First Look At Spiders:

All You Need to Know About Spiders Wolfgang Nentwig, Jutta Ansorg, Angelo Bolzern, Holger Frick, Anne-Sarah Ganske, Ambros Hänggi, Christian Kropf, Anna Stäubli, 2022-04-07 All You Need to Know About Spiders Spiders are super predators and devour everything they can overpower To do this they have developed incredibly good catching techniques and with spider silk a tool that makes material technology green with envy The males are usually smaller than the females and in order to have sex they have to come up with a lot to avoid being misunderstood as easy prey Dancing drumming and gifts almost always help Spiders use their venom in very precise doses and since humans are not on their menu they are harmless to us Many people's unnecessary fear of spiders finds cultural roots as early as the Middle Ages Nevertheless spider fear is easily treatable There is no habitat or building without spiders And that's a good thing because spiders have fascinating properties and their world is full of surprises Everything you need to know about them is explained in this book in understandable language by experts for laymen In addition some of the most common spider species in the house and garden are briefly presented with tips for observation The authors This book is authored by eight scientists all of them members of the Association for the Promotion of Spider Research Wolfgang Nentwig Jutta Ansorg Angelo Bolzern Holger Frick Anne Sarah Ganske Ambros Hänggi Christin Kropf und Anna Stäubli *The Implied Spider* Wendy Doniger, 2011 Wendy Doniger's foundational study is both modern in its engagement with a diverse range of religions and refreshingly classic in its transhistorical cross cultural approach By responsibly analyzing patterns and themes across context Doniger reinvigorates the comparative reading of religion tapping into a wealth of narrative traditions from the instructive tales of Judaism and Christianity to the moral lessons of the Bhagavad Gita She extracts political meaning from a variety of texts while respecting the original ideas of each A new preface confronts the difficulty of contextualizing the comparison of religions as well as controversies over choosing subjects and positioning arguments and the text itself is expanded and updated throughout

Cushing, Yvonne Kranz-Baltensperger, Christian Kropf, 2025-01-03 To avoid any misunderstandings this book is not about spiders as pets but about those spiders that live in our houses and apartments as lodgers Mostly ignored and sometimes wrongly feared there is hardly a building in the world that does not harbour some species of spider What is fascinating is that we always find the

same species These spiders must have special adaptations because the humidity in our homes is far too low they are too clean and the food supply is usually scarce However those spiders that have made the leap into our four walls are rewarded with a worldwide right to stay This in turn is due to people s eagerness to trade and migrate worldwide Humans tirelessly transport their belongings and an endless stream of goods around the world in sacks parcels and containers And our domestic spiders as stowaways travel just as tirelessly and unrecognized It is therefore possible to present domestic spiders found throughout the world in a single book as they are essentially the same everywhere The 50 or so most important species and species groups are presented here in a generally understandable way with a detailed profile photos and distribution maps The authors of this book are experts who work at museums universities and in administration in Europe and North America They are not only recognized scientists but have also been avowed spider fans for decades
