First few X cases and contacts diagnostic test evaluation for respiratory pathogens with pandemic potential

World Health Organization, 2025-04-10 This document sets out the methods to enable the earliest assessment of human case of a novel or re emerging respiratory pathogen with pandemic potential and their close contacts specifically to guide development and early use of pathogen specific diagnostic tests for clinical use and public health benefit This FFX Dx protocol provides guidance for the End User Validation and early use of the first diagnostic Dx test for Pathogen X in a rigorous but focused assessment of the First Few Pathogen X cases and contacts in a given country as part of the Respiratory Investigations and Studies Unity Studies initiative The Medical Examiner, 1840 The Lancet, 1894 *The Cambridge Handbook of Class Actions* Brian T. Fitzpatrick, Randall S. Thomas, 2021-02-18 International authors describe class action procedure in this concise comparative and empirical perspective on aggregate litigation **Classic Cases in**

Neuropsychology, Volume II Chris Code, Yves Joanette, Andre Roch Lecours, Claus-W. Wallesch, 2013-01-11 From a contemporary perspective Classic Cases in Neuropsychology Volume II reviews important and significant cases described in historical and modern literature where brain damage has been sustained The single case study has always been of central importance to the discipline of neuropsychology Cognitive neuropsychology and cognitive neurolinguistics search for universal structures in thought processes and single patients are an important means to that end The role of the single case study in the historical development of the field and its increasing contribution to contemporary work is therefore recognised as crucial This follow up to the successful Classic Cases in Neuropsychology 1996 brings together more of the important case investigations which have shaped the way we think about the relationships between brain behaviour and cognition The book includes cases from the rich history of neuropsychology as well as important contemporary case studies in the fields of memory language and perception Some of the cases described are rare some are seminal in the field many were the first of their type to be described and gave rise to new theories and some are still controversial As in the first volume each chapter highlights the relevance of the case to the development of neuropsychology and discusses the theoretical implication of the findings Classic Cases in Neuropsychology Volume II will be essential reading for students and researchers alike in the fields of neuropsychology and neuroscience It will also be of interest to speech and language pathologists therapists and clinicians in this area **Metropolitan Sanitary Commission, Minutes of Evidence** Great Britain. Parliament. House of

Commons, 1848 *Making the Case* Robert Leventhal, 2019-11-18 One hundred years before Freud's striking psychoanalytic case histories the narrative psychological case history emerged in the second half of the eighteenth century in Germany as an epistemic genre Gianna Pomata that cut across the disciplines of medicine philosophy law psychology anthropology and literature It differed significantly from its predecessors in theology jurisprudence and medicine Rather than subsuming the individual under an established classification moral precept category or type the narrative psychological case history

endeavored to articulate the individual in its very individuality thereby constructing a self in its irreducible singularity The presentation and analysis of several significant psychological case histories their theory and practice as well as the controversies surrounding their utility validity and function for an envisioned science of the soul constitutes the core of the book Close and distant F Moretti readings of key texts and figures in the discussion regarding empirical psychology psychologia empirica experiential psychology Erfahrungsseelenkunde and medical psychology medizinische Psychologie such as Christian Wolff J C Kr ger J C Bolton Ernst Nicolai J A Unzer J G Sulzer J G Herder Friedrich Schiller Jacob Friedrich Abel Marcus Herz Karl Philipp Moritz J C Reil Ernst Platner and Immanuel Kant provide the disciplinary historical scientific context within which this genre comes to the fore As the first systematic argument concerning the early history of this genre my thesis is that the psychological case history evolved as part of a pastoral apparatus of care concern guidance and direction for what it fashioned as the unique individual as the discursive medium in a process by which the soul became a self The narrative psychological case history was in fact a meta genre that transcended traditional boundaries of history and fiction medicine and philosophy psychology and anthropology and sought for the first time to explicitly link the experience history memory fantasy previous trauma or suffering of a unique individual to illness deviance aberration and crime In a word it demonstrated as Freud later said of his own case histories in *Studies on Hysteria* the intimate relation between the history of suffering and the symptoms of illness die innige Beziehung zwischen Leidensgeschichte und Krankheitssymptome This genre not only had a profound and far reaching effect on the evolution of German and European literature one thinks of the rich traditions of the Novella and the Fallgeschichte from Goethe B chner R L Stevenson Edgar Allen Poe and Chekhov to Kafka and beyond but in shaping modern literature the clinical sciences and even popular culture The book should therefore be of interest not merely to Germanists modern European cultural historians historians of science and literary historians but also those interested in the history of medicine and psychology the origins of psychoanalysis the history of anthropology cultural studies and more generally the history of ideas
