love Yet gambling poses serious risks to individuals and to society as a whole Neil Isaacs sports historian licensed clinical social worker English professor and a gambler himself for more than fifty years seeks to shatter the myths interfering with our understanding of gambling addiction its causes and its treatment He begins by systematically debunking several commonly held beliefs demonstrating that there is no such thing as the law of averages that gambling is not inherently sinful immoral or criminal and that money is not always the prime motivator for gamblers Isaacs shows how habitual gambling can lead to compulsive gambling but avoids oversimplifying this condition Arguing against a undifferentiated interpretation of pathological gambling as a simple impulse control disorder he draws examples from fiction film and his own practice to demonstrate additional ways gambling can be abused A radical departure from established views *You Bet Your Life* identifies the costs in dollars people families and credit ratings of society s failure to address adequately the burdens of gambling

**Gambling and Speculation** Reuven Brenner, Gabrielle A. Brenner, 1990-03-30 *Gambling and Speculation* takes the long historic perspective of its controversial subject The book offers not only a better understanding of the recent gambling craze but also a fundamental inquiry into human nature and the structure of societies The Brenners argue that the negative image of gamblers and of speculators stems from prejudice whose roots are in the distant forgotten past Legal scholars have frequently confused gambling with speculation and the anti gambling laws were at times erroneously interpreted as implying the prohibitions of contracts in futures and insurance markets One consequence of all this confusion was that during this century both in the United States and England the legislation and law on betting and gambling became ambiguous The authors touch on this issue and make policy recommendations to abolish restrictions on the industry diminish the states role in selling lotteries and at the same time make legal distinctions capable of helping the tiny percentage of players who might be addicted The Brenners recommendations on gambling are based on their conclusion that gamblers are neither mentally ill nor criminals and that gambling does not lead its practitioners to poverty Rather it is the other way around some of the poor and the frustrated gamble Looking at gambling in this way leads to questions about the nature of society What do the fortunate do for those who are not What is society s obligation to people who fall behind in the game of life Answers to these questions require a discussion on the principles of equality capitalism the role of religious influence on society topics that the Brenners have discussed in their previous studies and they do so here too putting gambling within its proper historical context

*The Routledge International Handbook of Goffman Studies* Michael Hviid Jacobsen, Greg Smith, 2022-06-29 This book explores the fertility and enigma of

Erving Goffman's sociological reasoning and its capacity to shed fresh light on the fundamental features of human sociality. Thematically arranged, it brings together the work of leading scholars of Goffman's work to explore the concepts and themes that define Goffman's analytical preoccupations, examining the ways these ideas have shaped significant fields of study and situating Goffman's sociology in comparison to some eminent thinkers often linked with his name. Through a series of chapters informed by the same inventive and imaginative spirit characteristic of Goffman's sociology, the book presents fresh perspectives on his contribution to the field and reveals the value of his thought for a variety of disciplines now increasingly aware of the importance of Goffman's sociology to a range of social phenomena. A fresh perspective on the legacy of one of sociology's most important figures. The Routledge International Handbook of Goffman Studies will appeal to scholars across the social sciences with interests in interactionist and micro-sociological perspectives.

**Football, Gambling, and Everyday Life in Zimbabwe** Manase Kudzai Chiweshe, 2023-10-27 As unemployment soared in Zimbabwe in the early twenty-first century, betting on football (soccer) emerged as a popular, if unsustainable, livelihood option, and the number of betting halls mushroomed. This book investigates this growing social phenomenon, providing a holistic analysis of football gambling in Zimbabwe and exposing its impact on the everyday lives of Zimbabweans. Drawing on original empirical and theoretical analysis from across six different areas of Zimbabwe, the book highlights the lived experiences of communities that are only beginning to grapple with the long-term effects of addiction. Explaining its historical origins in the colonial and immediate post-colonial periods, the authors delve into the motivations, patterns, practices, and impacts of soccer betting. Tackling issues such as gender, livelihoods, addiction, religion, and tradition related to soccer betting, the book lays bare the general lack of policy frameworks and support services to protect vulnerable populations. This book offers a rare glimpse into a sociological phenomenon sweeping across Zimbabwe, with a particularly stark impact on the country's youth. It will interest sports and African studies researchers as well as those focusing on the socio-health problems related to gambling.

**Betting on Ideas** Reuven Brenner, 1989-07-10 In this book, Reuven Brenner argues that people bet on new ideas and are more willing to take risks when they have been outdone by their fellows on local, national, or international scales. Such bets mean that people deviate from the beaten path and either gamble, commit crimes, or come up with new ideas in art, business, or politics, and ideas concerning war and peace, in particular. By using evidence on gambling, crime, and creativity now and during the Industrial Revolution, by examining innovations in English and French inheritance laws, and the emergence of welfare legislation, and by looking at what has happened before and after wars, Brenner reaches the conclusion that hope and fear, envy, and vanity, sentiments provoked when being leapfrogged, make humans race.
