## **Literature And Science Theory And Practice:**

**Literature and Science** Stuart Peterfreund,1990      **Comparative Criticism: Volume 13, Literature and Science** E. S. Shaffer,1992-02-13 Topics covered in this volume include literary Chinese as a language for science the history and principles of scientific translation in Europe the theatrical panorama in the 19th century and its roots in optical theory and experiment and an alternative perspective on Gerard Manley Hopkins      Encyclopedia of Literature and Science Pamela Gossin,2002-08-30 Science and literature have always been strange bedfellows Like puzzle pieces they fit because they are different Some of the greatest works of world literature have been inspired by the marvels of the scientific world Scientists have written works of the imagination Even formal scientific writings have been known to employ rhetoric There is a tendency to think of literature and the humanities in general as having little to do with science Yet scholars have conducted fruitful studies of the history and philosophy of science With the rise of technology scholars have also applied scientific analysis to the study of literature and the creative process The intersection of scientific and humanistic inquiry is finally being mapped This volume includes more than 650 A Z entries on topics and themes in science and literature significant writers key scientists seminal works and important theories and methodologies This reference defines the rapidly emerging interdisciplinary field of literature and science An introductory essay traces the history of the field its growing reputation and the current state of research Broad in scope the volume covers world literature from its beginnings to the present day and illuminates the role of science in literature and literary studies A wide range of experts contributed entries to this volume each of which concludes with a brief bibliography The entire volume closes with a list of works for further reading      *The Cambridge History of Science: Volume 5, The Modern Physical and Mathematical Sciences* David C. Lindberg,Mary Jo Nye,Roy Porter,Ronald L. Numbers,2003 A new and comprehensive examination of the history of the modern physical and mathematical sciences      **Discourses and Narrations in the Biosciences** Brian Hurwitz,Paola Spinozzi,2011 Discourses and Narrations in the Biosciences investigates the forms of writing in which scientific claims are formulated and announced Argumentative strategies compositional rules and figurative expressions in communication and narrativization of scientific knowledge are the focus of interdisciplinary contributions by humanities and science scholars The first part of the book dedicated to Rhetorical and Epistemological Aspects of Science Writing addresses how scientific pursuits and methods feed into multi level texts that generate responses within science society and culture The second part entitled Bioscientific Discourses and Narrations examines popularisations and fictionalizations of science in relation to diversity deviancy ageing illness reproduction the evolution of humankind mathematical models of biomedical systems and the myth of the heroic scientist Assessing the narrative impetus and command of literary and meta discursive strategies shown by contemporary science writers enhances understanding of the methods and conventions through which the biosciences produce knowledge

*Literature and Technology* Mark L. Greenberg,Lance Schachterle,1992 Major authors investigated include Chaucer Blake

Romains Pynchon and Prigogine     Einstein's Wake Michael H. Whitworth, 2001-12-13 The revolution in literary form and aesthetic consciousness called modernism arose as the physical sciences were revising their most fundamental concepts space time matter and the concept of science itself The coincidence has often been remarked upon in general terms but rarely considered in detail Einstein's Wake argues that the interaction of modernism and the new physics is best understood by reference to the metaphors which structured these developments These metaphors widely disseminated in the popular science writing of the period provided a language with which modernist writers could articulate their responses to the experience of modernity Beginning with influential aspects of nineteenth century physics Einstein's Wake qualifies the notion that Einstein alone was responsible for literary relativity it goes on to examine the fine detail of his legacy in literary appropriations of scientific metaphors with particular attention to Virginia Woolf D H Lawrence Wyndham Lewis and T S Eliot     **Romantic Science** Noah Heringman, 2012-02-01 Although romantic science may sound like a paradox much of the romance surrounding modern science the mad scientist the intuitive genius the utopian transformation of nature originated in the Romantic period Romantic Science traces the literary and cultural politics surrounding the formation of the modern scientific disciplines emerging from eighteenth century natural history Revealing how scientific concerns were literary concerns in the Romantic period the contributors uncover the vital role that new discoveries in earth plant and animal sciences played in the period's literary culture As Thomas Pennant put it in 1772 Natural History is at present the favourite science over all Europe and the progress which has been made in it will distinguish and characterise the eighteenth century in the annals of literature As they examine the social and literary ramifications of a particular branch or object of natural history the contributors to this volume historicize our present intellectual landscape by reimagining and redrawing the disciplinary boundaries between literature and science Contributors include Alan Bewell Rachel Crawford Noah Heringman Theresa M Kelley Amy Mae King Lydia H Liu Anne K Mellor Stuart Peterfreund and Catherine E Ross     **Evolution and Literary Theory** Joseph Carroll, 1995 Over the past two decades poststructuralism in its myriad forms has come to dominate literary criticism to the exclusion of virtually any other point of view Few scholars have escaped the coercive authority of its programmatic radicalism In Evolution and Literary Theory Joseph Carroll vigorously attacks the foundational principles of poststructuralism and offers in their stead a bold new theory that situates literary criticism within the matrix of evolutionary theory     **Reader's Guide to Literature in English** Mark Hawkins-Dady, 2012-12-06 Reader's Guide Literature in English provides expert guidance to and critical analysis of the vast number of books available within the subject of English literature from Anglo Saxon times to the current American British and Commonwealth scene It is designed to help students teachers and librarians choose the most appropriate books for research and study     **Bulletin MLSA** University of Michigan. College of Literature, Science, and the Arts, 2009     **Literary Theory's Future(s)** Joseph P. Natoli, 1989     *Proceedings of the Board of Regents* University of Michigan. Board of Regents, 1939     Subversive Seduction Travis Landry, 2013-01-10 Male

male rivalry and female passive choice the two principal tenets of Darwinian sexual selection raise important ethical questions in *The Descent of Man* and in the decades since about the subjugation of women If female choice is a key component of evolutionary success what impact does the constraint of women's choices have on society The elaborate courtship plots of 19th century Spanish novels with their fixation on suitors and selectors rivalry and seduction were attempts to grapple with the question of female agency in a patriarchal society By reading Darwin through the lens of the Spanish realist novel and vice versa Travis Landry brings new insights to our understanding of both while Darwin's theories have often been seen as biologically deterministic Landry asserts that Darwin's theory of sexual selection was characterized by an open ended dynamic whose oxymoronic emphasis on passive female choice carries the potential for revolutionary change in the status of women
