First Strike:

Authorization United States. Congress. Senate. Committee on Armed Services, 1978 Thinking about America's Defense Glenn A. Kent, 2008 Lieutenant General Glenn A Kent was a uniquely acute analyst and developer of American defense policy in the second half of the twentieth century His 33 year career in the Air Force was followed by more than 20 years as one of the leading analysts at RAND This volume is not a memoir in the normal sense but rather a summary of the dozens of national security issues in which Glenn was personally engaged over the course of his career These issues included creating the single integrated operational plan SIOP leading DoD s official assessment of strategic defenses in the 1960s developing and analyzing strategic nuclear arms control agreements helping to bring new weapon systems to life and many others Each vignette describes the analytical frameworks and where appropriate the mathematical formulas and charts that Glenn developed and applied to gain insights into the issue at hand The author also relates his roles in much of the bureaucratic pulling and hauling that occurred as issues were addressed within the government publisher s website

Nuclear Weapons A. J. C. Edwards, 1986-01-01 This is a clear non technical and comprehensive study of nuclear strategy and the balance of power The book is intended for both supporters and opponents of nuclear deterrence indeed for all who believe that nuclear issues cannot be wished away or laid aside but must be addressed with knowledge even if this means thinking about the unthinkable Within a coherent system of thought this volume addresses the most fundamental issues of our time such as the first strike advantage arms control agreements the Star Wars program the nuclear winter hypothesis and nuclear conflict itself The book is packed with valuable factual information including notes diagrams illustrations and appendices **Parameters** , 1982 *To Win a Nuclear War* Michio Kaku, Afterword by Axelrod, Daniel Axelrod, 1987 *To Win a Nuclear War* records as fully as we are likely to find what has gone on in the minds of American leaders and nuclear strategists on this awesome subject during these fateful forty years It is an appalling story This book compels us to re think and re write the history of the Cold War and the arms race From the foreword by Ramsey Clark former Attorney General of the United States *To Win a Nuclear War* provides a startling glimpse into secret U S plans to initiate a nuclear war from 1945 to the present Based on recently declassified Top Secret documents obtained through the Freedom of Information Act this book meticulously traces how U S policy makers in over a dozen episodes have threatened to initiate a nuclear attack The book also documents the surprising reasons why the war plans were never carried out and discloses the deeper hidden meaning of the Star Wars program *Apocalypse Deferred* Jeremiah L. Alberg, 2017-06-15 The thought of Ren Girard on violence sacrifice and mimetic theory has exerted a strong influence on Japanese scholars as well as around the world In this collection of essays originating from a Tokyo conference on violence and religion scholars call on Girardian ideas to address apocalyptic events that have marked Japan s recent history as well as other aspects of primarily Japanese literature and culture Girard s theological notion of apocalypse resonates strongly with those grappling with the horrors of

Hiroshima and Nagasaki as well as events such as the 2011 T hoku earthquake and tsunami and the Fukushima nuclear disaster In its focus on Girard and devastating violence the contributors raise issues of promise and peril for us all The essays in Part I of the volume are primarily rooted in the events of World War II The contributors employ mimetic theory to respond to the use of nuclear weapons and the threat of absolute destruction Essays in Part II cover a wide range of topics in Japanese cultural history from the viewpoint of mimetic theory ranging from classic and modern Japanese literature to anime Essays in Part III address theological questions and mimetic theory especially from a Judeo Christian perspective Contributors Jeremiah L Alberg Jean Pierre Dupuy Yoko Irie Fayolle Eric Gans Sandor Goodhart Shoichiro Iwakari Mizuho Kawasaki Kunio Nakahata Andreas Oberprantacher Mery Rodriguez Thomas Ryba Richard Schenk OP Roberto Solarte Matthew Taylor and Anthony D Traylor *The Nuclear Seduction* William A. Schwartz, Charles Derber, 2023-04-28 This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1990 **Hearings** United States. Universalising International Law C. G. Weeramantry, 2004 Universalising international law is one of the most urgent tasks awaiting those who wish to advance the discipline Though all the world acknowledges its universal nature it has long been confined in a largely monocultural mould Indeed a tendency is sometimes discernible for international law to be compartmentalised and to function within a close cabinet of technical rules little known to those outside the ranks of specialists This volume looks initially at some general aspects of universalisation It thereafter adopts a universalist approach to some of the sources of international law and it deals with peace the bedrock of international law which likewise requires a universalist approach It is hoped that these studies will highlight the imperative need that now exists for extending the conceptual framework of international law thereby buttressing its moral authority and widening its appeal at a time when universal acceptance of international law is one of the most pressing demands of the international system Novel Approaches to Colorectal Cancer , 2021-06-18 Novel Approaches to Colorectal Cancer Volume 151 in the Advances in Cancer Research series is composed of 11 reviews covering state of the art research relating to the etiology diagnosis prevention and treatment of colorectal cancer The book s chapters were written by recognized experts in the field and include sections on molecular biomarkers in diagnosis and therapy the interplay of diet lifestyle and the microbiome early age onset disease mutational signature analysis challenges in early detection immunotherapy organoid technology the role of epigenetic alterations disparities in minority populations field carcinogenesis and cancer as an evolutionary process Each of these topics provides novel insights and concepts on various aspects of the nature of colorectal cancer offering new opportunities for the management of a major source of cancer incidence and mortality Provides information on the timely nature of the included

topics which represent the most current concepts and approaches in cancer research Offers outstanding and original reviews on colorectal cancer research Provides the authority and expertise of the authors all of whom are highly recognized and conducting state of the art investigations in cancer with this release focusing on colorectal cancer **National Security Issues** ,1986 **Formal Models of Crisis Bargaining** William Spaniel,2023-11-09 Over the last quarter century crisis bargaining has become the prevailing paradigm for the study of war This textbook presents a concise and approachable overview of the crisis bargaining literature surveying the canonical formal models in the bargaining approach to war It begins by considering different explanations for war then delves into two classes of explanation commitment problems and incomplete information This textbook is essential reading for advanced undergraduates graduates and researchers alike Each chapter delves into a specific part of the puzzle rigorously unravelling the twisted logic that causes wars to begin More than seventy illuminating figures illustrate the strategic reasoning outlined and more than 100 exercises of graded levels of difficulty help clarify readers own understanding of the issues Online resources include an instructor answer key and numerous engaging video lectures **A New Nuclear Century** Stephen J. Cimbala,James Scouras,2002-05-30 Cimbala and Scouras examine the issues related to the control of nuclear weapons in the early 21st century These issues are both technical and policy oriented science and values are commingled This means that arguments about nuclear strategy arms control and proliferation are apt to be contentious and confusing The authors seek to provide readers with a fuller more accurate understanding of the issues involved They begin by analyzing the crazy mathematics of nuclear arms races and arms control that preoccupied analysts and policymakers during the Cold War After examining stability modeling they argue for a more comprehensive definition of strategic stability and they relate this more inclusive concept to the current relationship between the United States and Russia one characterized by cooperation as well as competition They then use the concept of friction to analyze how the gap between theory and practice might influence nuclear force operations and arms control The problem of nuclear weapons spread or proliferation is then considered from the vantage point of both theory and policy They conclude with an analysis of whether the United States might get by in the 21st century with fewer legs of its strategic nuclear triplet than weapons based on land at sea and airborne A provocative analysis for arms control policymakers strategists and students scholars and other researchers involved with nuclear weapons issues Concurrent Resolution on the Budget for Fiscal Year ...
