Lyman,Toni L. Hembree-Kigin,2013-11-11 Preschool children have been largely neglected in the mental health treatment literature although research has established that many behavioral and emotional disorders in children result from events occurring during the preschool years or are first manifested during this period This has occurred for several reasons Traditional psychoanalytic thinking has considered preschoolers to be too psychologically immature for complete manifestations of psychopathology and the limited language abilities of young children have complicated assessment procedures and made them less appropriate for treatment approaches that are largely verbal in nature In addition the developmental complexity of the preschool period has deterred many researchers from investigating clinical issues with this age group Partly as a result of the lack of information on preschoolers in the literature practitioners have historically been uncomfortable in conducting assessments and initiating treatment with young children They have often adopted a wait and see attitude in which formal mental health diagnosis and treatment are not implemented until after the child s entry into school Unfortunately such a delay may mean wasting the time during which mental health interventions can be maximally effective Recently this attitude has changed and practitioners now recognize the need for assessment and treatment of behavioral and emotional disorders early in life What they require to assist them in the timely delivery of such services is information about assessment and treatment procedures specifically designed for preschoolers and with demonstrated efficacy with that age group Language Assessments for Preschool Children Anders Højen,Dorthe

Bleses, Philip S. Dale, 2022-08-04 This Element has two main purposes Firstly it discusses purposes advantages and disadvantages as well as the challenges of different formats of language assessment concluding with a focus on educator administered language assessment in early childhood and education programs It addresses the selection of assessment domains the trade off between brevity and precision the challenge of assessing bilinguals and accommodating the requirements of funders e g government agencies and users e g educators and schools It draws on lessons learned from developing two instruments for a national Danish language and preliteracy assessment program Secondly it introduces those two educator administered instruments Language Assessment 3 6 LA 3 6 and Language Assessment 2 year olds LA 2 with respect to content norming gender and socioeconomic influences as well as psychometric qualities The intention is that this experience can help enable the extension of the educator based approach to other languages and contexts while simultaneously acknowledging that linguistic and cultural adaptations are crucial

Implicit Pedagogy for Optimized Learning in Contemporary Education
Vodopivec, Jurka Lepičnik, Jančec, Lucija, Štemberger, Tina, 2018-08-31. In addition to the content prescribed by the official curriculum of any given educational establishment, students learn other information and skills outside of the intended and taught information, such as sharing, communication, and conflict resolution. These learned skills, otherwise unaccounted for in the education process, can be considered as a part of a hidden or unwritten curriculum. *Implicit Pedagogy for Optimized Learning in Contemporary Education* is a pivotal reference source that provides vital research on the application of assessment methods for the evaluation of indirect and direct educational methods. While highlighting topics such as language development, teacher agency, and learning process, this publication explores hidden curricula as well as the methods of learning outside of the prescribed school curriculum. It is ideally designed for educators, administrators, students, and researchers seeking current research on the effect of hidden curricula on the education process.
