Evaluating GSA's First Experience with National Broker Contracts United States. Congress. House. Committee on Transportation and Infrastructure. Subcommittee on Economic Development, Public Buildings, and Emergency Management, 2009 *Understanding the Educational Experiences of Imprisoned Men* Helen Nichols, 2021-02-28

Understanding the Educational Experiences of Imprisoned Men explores how adult male prisoners interpret and give value to their experiences of education presenting an opportunity to consider how education can be beneficial to prisoners including and beyond the enhancement of employability skills While the primary aim for education in prison has been to increase employability skills to prevent reoffending further attention needs to be given to the broader outcomes of educational experiences and the importance of the development of other personal attributes including self confidence empowerment and the ability to engage in positive relationships This book considers how education is also used by men in prison to cope with prison life to reconsider their identity and to develop and maintain relationships It also discusses the relationships that prisoners have with their teachers and other prison staff as well as the relationships that different types of prison staff have between each other In addition the role that education can play in the process of desistance from crime is discussed to provide an understanding of what changes occur in men who participate in educational courses This book will be of interest to not only students and scholars with an interest in imprisonment rehabilitation and criminal justice practice but also educationalists those who work in the prison setting and in social work It may also appeal to those involved in community development programmes and broader sociological research **Language Experience and Early Language**

Development Margaret Harris, 1992 Addresses one debate in language development namely the relationship between children s language development and their language experience Experience on the Edge: Theorizing Liminality Brady Wagoner, Tania Zittoun, 2021-10-19 Liminality has become a key concept within the social sciences with a growing number of publications devoted to it in recent years The concept is needed to address those aspects of human experience and social life that fall outside of ordered structures In contrast to the clearly defined roles and routines that define so much of industrial work and economic life it highlights spaces of transition indefiniteness ambiguity play and creativity Thus it is an indispensable concept and a necessary counterweight to the overemphasis on structural influences on human behavior This book aims to use the concept of liminality to develop a culturally and experientially sensitive psychology This is accomplished by first setting out an original theoretical framework focused on understanding the liminal sources of cultural experience and second an application of concept to a number of different domains such as tourism pilgrimage aesthetics children s play art therapy and medical diagnosis Finally all these domains are then brought together in a concluding commentary chapter that puts them in relation to an overarching theoretical framework This book will be useful for graduate students and researchers in cultural psychology critical psychology psychosocial psychology developmental psychology health psychology anthropology

WORDEN,J. SWAZEY,G. ADELMAN,2012-12-06 To commemorate properly the 70th birthday of a man who by his very nature is too busy to pause for any kind of ceremonial event unless it has a concomitant functional output was a difficult problem for the Staff and Associates of the Neurosciences Research Program Frank F O S has always dreaded the prospect that sometime it might be appropriate for his colleagues to present him a Fest schrift In fact Fest me no Schriften became his battle cry expressing his feeling that the idea of testimonials clustered into a book was anathema So the breakthrough idea for the planners was to organize a symposium around the theme of discovery in neuroscience that would be valuable scientifically and in its demonstration of interdisciplinary interaction would support that emphasis in Frank s career After much planning a program was developed beginning with a birthday party the evening before followed by the two day symposium and closing with the first F O Schmitt Lecture in Neuroscience We hope that publication of the scientific proceedings in this volume will be of interest not only to the neuroscience community but also to a broad general readership

interested in discovery understanding and the creative processes in scientific work An organizing committee chaired by Fred Worden collected advice and guidance leading to the selection of speakers whose scientific careers have played an important part in the recent history of modern neuroscience Rivers United States. Steamboat-Inspection Service,1926 The Melancholy Lens Tony Pipolo,2021-04-30 The impact of significant loss has exerted a powerful influence on several American avant garde filmmakers The Melancholy Lens offers a detailed look at biographical and psychological factors discernible in the art of Maya Deren Stan Brakhage Gregory Markopoulos Robert Beavers and Ernie Gehr with an aim toward a greater understanding of their work Glue Sniffing & out of Body Experiences William T Stead,2019-08-31 I have written a story about glue sniffing and out of body experiences that occurred during the early seventies Back then I was a teenager who had a difficult upbringing with many factors causing a chaotic life Through all of this I learned the potentials of a stimulant combined with mind control It was my first use of any kind of drug and unintentionally it took me on a journey of discovery There are two main abilities one has to overcome in order to experience OBEs The first is telepathic speech construction and application The ability to communicate is immensely important and allows you to utilise the learning process The second is manipulation of the visual environment When this has been achieved I attained a separation of the soul from the body to a state I call the third level In this plane I had a guide called Gong he is of alien origin and my mentor My time in the third phase lasted around one year in which I experienced technologies far in advance of mankind To summarise part of the outstanding events I have seen thirteen UFO s on three different occasions not on drugs witnessed scenes from my own future in detail I was permitted to see the left hand side of my soul I have been in the same room as an alien Events of this nature although exceptional are not the main point of the story I was asked to write of my experiences in the spirit plain At the time my education was close to semi literacy and through a combination of learning and patience feel it is the right time to fill an agreement The Varieties of Religious Experience William James,2023-11-17 In William James The Varieties of Religious Experience the author delves into the subjective nature of religious experiences emphasizing individual perspectives and the diversity of religious beliefs and practices Through a collection of lectures James explores the psychological aspects of religion drawing on a wide range of examples to illustrate his points The book is written in a clear and engaging style making it accessible to both scholars and general readers interested in the intersection of psychology and religion Published in 1902 The Varieties of Religious Experience is considered a seminal work in the field of religious studies and continues to be referenced by scholars today William James a pioneer in psychology and philosophy was influenced by his own personal experiences with religion which inspired him to explore the ways in which individuals interpret and experience the divine This book is recommended for anyone seeking a deeper understanding of the complexities of religious belief and the human psyche A measure of the Self Hari Prasad Bangalore,2019-05-06 The whole Creation is a spiritual system How to understand this Life has to be lived forward but understood backward In this Creation everything leads to

something That something leads to something further That something significant leads us to something Ultimate But the sure way to lose sight of spirituality in the Creation is to take everything for granted That's how we lost sight of valuable clues already The rarest miracle is to be born as an awakened human being Science is required for the welfare of the world and spirituality is required for the wellbeing of mankind Human beings need to be guided very responsibly We have to inquire into the spiritual dimension of Creation by serious contemplation even while science is on a romantic trip with cognizable phenomena Simple awareness takes us to a higher pedestal of awakening a hyper awareness This is awakening Ordinarily we lead to three kinds of lives One the life we want to lead two the life we are leading three the life we should be leading Through Sadhana we can narrow the gap and make life and more purposeful God limits Himself to the limits of our understanding

Religion, Spirituality and the Near-Death Experience Mark Fox, 2003-12-16 Through the Valley of the Shadow of Death is a dramatic and sustained response to decades of research into near death experiences NDEs the first to credibly bridge the gap between the competing factions of science and spirituality

The Transportation Experience William L. Garrison, David M. Levinson, 2014-03 The Transportation Experience explores the historical evolution of transportation modes and technologies The book traces how systems are innovated planned and adapted deployed and expanded and reach maturity where they may either be maintained in a polished obsolesce often propped up by subsidies be displaced by competitors or be reorganized and renewed An array of examples supports the idea that modern policies are built from past experiences William Garrison and David Levinson assert that the planning and control of nonlinear unstable processes is today's central transportation problem and that this is universal and true of all modes Modes are similar in that they all have a triad structure of network vehicles and operations but this framework counters conventional wisdom Most think of each mode as having a unique history and status and each is regarded as the private playground of experts and agencies holding unique knowledge operating in isolated silos However this book argues that while modes have an appearance of uniqueness the same patterns repeat systems policies structures and behaviors are a generic design on varying modal cloth In the end the illusion of uniqueness proves to be myopic While it is true that knowledge has accumulated from past experiences the heavy hand of these experiences places boundaries on current knowledge especially on the ways professionals define problems and think about processes The Transportation Experience provides perspective for the collections of models and techniques that are the essence of transportation science and also expands the boundaries of current knowledge of the field

The Experience of Thomas Jones, who was a Slave for Forty-three Years Thomas H. Jones, 1854

Structuring Mind Sebastian Watzl, 2017 What is attention How does attention shape consciousness In an approach that engages with foundational topics in the philosophy of mind the theory of action psychology and the neurosciences this book provides a unified and comprehensive answer to both questions Sebastian Watzl shows that attention is a central structural feature of the mind The first half of the book provides an account of the nature of attention

Attention is prioritizing it consists in regulating priority structures Attention is not another element of the mind but constituted by structures that organize integrate and coordinate the parts of our mind Attention thus integrates the perceptual and intellectual the cognitive and motivational and the epistemic and practical The second half of the book concerns the relationship between attention and consciousness Watzl argues that attentional structure shapes consciousness into what is central and what is peripheral The center periphery structure of consciousness cannot be reduced to the structure of how the world appears to the subject What it is like for us thus goes beyond the way the world appears to us On this basis a new view of consciousness is offered In each conscious experience we actively take a stance on the world we appear to encounter It is in this sense that our conscious experience is our subjective perspective
