**Constitutional Resilience in South Asia** Swati Jhaveri, Tarunabh Khaitan, Dinesha Samararatne, 2023-06-01 South Asia has had a tumultuous and varied experience with constitutional democracy that predates the recent rise in populism and its study in established democracies. And yet this region has remained largely ignored by constitutional studies and democracy scholars. This book addresses this gap and presents a contribution to the South Asia centric literature on the topic of the stability and resilience of constitutional democracies. Chapters deal not only with relatively well known South Asian countries such as India, Bangladesh, Pakistan and Sri Lanka but also with countries often ignored by scholars such as Bhutan, Nepal, Maldives and Afghanistan. The contributions consider the design and functioning of an array of institutions and actors including political parties, legislatures, the political executive, the bureaucracy, courts, fourth branch guarantor institutions such as electoral commissions, the people and the military to examine their roles in strengthening or undermining constitutional democracy across South Asia. Each chapter offers a contextual and jurisdictionally tethered account of the causes behind the erosion of constitutional democracy and some examine the resilience of constitutional institutions against democratic erosion.

**Environmental Cooperation in Southeast Asia** Paruedee Nguitragool, 2010-10-04 One of the most challenging environmental threats to the ten countries of the Association of Southeast Asian Nations (ASEAN) has been the haze, the sickening and deadly cloud of smoky pollution caused by widespread burning of land and forests in Indonesia. This book examines both the threat and response to it by analysing environmental cooperation in Southeast Asia from an international regime perspective. Tracing the development of regional cooperation on the haze and evaluating the effectiveness of the cooperation, the author argues that the haze crisis combined with the economic crisis of 1997 has profoundly challenged the ASEAN *modus operandi* and resulted in ASEAN's efforts to establish an environmental regime to cope with environmental challenges. The emerging ASEAN haze regime is a unique case study of a regional environmental institution in multi-levelled global environmental governance. Based on in-depth original research, this case study is integrated into international relations, political science and comparative political analysis literatures and contributes to a better understanding of processes within the regional organisation.

**Asian Business Groups** Michael Carney, 2008-06-30 The Asian economic landscape is dominated by various types of business group. Asian Business Groups provides a comprehensive review and introduction to the different types of business group. The origins

and founding context of groups from particular national settings form the basic structure of the book. Emphasis is given to both the similarities and differences in group governance and performance and the implications for Asian international competitiveness are addressed. Multidisciplinary framework that integrates managerial, sociological and economic perspectives on business groups and permits analysis of both their positive and negative aspects. Comprehensive survey of empirical findings on the financial and market performance. Sensitivity to the changing historical context and major events that have shaped business group development and dynamics. Re-envisioning Sovereignty Trudy Jacobsen, 2016-04-08. Sovereignty as a concept is in a state of flux. In the course of the last century traditional meanings have been worn away while the limitations of sovereignty have been altered as transnational issues compete with domestic concerns for precedence. This volume presents an interdisciplinary analysis of conceptions of sovereignty. Divided into six overarching elements it explores a wide range of issues that have altered the theory and practice of state sovereignty such as human rights and the use of force for human protection purposes, norms relating to governance, the war on terror, economic globalization, the natural environment and changes in strategic thinking. The authors are acknowledged experts in their respective areas and discuss the contemporary meaning and relevance of sovereignty and how it relates to the constitution of international order.
