**The Law of Corporate Finance: General Principles and EU Law** Petri Mäntysaari, 2010-05-03 1 1 Cash Flow Risk Agency Information Investments The first volume dealt with the management of cash flow and the exchange of goods and services risk agency relationships and information The firm manages these aspects by legal tools and practices in the context of all commercial transactions The second volume discussed investments As voluntary contracts belong to the most important legal tools available to the firm the second volume provided an introduction to the general legal aspects of generic investment contracts and payment obligations This volume discusses funding transactions exit and a particular category of decisions raising existential questions business acquisitions Transactions which can be regarded as funding transactions from the perspective of a firm raising the funding can be regarded as investment transactions from the perspective of an investor that provides the funding Although the perspective chosen in this volume is that of a firm raising funding this volume will simultaneously provide information about the legal aspects of many investment transactions 1 2 Funding Exit Acquisitions Funding transactions are obviously an important way to manage cash flow All investments will have to be funded in some way or another The firm's funding mix will also influence risk in many ways Funding The most important way to raise funding is through retained profits and by using existing assets more efficiently The firm can also borrow money from a bank or issue debt equity or mezzanine securities to a small group of investors

**Hybrid Financial Instruments in International Tax Law** Jakob Bundgaard, 2016-11-15 Financial innovation allows companies and other entities that wish to raise capital to choose from a myriad of possible instruments that can be tailored to meet the specific business needs of the issuer and investor However such instruments put increasing pressure on a question that is fundamental to the tax and financial systems of a country the distinction between debt and equity Focusing on hybrid financial instruments HFIs which lie somewhere along the debt equity continuum but where exactly depends on the terms of the instrument as well as on applicable laws this book analyses their treatment under both domestic law and tax treaties Key jurisdictions including the EU some of its Member States and

the United States are covered Advocating for a broader scope of application of HFIs as part of the financing of companies in Europe alongside traditional sources of debt and equity financing the book addresses such issues and topics as the following problems associated with the debt equity distinction in international tax law cross border tax arbitrage and linking rules drivers behind the use and design of HFIs tax law impact of perpetual and super maturity debt instruments profit participating loans convertible bonds mandatory convertible bonds contingent convertibles preference shares and warrant loans on HFIs financial accounting treatment administrative guidance influence of the TFEU on Member States approaches to classification of HFIs interpretation of the Parent Subsidiary Directive by the European Court of Justice applicability of the OECD Model Tax Convention and implications of the OECD Base Erosion and Profit Shifting BEPS project Throughout this book the analysis draws upon preparatory works case law and legal theory in English German and the Scandinavian languages In conclusion the author considers tax policy issues and identifies and outlines possible high level solutions Actual or potential users of HFIs will greatly appreciate the clarity and insight offered here into the capacity and tax implications of HFIs The book not only examines whether existing legislation is sufficient to handle the issues raised by international HFIs but also provides an in depth analysis of the interaction between corporate financing and tax law in the light of today s financial innovation Corporate executives and their counsel will find it indispensable in the international taxation landscape that is currently coming into view and academics and policymakers will hugely augment their understanding of a complex and constantly changing area of tax law      **Applied International Corporate Finance** Dietmar Ernst,Joachim

managerial dimensions in terms of the efficacy of merger implementation notably the merger integration process The focus is on enhancing shareholder value creation and the execution of strategies for the successful management of mergers It also has a strong public policy component in this special industry where successes can pay dividends and failures can cause serious problems that reach well beyond the financial services industry itself The financial services sector is about halfway through one of the most dramatic periods of restructuring ever undergone by a major global industry The impact of the restructuring has carried well beyond shareholders of the firms and involved into the domain of regulation and public policy as well as global competitive performance and economic growth Financial services are a center of gravity of economic restructuring activity M A transactions in the financial sector comprise a surprisingly large share of the value of merger activity worldwide including only deals valued in excess of 100 million during the period 1985 2000 there were approximately 233 700 M A transactions worldwide in all industries for a total volume of 15 8 trillion Of this total there were 166 200 mergers in the financial services industry 49 7% valued at 8 5 trillion 54% In all of restructuring frenzy the financial sector has probably had far more than its share of strategic transactions that have failed or performed far below potential because of mistakes in basic strategy or mistakes in post merger integration It has also had its share of rousing successes This book considers the key managerial issues focusing on M A transactions as a key tool of business strategy doing the right thing to augment shareholder value But in addition the degree of integration required and the historic development of integration capabilities on the part of the acquiring firm disruptions in human resources and firm leadership cultural issues timeliness of decision making and interface management have co equal importance doing it right
