Rhythmic Conception of Music M.H. Glyn, The Rhythmic Conception of Music Margaret Henrietta Glyn,1907 THE
writer of this book presents a view of music which is as novel as it is interesting and which throws a strong light on the
fundamental principles underlying the art She takes the rhythmic element in music as the formative principle of unity and
works out her conception both from the historical and psychological point of view Rhythm is defined as the periodic quality
undulating circling or putative of all movement and as according to Herbert Spencer rhythm is a necessary characteristic of
all motion it is obvious that here we can obtain a unifying principle A study of history shows us that rhythmic feeling was the
common origin of poetry dancing and music and that the basis of all folk music as far back as we can trace it was rhythm
pure and simple The general law of musical evolution is laid down and proved to exist in the actual development of art and so
modern music is shown to have had its origin in folk song and not in the Church art of the middle ages The progress of all art
is shown to be from the Strict to the Free which is equivalent to passage from the homogeneous to the heterogeneous and
thus from the somewhat strict outline of ancient music we pass to the endless variety of modern music A strict standard is
necessary But when once this standard is grasped monotony must be avoided by the free utterance Coming to the
psychological part of the work the authoress shows that what she terms the Rhythmitonal Idea is the result of the synthetic
intuitive action of the imagination and not the analytic reasoned processes of the intellect it must be intelligible not to the
intellect but to the emotions of the hearer In her opinion the emotional element in music has actually assisted to develop a
considerable part of musical technique by creating the movement of absolute free form She discusses the association of the
poetic idea with music coming to the conclusion that the evolution of music is not advanced by the influence of another art
but proceeds in its own natural and inevitable path of development The book is one that merits deep and careful
consideration From all points of view it is a notable addition to works on musical aesthetics and whatever views may be taken
of the questions at issue it conveys a theory that cannot be overlooked or ignored Zeitschrift Volume 9 **MENC**

Carmen Fonseca-Mora, Mark Gant, 2016-09-23 *Melodies Rhythm and Cognition in Foreign Language Learning* is a collection of essays reflecting on the relationship between language and music two unique innate human capacities This book provides a clear explanation of the centrality of melodies and rhythm to foreign language learning acquisition The interplay between language music brings to applied linguists inquiries into the nature and function of speech melodies the role of prosody and the descriptions of rhythmical patterns in verbal behaviour Musical students seem to be better equipped for language learning although melodies and rhythm can benefit all types of students at any age In fact in this book melodies and rhythm are considered to be a springboard for the enhancement of the learning of foreign languages *Dynamic Korea and Rhythmic Form* Katherine In-Young Lee, 2018-10-02 Winner of the the 2019 B la Bart k Award for Outstanding Ethnomusicology The South Korean percussion genre samul nori is a world phenomenon whose rhythmic form is the key to its popularity and mobility Based on both ethnographic research and close formal analysis author Katherine In Young Lee focuses on the kinetic experience of samul nori drawing out the concept of dynamism to show its historical philosophical and pedagogical dimensions Breaking with traditional approaches to the study of world music that privilege political economic institutional or ideological analytical frameworks Lee argues that because rhythmic forms are experienced on a somatic level they swiftly move beyond national boundaries and provide sites for cross cultural interaction **Proceedings of the Worldwide Music Conference 2021** Ildar D. Khannanov, Roman Ruditsa, 2021-04-12 This book presents sixteen chapters in Volume 1 This Volume I of the Proceedings of the Worldwide Music Conference 2021 offers a smorgasbord of scientific approaches to music The congress is one of a kind it is dedicated not to a specific field but to the interdisciplinary developments and the interaction with the representatives from actual scientific disciplines The languages of mathematics computer science semiotics palaeography and medicine are in the mix geography of the studies is also impressive Greece Mexico China Russia India Poland and USA to name just a few The purpose of such juxtaposition is to see how the terminology categorical apparatus and interpretations of music vary from science to science and how this can enrich the terminology of music theory They cover a wide range of topics that the editors divided into four subfields music in interdisciplinary contexts music and current technology musical instruments and voice and music pedagogy and medicine The opening section of the Proceedings is thus dedicated to the idea of interdisciplinarity relationship of creator of theory of harmony Rameau to sciences of his time the idea of number in music co creation and the category of musical network Three more chapters here deal with Russian palaeography Indian musical genre and the idea of musical semiotics It is a kind of

opening statement from music theorists Part two music and current technology united three chapters on zero gravity concept in modern music discussion of scales as mathematical networks and the innovation in digital music making transforming it from stationary to mobile applications The third part musical instruments and voice is of special interest because it is in the study of the instruments the design acoustic characteristics and tuning and sciences have cooperated with music theory for centuries In addition to instruments one chapter here is dedicated to voice The last part musical pedagogy and medicine takes the reader even further into the interdisciplinary domain The Proceedings is written in standard English language prepared for the pleasure of reading of wide circles of professionals in different fields The purpose of the editors is to bring this rather diverse set of texts into the context of a fruitful dialogue *Learning, Keeping and Using Language* M.A.K. Halliday, John Gibbons, Howard Nicholas, 1990-01-01 This volume contains selected papers from the Eight World Congress of Applied Linguistics held in Sydney in 1987 Volume I starts off with an overview of the field by G Richard Tucker in which he identifies two areas innovative language education and language education policy The overall focus of the papers to follow focus on the individual language learner how that individual in given contexts or in interaction with specific others develops a command of a first language of two or more first languages or of a second language in home and in classroom settings At the same time cutting across these variables there is a gradual shifting of attention from investigations of the language learning process to proposals for language teaching curricula and syllabuses Diverse Methodologies in the Study of Music Teaching and Learning Linda K. Thompson, Mark Robin Campbell, 2008-04-01 As a set of studies Diverse Methodologies represents and reflects the music education research community at a truly unique moment The collection demonstrates the profession's increased motivation willingness and desire to expand and enhance the research base and traditions in the study and practice of music education This volume is an important addition to the libraries of Colleges of Education and Schools of Music as well as music scholars and educators researchers and graduate students who are concerned with advancing both the scope and quality of research in the study of music teaching and learning **Report of the Superintendent of Public Instruction** Michigan.
