The Family: Change or Continuity? Faith Robertson Elliot, 1986-10-27 Faith Elliot's book has a coherence unusual in a textbook As its title suggests it directs our attention to change and continuity in the family It reviews debates about the biological origins of the nuclear family and gender roles accounts of the development of the conjugal family as the dominant family form in modern Western societies and of change in the roles of men and women within and without the family the remodelling of the conjugal family consequent on the legitimization of divorce and the emergence of one parent families and remarriage families and the development of alternative lifestyles as exemplified in unmarried cohabitation same sex pairings and group living The book considers Marxist and feminist approaches alongside the functional approaches which have been more traditional in the sociological study of the family

Marriage and Family in a Changing Society James M. Henslin, 1992

Continuity and Change in Family Relations Rand D. Conger, Frederick O. Lorenz, K.A.S. Wickrama, 2004-04-12 The chapters in this volume were developed as a follow up to the Summer Institute entitled Continuity and Change Family Structure and Process conducted by the second Family Research Consortium The goal of this book is to provide readers with a greater understanding of both the conceptual issues involved in the study of continuity and change in families and also some of the methodological approaches that have been developed for investigating families over time **Families and Change** Patrick C. McKenry, Sharon J. Price, 2005-05-05 Presents the vast literature that has emerged in recent years focusing on how families respond to various transitions and stressful life events Understanding Marriage, Family, and Intimate Relationships Jerry D. Lehman, 2005 This introductory textbook is for students who are interested in learning about and establishing healthy marriage family and intimate relationships With divorce rates high and relationships fragile books and courses are needed that help students address important issues regarding relationships The readers of this text examine many important and relevant issues through the lens of theory and research and do so using a written format that is readable understandable and easy to apply to one's life It was written so that each chapter has information that readers will find helpful as they attempt to establish and maintain meaningful healthy relationships There are questions throughout each chapter that help readers focus not only on the material but also on how the material relates to their present and past relationship and family situations The text provides material on the research of John Gottman the object relations theory of Harville Hendrix the solution focused approach of Michele Weiner Davis and the PREP approach to conflict management of Markman Stanley and Blumberg These and other topics discussed are very relevant to students concerns and are addressed in greater depth than found in most other texts The emphasis is not just on couple relationships but also on family relationships Therefore in this book there is extensive coverage of family systems theory and the influence of family rules and family structure on the development of families There is also material on how change produces transitions in family life that must be assimilated into the family structure for example when a couple has their first child Thus both couple and family issues are addressed throughout the book For instructors who want to focus their courses on marriage family and intimate relationships this book would be an ideal choice A study guide for students and instructional material for instructors can be obtained by visiting www.understandingrelationships.net *Handbook of Marriage and the Family* Suzanne K. Steinmetz, Marvin B. Sussman, 2013-11-11 The lucid straightforward Preface of this Handbook by the two editors and the comprehensive perspectives offered in the Introduction by one of them leave little for a Foreword to add It is therefore limited to two relevant but not intrinsically related points vis a vis research on marriage and the family in the interval since the first Handbook Christensen 1964 appeared namely the impact on this research of the politicization of the New Right and of the Feminist Enlightenment beginning in the mid sixties about the time of the first Handbook In the late 1930s Willard Waller noted Fifty years or more ago about 1890 most people had the greatest respect for the institution called the family

and wished to learn nothing whatever about it Everything that concerned the life of men and women and their children was shrouded from the light Today much of that has been changed Gone is the concealment of the way in which life begins gone the irrational sanctity of the home The aura of sentiment which once protected the family from discussion clings to it no more We want to learn as much about it as we can and to understand it as thoroughly as possible for there is a rising recognition in America that vast numbers of its families are sick from internal frustrations and from external buffeting We are engaged in the process of reconstructing our family institutions through criticism and discussion 1938 pp 3 4 *The Oxford Handbook of Family Policy Over the Life Course* Mary Daly, Birgit Pfau-Effinger, Neil Gilbert, Douglas J. Besharov, 2023 Drawing on a multidisciplinary group of experts from many countries this Handbook is intended to be a reference work that provides students and scholars in policy related disciplines a wide ranging perspective on the diverse ways that family policies respond to modern issues and trends over the life course The Handbook is divided into two main parts The first part offers a panoramic introduction to the setting and issues which contemporary family policies have been designed to address The second part and main body of the volume is organized around four benchmark periods that encompass the main stages of the family life cycle and social policies that are called into play during these stages

Polygamous Marriages in Peninsular Malaysia Norani Othman, Yaso Nadarajah, Rozana Mohd Isa, 2025-04-28 This book presents the first national study of the practice of polygamy undertaken amongst Malay Muslims contextualised within the broader social legal and political context of Malaysia A collaboration between the Sisters in Islam NGO and three universities in Malaysia it examines the perspectives of both men and women through quantitative and qualitative data analysis of over 1 200 surveys and more than 60 in depth interviews charting the legal financial social and emotional impacts of polygamy It incorporates both progressive Islamic scholarly thought and the unique sociologically rich perspectives of the study respondents In doing so the data serves to strengthen advocacy for awareness and law reforms within Islamic jurisprudence frameworks and institutions As one of the most comprehensive surveys ever conducted on polygamy in a Muslim society this represents a major tour de force within a little explored field with tremendous potential for societal impact This book is relevant to academics and graduate students seeking a deeper understanding of the issues related to Muslim polygamous marriage and to researchers within the broader fields of gender studies family studies Islamic studies and Islamic legal studies It is also a landmark resource for activists and policymakers seeking to advocate on behalf of marginalised groups particularly women and children in polygamous families

Making Marriage Work Rob Pascale, Louis H. Primavera, 2016-02-23 Staying happily married has become a difficult proposition in recent times Although the institution is still firmly embedded in our culture divorce rates have steadily climbed since the 1960s While some marriages are truly divorce worthy many other broken marriages can be saved Recent emphasis on personal needs and greater social acceptance of divorce and alternative lifestyles may have weakened the resolve of partners to work through their problems Furthermore many couples may not realize that problems in their current marriages

are likely to surface in other relationships. Consequently while they may consider divorce a solution it may in fact only be a stepping stone to the next relationship where patterns may repeat. Solving marital differences can be difficult. They tend to be linked to or caused by other problems and that can make it hard to identify the real reasons for conflicts. Without knowing the true nature of their problems couples cannot arrive at solutions that actually work. To understand the underlying issues that plague many marriages the authors look to the research conducted on the subject over the past fifty years and to real life stories of success and failure to outline the major issues that detract from marital stability. Drawing on Louis Primavera's twenty five years in private practice as a marriage counselor each chapter is peppered with anecdotes that every married person can relate to and that help bring issues to life. The authors also propose frank and honest solutions that can help couples have more satisfying relationships. Anyone looking to improve their marriage will find suggestions for sussing out the underlying problems they may be experiencing and guidance for addressing those problems.

Family law in contemporary Iran Marianne Bøe, 2015-01-20 Passed into law over a decade before the Revolution the Family Protection Law quickly drew the ire of the conservative clergy and the Ayatollah Khomeini in 1979. In fact it was one of the first laws to be rescinded following the revolution. The law was hardly a surprising target however since women's status in Iran was then and continues now to be a central concern of Iranian political leaders, media commentators and international observers alike. Taking up the issue of women's status in a modern context Marianne Boe offers a nuanced view of how women's rights activists assert their rights within an Islamic context by weaving together religious and historical texts and narratives. Through Her substantial fieldwork and novel analysis Boe undermines both the traditional view of Islamic Feminism as monolithic and clears a path to a new understanding of the role of women's rights activists in shaping and synthesizing debates on the shari'a, women's rights and family law. As such this book is essential for anyone studying family law and the role of women in contemporary Iran.

Adulthood Rita M. Curl-Langager, 2024-04-29 *Adulthood: An Introduction* offers a thorough foundation to learn, consolidate, and apply developmental concepts and current knowledge to the psychology of adult development. It illustrates major ideas with carefully selected research that is widely referenced and topically pertinent to development in early, middle, and late adulthood. This comprehensive text reviews the five domains of development, including biological development, cognitive development, personality development, social development, and ecological influences in development. It introduces multicultural perspectives and contexts in these discussions, as well as developmental themes such as nature and nurture, early and later experiences, and the individual's active role. Accompanied by learning objectives and section reviews, vignettes portray numerous adult experiences, and commentaries for students offer additional information and interpretation with the student's perspective in mind. Designed to encourage students to think critically about topics of adulthood in both academic and applied settings, *Adulthood* is appropriate for undergraduate students in psychology and related disciplines such as addiction studies, speech pathology, criminal justice, nursing, and business. Combined with a complete ancillary package, the book provides activities for individuals and groups, critical thinking questions, vignette-specific questions and responses, perspectives across disciplines, and much more. Additional resources for both students and instructors are available in the book's Support Material.
