The Supreme Commander Stephen E. Ambrose, 1999 The story of Ike in his finest hours as the Allies top strategist in WWII **Technological Utopianism in American Culture** Howard P. Segal, 2005-11-07 Featuring twenty five writers in all this book includes Howard P Segal s acclaimed work on utopian visionaries **The Right to Manage** Howell John Harris, 1982 **Ike's Spies** Stephen E. Ambrose, Richard H. Immerman, 1999 Behind Ike s grandfatherly mask the free world s foremost spymaster *The Corporation and the Twentieth Century* Richard N. Langlois, 2025-06-24 A definitive reframing of the economic institutional and intellectual history of the managerial era The twentieth century was the managerial century in the United States An organizational transformation from entrepreneurial to managerial capitalism brought forth what became a dominant narrative that administrative coordination by trained professional managers is essential to the efficient running of organizations both public and private And yet if managerialism was the apotheosis of administrative efficiency why did both its practice and the accompanying narrative lie in ruins by the end of the century In *The Corporation and the Twentieth Century* Richard Langlois offers an alternative version a comprehensive and nuanced reframing and reassessment of the economic institutional and intellectual history of the managerial era Langlois argues that managerialism rose to prominence not because of its inherent superiority but because of its contingent value in a young and rapidly developing American economy The structures of managerialism solidified their dominance only because the century s great catastrophes of war depression and war again superseded markets scrambled relative prices and weakened market supporting institutions By the end of the twentieth century Langlois writes these market supporting institutions had reemerged to shift advantage toward entrepreneurial and market driven modes of organization This magisterial new account of the rise and fall of managerialism holds significant implications for contemporary debates about industrial and antitrust policies and the role of

the corporation in the twenty first century Law and Economics from an Evolutionary Perspective Glen Atkinson, Stephen Paschall, 2016-06-24 Law and economics are interdependent Using a historical case analysis approach this book demonstrates how the legal process relates to and is affected by economic circumstances Glen Atkinson and Stephen P Paschall examine this co evolution in the context of the economic development that occurred in the nineteenth and early twentieth centuries as well as the impact of the law on that development Specifically the authors explore the development of a national market the transformation of the corporation and the conflict between state and federal control over businesses Their focus on dynamic integrated systems presents an alternative to mainstream law and economics University of California Union Catalog of Monographs Cataloged by the Nine Campuses from 1963 Through 1967: Authors & titles University of California (System). Institute of Library Research, University of California, Berkeley, 1972 **Eberstadt and Forrestal** Jeffery M. Dorwart, 1991 On the heels of New Deal administrators an army of business executives arrived in Washington in 1940 to prepare the nation for war Among this contingent were two wealthy investment bankers and longtime friends Ferdinand Eberstadt and James Forrestal Together they played integral roles in the massive war mobilization program and later in the formation of institutions for postwar national security Jeffery M Dorwart s research and analysis provide a fresh look at the friendships connections and mindsets that steered the growing federal government in the first half of the twentieth century The result of these relationships was a system of corporatist management for wartime mobilization and for Cold War national security Eberstadt a key figure on numerous policy committees and Forrestal secretary of the navy during the 1940s and the first secretary of the new Department of Defense shared a common background all the way to their college days at Princeton Over the years their friendship and their ties to a group of like minded executives whom Eberstadt termed the Good Men substantially shaped government policy Dorwart s research on Eberstadt s role is especially enlightening for it reveals how Eberstadt an outside consultant and not a government employee or elected official affected policy direction through his design of the National Security Act of 1947 This is a significant contribution to American military and defense history The author s use of the Good Man idea effectively illustrates how non military ideas and influences have been fundamental in shaping national security policy Jerry Cooper University of Missouri St Louis formerly of the Command and General Staff College Overripe Economy Alan Nasser, 2018-06-20 From industrialisation to the present day Overripe Economy is a genealogy of the emergence of a finance ridden authoritarian austerity plagued American capitalism This panoramic political economic history of the country surveys the ruthlessly competitive capitalism of the nineteenth century the maturation of industrial capitalism in the 1920s the rise and fall of capitalism s Golden Age and the ensuing decline towards the modern era Alan Nasser shows why the emergence of the persistent austerity of financialised neoliberal capitalism is the natural outcome of mature capitalism s evolution revealing both the key structural and political vulnerabilities of capitalism itself and points towards the kind of system that can transcend it At the centre of the argument is

capitalism's ultimatum either a new normal of persistent austerity declining democracy and a privatised state or a polity and economy characterised by an economic democracy that can ensure both higher wages and a shorter working week *The Corporate Reconstruction of American Capitalism, 1890-1916* Martin J. Sklar, 1988 Through an examination of the judicial legislative and political aspects of the antitrust debates in 1890 to 1916 Sklar shows that arguments were not only over competition versus combination but also over the question of the relations between government and the market and the state and society
