## **Imagination And Reflection Intersubjectivity:**

*Imagination and Reflection: Intersubjectivity* Thomas P. Hohler, 2013-04-17 This work resulted from my interests in several fundamental issues of contemporary phenomenology Originally their focal point was 1 the role and importance of the subject in philosophical activity and 2 the subject's finitude To gain a perspective on these issues a possible approach seemed to lie in the direction of the transcendental imagination and its relation to time This focus on the imagination of course led to Fichte's egological philosophy that explicitly centers on the imagination Here both issues are raised together The reader of the Fichtean texts cannot for long hesitate to pose the question of intersubjectivity These three issues imagination reflection and intersubjectivity formed the basis of the present work Since such a work could never be completed if it were not for those numerous discussions and friendly conversation with friends and colleagues with whom philosophy is always alive I wish to acknowledge my gratitude specifically to the following people Professor Andre Schuwer of Duquesne University for his encouragement critical reading of the work and his comments that have greatly aided me in the writing of the present work Professor John Sallis Chairman of the Philosophy Department of Duquesne University whose interest in Fichte provided invaluable insights and approaches to the issues Professor Paul Ricoeur University of Paris and University of Chicago whose reading and encouragement greatly helped in the work's publication Professor Samuel Ijsseling University of Leuven who introduced me to Martinus Nijhoff Publishers Professor G A Imagination and Reflection T. **Imagination and Reflection** Thomas P. Hohler, 2014-01-15      **Foundational Reflections** H.A. Durfee, 2012-12-06 The American University Publications In From its inception Philosophy has continued the direction stated in the subtitle of the initial volume that of probing new directions in philosophy As the series has developed these probeings of new directions have taken the two fold direction of exploring the relationships between the disparate traditions of twentieth century philosophy and with developing new insights into the foundations of some enduring philosophic problems This present volume continues both of these directions The interaction between twentieth century Anglo Saxon and Continental philosophy which was an implicit theme of our first and third volumes and the explicit subject of our second volume is here continued in a series of studies on major figures and topics in each tradition In the context of these interpretative studies Professor Durfee returns again and again to the question of the relationships between the will and the reason and explores the conflicting goals of creativity and objectivity in formulating a philosophic position In so doing he raises the issue as his title suggests of the foundations of philosophy itself He seriously challenges the belief common to both phenomenology and analytic philosophy that philosophizing can be a presuppositionless activity objectively pursued independent of the personal and perhaps arbitrary commitments of the philosopher This issue critical as it is to all forms of philosophy is surely a worthy one for a series such as ours      The Concept of Religious Passion Albert Mitchell, Ph.D, 2013-08-08 The concept of religious passion is examined according to the teachings of that great Father of Modern Reason Immanuel Kant both as a philosophical concept

and with respect to its place in Ethics specifically Kantian ethics Kant's strong aversion to religious passion is presented in view of the Enlightenment movement and Reason versus the Emotions argument

*Modern Philosophies of Human Nature* Peter E. Langford, 1986-07-31 General Argument My aim is to survey some of the most influential philosophical writers on human nature from the time that Augustine codified Christian belief to the present During this period philosophical opinions about human nature underwent a transformation from the God centered views of Augustine and the scholastics to the human centered ideas of Nietzsche Freud and Sartre While one aim has simply been to provide a handy survey I do have three polemical purposes One is to oppose the notion that the modernism of more recent writers was produced by methodological innovations According to both Freud and Sartre as well as other key figures like Lacan and Heidegger their views were the product of new methods of investigating human nature namely those of psychoanalysis and the phenomenological reduction Psychoanalysis claimed to use the interpretation of both dreams and the relationship between analyst and patient to penetrate the unconscious Phenomenology has claimed that trained philosophers are able to obtain a privileged view of consciousness by a special act of thought called the phenomenological reduction which enables them to view consciousness without preconceptions On many issues my sympathies are with Nietzsche rather than with Freud or phenomenology This is also the case regarding methodology Nietzsche saw quite clearly that the possibility of popularising the views he himself held came from the decline of Christianity My rejection of exclusive reliance upon the methodologies of psychoanalysis and phenomenology is based on two lines of argument

*Powers of Imagining* Antonio T. De Nicolás, Saint Ignatius (of Loyola), 1986-01-01 This book presents a new translation of the Spiritual Exercises of Ignatius de Loyola of his Spiritual Diary of his Autobiography and some of his letters These translations are introduced by a hermeneutical commentary laying out the theory and practices of the decision making power of imagining Ignatius proposed in his Spiritual Exercises a form of decision oriented mysticism and through their use gathered around him a group of associates who became the first members of the Jesuit Order Under the control of later doctrinally oriented theologians the practical decision oriented mystical character of the original Exercises was gradually replaced by a more theoretical and devotional character Antonio T de Nicolás recovers in his translations and through his critical apparatus the original decision oriented thrust of Ignatius

The Modern Subject Karl Ameriks, Dieter Sturma, 1995-12-07 Contemporary thought often claims the death of the subject and postmodernists typically contend that the standpoint of human subjectivity has been surpassed as a foundation for philosophy A proper appreciation of these influential claims requires an understanding of the main tradition in which the standpoint of subjectivity was articulated namely the classical philosophy of German Idealism This book provides such an understanding The authors assess what is dead and what is alive today in the philosophy of subjectivity and offer the most thorough study available on the background of the postmodern assault on the primacy of the subject Tracing this assault back to reactions to Kant they elucidate the historical and systematic details of the development of the concept of the self in

Classical philosophy from Kant to Fichte and Hegel Manfred Frank one of Europe's most prominent and prolific writers on neo structuralism provides two major contributions an account of the philosophical foundations of the reaction to Kant in early romanticism especially Novalis and a defense of the ineliminability of self consciousness against its critics in current analytic philosophy Essays by other contributors including Henry Allison Robert Pippin Daniel Breazeale Guenter Zoeller Ludwig Siep Veronique Zanetti and Georg Mohr relate the concept of the self to topics such as freedom teleology modernity and intersubjectivity

**When Form Becomes Substance** Luciano Boi, Carlos Lobo, 2022-11-30 This interdisciplinary volume collects contributions from experts in their respective fields with as common theme diagrams Diagrams play a fundamental role in the mathematical visualization and philosophical analysis of forms in space Some of the most interesting and profound recent developments in contemporary sciences whether in topology geometry dynamic systems theory quantum field theory or string theory have been made possible by the introduction of new types of diagrams which in addition to their essential role in the discovery of new classes of spaces and phenomena have contributed to enriching and clarifying the meaning of the operations structures and properties that are at the heart of these spaces and phenomena The volume gives a closer look at the scope and the nature of diagrams as constituents of mathematical and physical thought their function in contemporary artistic work and appraise in particular the actual importance of the diagrams of knots of braids of fields of interaction of strings in topology and geometry in quantum physics and in cosmology but also in theory of perception in plastic arts and in philosophy The editors carefully curated this volume to be an inspiration to students and researchers in philosophy phenomenology mathematics and the sciences as well as artists musicians and the general interested audience

**Thinking Through the Wissenschaftslehre** Daniel Breazeale, 2013-11-28 Daniel Breazeale presents a critical study of the early philosophy of J G Fichte and the version of the Wissenschaftslehre or doctrine of science that Fichte developed in Jena between 1794 and 1799 The book is intended to assist serious readers in their efforts to understand Fichte's philosophy within the context of its own era and to orient them in the ongoing scholarly debates concerning the character and significance of the Wissenschaftslehre Breazeale focuses on explaining what Fichte was and was not trying to accomplish and precisely how he proposed to accomplish this as well as upon the difficulties implicit in his project and his often novel strategies for overcoming them To this end the volume addresses a variety of specific themes issues and problems that will be familiar to any student of Fichte's early writings and which continue to be fiercely debated by his interpreters These include the relationship of the finite human self to the purely self positing I transcendental philosophy as a pragmatic history of the mind Fichte's synthetic method of philosophizing the standpoint of life vs the standpoint of speculation the extra philosophical presuppositions and implications of the Wissenschaftslehre the different senses of intellectual intuition in Fichte's early writings the controversial doctrine of the check Ansto upon the free actions of the I the various theoretical and practical tasks of philosophy the refutation of dogmatism and the choice of a philosophical standpoint the relationship of

transcendental idealism to skepticism the interests of reason and the problematic primacy of the practical in Fichte's thought

*Hegel's Century* Jon Stewart, 2021-10-28 The remarkable lectures that Hegel gave in Berlin in the 1820s generated an exciting intellectual atmosphere which lasted for decades From the 1830s many students flocked to Berlin to study with people who had studied with Hegel and both his original students such as Feuerbach and Bauer and later arrivals including Kierkegaard Engels Bakunin and Marx evolved into leading nineteenth century thinkers Jon Stewart's panoramic study of Hegel's deep influence upon the nineteenth century in turn reveals what that century contributed to the wider history of philosophy It shows how Hegel's notions of alienation and recognition became the central motifs for the era's thinking how these concepts spilled over into other fields like religion politics literature and drama and how they created a cultural phenomenon so rich and pervasive that it can truly be called Hegel's century This book is required reading for historians of ideas as well as of philosophy

*Creativity and the Philosophy of C.S. Peirce* D.R. Anderson, 2013-03-09 Charles Sanders Peirce is quickly becoming the dominant figure in the history of American philosophy The breadth and depth of his work has begun to obscure even the brightest of his contemporaries Concerning the interpretation of his work however there are two distinct schools The first holds that Peirce's work is an aggregate of important but disconnected insights The second school argues that his work is a systematic philosophy with many pieces of the overall picture still obscure or missing It is this second view which seems to me the most reasonable in part because it has been convincingly defended by other scholars but most importantly because Peirce himself described his philosophy as systematic What I would recommend is that every person who wishes to form an opinion concerning fundamental problems should first of all make a complete survey of human knowledge should take note of all the valuable ideas in each branch of science should observe in just what respect each has been successful and where it has failed in order that in the light of the thorough acquaintance so attained of the available materials for a philosophical theory and of the nature and strength of each he may proceed to the study of what the problem of philosophy consists in and of the proper way of solving it 6 9 1

*The Gift of Tongues* Christine F. Cooper-Rompato, 2010-01-01 Explores the phenomenon of xenoglossia the sudden miraculous ability to speak understand read or write a foreign language as it appears in the later medieval hagiographic record and in English literature Includes discussion of the late medieval English writers Geoffrey Chaucer and Margery Kempe Provided by publisher

**The Dimensions of Hegel's Dialectic** Nectarios G. Limnatis, 2011-10-20 The Dimensions of Hegel's Dialectic examines the epistemological import of Hegelian dialectic in the widest sense In modern philosophy German idealism Hegel in particular is said to have made significant innovative steps in redefining the meaning scope and use of dialectic Indeed it is dialectic that makes up the very core of Hegel's position yet it is an area of his thought that is widely neglected by the available literature despite the increased interest in Hegel's philosophy in recent years This book brings together an international team of expert contributors in a long overdue discussion of Hegelian dialectic Twelve specially commissioned essays address the task of

making sense and use of Hegel's dialectic which is fundamental not only for historical and hermeneutic reasons but also for pragmatic ones a satisfactory response to this challenge has the power to clarify Hegel's legacy in the current debate The essays situate the dialectic in the context of German idealism with a clear sighted elucidation of the problems that Hegel's dialectic is called upon to solve

**The 17th and 18th Centuries** Frank N. Magill, 2013-09-13 Each volume of the Dictionary of World Biography contains 250 entries on the lives of the individuals who shaped their times and left their mark on world history This is not a who's who Instead each entry provides an in depth essay on the life and career of the individual concerned Essays commence with a quick reference section that provides basic facts on the individual's life and achievements The extended biography places the life and works of the individual within an historical context and the summary at the end of each essay provides a synopsis of the individual's place in history All entries conclude with a fully annotated bibliography

*J. G. Fichte: Foundation of the Entire Wissenschaftslehre and Related Writings, 1794-95*, 2021-01-28 The Wissenschaftslehre or doctrine of science was the great achievement of the German idealist philosopher J G Fichte Daniel Breazeale presents accessible new translation of three works in which Fichte developed this philosophical system The centerpiece of this volume is a new English translation of Fichte's only full scale presentation of the principles of his philosophy the Foundation of the Entire Wissenschaftslehre 1794-95 Accompanying this are new translations of the work in which Fichte first publicly introduced his new system Concerning the Concept of the Wissenschaftslehre 1794 and the Outline of what is Distinctive of the Wissenschaftslehre with respect to the Theoretical Power 1795 which was intended as a companion to the Foundation In addition Breazeale includes the transcripts of Fichte's unpublished Zurich lectures on his system 1794 translated here for the first time in English Breazeale supplements his translations with an extensive historical and systematic introduction detailed outlines of the contents and structure of the Foundation and Outline and copious scholarly annotation of the translated texts helping to orient readers who may otherwise find themselves lost in the wilderness of Fichte's complex derivations

*The Oxford Handbook of Levinas* Michael L. Morgan, 2019-04-10 Emmanuel Levinas 1906-1995 emerged as an influential philosophical voice in the final decades of the twentieth century and his reputation has continued to flourish and increase in our own day His central themes the primacy of the ethical and the core of ethics as our responsibility to and for others speak to readers from a host of disciplines and perspectives However his writings and thought are challenging and difficult The Oxford Handbook of Levinas contains essays that aim to clarify and engage Levinas and his writings in a number of ways Some focus on central themes of his work others on the ways in which he read and was influenced by figures from Plato Hobbes Descartes and Kant to Blanchot Husserl Heidegger and Derrida And there are essays on how his thinking has been appropriated in moral and political thought psychology film criticism and more and on the relation between his thinking and religious themes and traditions Finally several essays deal primarily with how readers have criticized him and found him wanting The volume exposes and explores both the depth of Levinas's

philosophical work and the range of applications to which it has been put with special attention to clarifying why his interests in the human condition the crisis of civilization the centrality and character of ethics and morality and the very meaning of human experience should be of interest to the widest range of readers      *The Bloomsbury Handbook of Fichte* Marina F.

Frings,2012-12-06 There is little more than a decade left before the bells allover the world will be ringing in the first hour of the twenty first century which will surely be an era of highly advanced technology Looking back on the century that we live in one can realize that generations of people who have already lived in it for the better parts of their lives have begun to ask the same question that also every individual person thinks about when he is faced with the first signs of the end of his life It is the question Why did everything in my life happen the way it did Or It would have been so easy to have channelled events into directions other than the way they went Or Why in all the world is my life coming to an end as it does or why must all of us face this kind of end of our century Whenever human beings take retrospective views of their lives and times when they are faced with their own personal fin du siecle there appears to be an increasing anxiety throughout the masses asso ciated with a somber feeling of pessimism which may even be mixed with a slight degree of fatalism There is quite another feeling with those persons who were born late in this century and who did not share all the events the older generation experi enced
