonstrated how easy it is to attack this fabric and exposed for all to see its greatest weakness reliance on imported petroleum Since petroleum is the only current source of automotive fuels and cars and trucks consume about 43 percent of the petroleum used in the United States the Oil Embargo had its most profound and dramatic on automotive transportation First there were long lines at service stations impact and then idle lines in car assembly plants and long lines at unemployment offices Against this grim setting we planned the symposium on automotive fuels for the future
