Post-Punk Perception Edmund Wong, 2013-07 Growing up in Singapore in the 80s has been challenging I didn't know much about life or economy I didn't know what I want to do apart from playing I know I had to study and get a job In school we had to write composition about our profession when we grow up I had never wanted to be a philosopher let alone writing about social philosophy It is just that growing up with a single parent is tough It is tougher when she is uneducated and I had to learn most things by myself After my National Service I decided to further studies That was when I was exposed to philosophy and psychology in the UK After graduation in 1999 with a degree in Electronics I came back home to resume my National Service I disrupt it and had about 2 months left The life in UK exposed me to something that I did not notice when growing up in Singapore I find local social scene unsatisfactory They are Confucians Muslims Christians freethinkers and humanists Most time they are preoccupied with how to earn more money Religion does not give me the fulfillment that it promised In addition most were based on Singaporeans interpretation of the Bible and Buddhism's dharma Most times I feel

that everything that Singaporeans do has got to do with wealth creation or at least with the expenditure of it It end up like what Pope Francis referred to as the cult of money Organised religion involves more fear mongering than cultivating an inner grace and peace Hence this book is about how I relate an ancient thinker s ethics Aristotle to the present day I find Aristotle s ethics to most suit my needs as a man and lover It does not pretend to be more than what it seek the golden mean It does require us to think and explore the values to find balance and achieve wisdom with intellectual and moral virtues I also find other philosophers French or not particularly insightful and thought provoking They offer me explanation and exploration on subjects like love sex and death Freudian psychoanalysis are also very penetrating in their findings and insights Moreover I needed some contemporary psychological theory not in depth psychoanalysis to back Aristotle s model of ethics intellectual and moral virtues Hence the psychological background of my book I got acquainted with these psychological theories when I was preparing myself to be a financial consultant I later found out more about them and they became useful in my work and life Hence I would like to share it with people in Asia so that they can ask the right kind of questions in life in order to learn more about themselves and the social milieu they are living in Because everyone of us are affected by the social sciences politics economics and sociology This book will I hope allow us to understand why we are irrational and how we can make rational changes through reasonings in their life and achieving eudaimonia My wish is simply to share what I enjoy doing apart from creating useful ideas to improve the world Through my book I hope to make others understand religion science and philosophy and how they play an increasingly integral part in the Asian century *Philosophy of Digital Currencies*

Ugochukwu Chigoziem Ikpeazu,2023-02-23 Current systems are failing the poor because these systems are unable to provide the financial inclusion needed for basic subsistence and commerce which in turn would drive micro and macro economic growth This book introduces the reader to a new way of thinking about how value can be created captured measured and understood economically and financially and within the context of social contracts It underscores the need to revisit such models through technological advancements namely Industrial Revolution 4 0 in order to solve pressing global issues such as economic inclusion and poverty eradication The book proposes that for humanity to make the leap forward and for any real sustainable development to occur the world needs a disruptive approach to value creation using currency systems considering that currencies underpin value exchange This disruption will result in a level of decentralization that facilitates peer to peer value exchange and drives financial inclusion all of which should be underscored by a new digital social contract The author asserts that a time based digital currency could address these issues by creating a new and truly inclusive currency model that allows economies to gain more value than previously possible In addition by leveraging 4IR technologies a currency system can be designed where each unit of money accurately reflects the context and range of socio economic factors that influence each human interaction This book is aimed at futurists technologists researchers policymakers and anyone that is curious about how technology could make a difference in our collective futures It cuts across a range of
