Fuzzy Sets and Systems - IFSA 2003 Taner Bilgic, Bernard De Baets, Okays Kaynak, 2003-08-03 The refereed proceedings of the 10th International Fuzzy Systems Association World Congress IFSA 2003 held in June July 2003 in Istanbul Turkey The 84 papers presented together with 5 invited papers were carefully reviewed and selected from 318 submissions The papers address all current issues in the area and present the state of the art in fuzzy sets fuzzy systems and fuzzy logic and their applications in a broad variety of fields The papers are divided in four parts on mathematical issues methodological issues application areas and cross disciplinary issues Fuzzy Stochastic Multiobjective Programming Masatoshi Sakawa, Ichiro Nishizaki, Hideki Katagiri, 2011-02-03 Although studies on multiobjective mathematical programming under uncertainty have been accumulated and several books on multiobjective mathematical programming under uncertainty have been published e g Stancu Minasian 1984 Slowinski and Teghem 1990 Sakawa 1993 Lai and Hwang 1994 Sakawa 2000 there seems to be no book which concerns both randomness of events related to environments and fuzziness of human judgments simultaneously in multiobjective decision making problems In this book the authors are concerned with introducing the latest advances in the field of multiobjective optimization under both fuzziness and randomness on the basis of the authors continuing research works Special stress is placed on interactive decision making aspects of fuzzy stochastic multiobjective programming for human centered systems under uncertainty in most realistic situations when dealing with both fuzziness and randomness Organization of each chapter is briefly summarized as follows Chapter 2 is devoted to mathematical preliminaries which will be used throughout the remainder of the book Starting with basic notions and methods of multiobjective programming interactive fuzzy multiobjective programming as well as fuzzy multiobjective programming is outlined In Chapter 3 by considering the imprecision of decision maker s DM s judgment for stochastic objective functions and or constraints in multiobjective problems fuzzy multiobjective stochastic programming is developed In Chapter 4 through the consideration of not only the randomness of parameters involved in objective functions and or constraints but also the experts ambiguous understanding of the realized values of the random parameters multiobjective programming problems with fuzzy random variables are formulated In Chapter 5 for resolving conflict of decision making problems in hierarchical managerial or public organizations where there exist two DMs who have different priorities in making decisions two level programming problems are discussed Finally Chapter 6 outlines some future research directions Ferroelectrics Indrani Coondoo, 2010-12-14 Ferroelectric materials exhibit a wide spectrum of functional properties including switchable polarization piezoelectricity high non linear optical activity pyroelectricity and non linear dielectric behaviour These properties are crucial for application in electronic devices such as sensors microactuators infrared detectors microwave phase filters and non volatile memories This unique combination of properties of ferroelectric materials has attracted researchers and engineers for a long time This book reviews a wide range of diverse topics related to the phenomenon of ferroelectricity in the bulk as well as thin film form

and provides a forum for scientists engineers and students working in this field The present book containing 24 chapters is a result of contributions of experts from international scientific community working in different aspects of ferroelectricity related to experimental and theoretical work aimed at the understanding of ferroelectricity and their utilization in devices It provides an up to date insightful coverage to the recent advances in the synthesis characterization functional properties and potential device applications in specialized areas

Fuzzy Transforms for Image Processing and Data Analysis Ferdinando Di Martino,Salvatore Sessa,2020-04-22 This book analyzes techniques that use the direct and inverse fuzzy transform for image processing and data analysis The book is divided into two parts the first of which describes methods and techniques that use the bi dimensional fuzzy transform method in image analysis In turn the second describes approaches that use the multidimensional fuzzy transform method in data analysis An F transform in one variable is defined as an operator which transforms a continuous function f on the real interval a b in an n dimensional vector by using n assigned fuzzy sets A_1 A_n which constitute a fuzzy partition of a b Then an inverse F transform is defined in order to convert the n dimensional vector output in a continuous function that equals f up to an arbitrary quantity We may limit this concept to the finite case by defining the discrete F transform of a function f in one variable even if it is not known a priori A simple extension of this concept to functions in two variables allows it to be used for the coding decoding and processing of images Moreover an extended version with multidimensional functions can be used to address a host of topics in data analysis including the analysis of large and very large datasets Over the past decade many researchers have proposed applications of fuzzy transform techniques for various image processing topics such as image coding decoding image reduction image segmentation image watermarking and image fusion and for such data analysis problems as regression analysis classification association rule extraction time series analysis forecasting and spatial data analysis The robustness ease of use and low computational complexity of fuzzy transforms make them a powerful fuzzy approximation tool suitable for many computer science applications This book presents methods and techniques based on the use of fuzzy transforms in various applications of image processing and data analysis including image segmentation image tamper detection forecasting and classification highlighting the benefits they offer compared with traditional methods Emphasis is placed on applications of fuzzy transforms to innovative problems such as massive data mining and image and video security in social networks based on the application of advanced fragile watermarking systems This book is aimed at researchers students computer scientists and IT developers to acquire the knowledge and skills necessary to apply and implement fuzzy transforms based techniques in image and data analysis applications
