Coping with Crisis Nancy Bermeo,Jonas Pontusson,2012-09-06 The financial crisis that erupted on Wall Street in 2008 quickly cascaded throughout much of the advanced industrial world Facing the specter of another Great Depression policymakers across the globe responded in sharply different ways to avert an economic collapse Why did the response to the crisis and its impact on individual countries vary so greatly among interdependent economies How did political factors like public opinion and domestic interest groups shape policymaking in this moment of economic distress Coping with Crisis offers a rigorous analysis of the choices societies made as a devastating global economic crisis unfolded With an ambitiously broad range of inquiry Coping with Crisis examines the interaction between international and domestic politics to shed new light on the inner workings of democratic politics The volume opens with an engaging overview of the global crisis and the role played by international bodies like the G 20 and the WTO In his survey of international initiatives in response to the recession Eric Helleiner emphasizes the limits of multilateral crisis management finding that domestic pressures were more important in reorienting fiscal policy He also argues that unilateral decisions by national governments to hold large dollar reserves played the key role in preventing a dollar crisis which would have considerably worsened the downturn David R Cameron discusses the fiscal responses of the European Union and its member states He suggests that a profound coordination problem involving fiscal and economic policy impeded the E U's ability to respond in a timely and effective manner The volume also features several case studies and country comparisons Nolan McCarty assesses the performance of the American political system during the crisis He argues that the downturn did little to dampen elite polarization in the U S divisions within the Democratic Party as well as the influence of the financial sector narrowed the range of policy options available to fight the crisis Ben W Ansell examines how fluctuations in housing prices in 30 developed countries affected the policy preferences of both citizens and political parties His evidence shows that as housing prices increased homeowners expressed preferences for both lower taxes and a smaller safety net As more citizens supplement their day-to-day income with assets like stocks and housing Ansell's research reveals a potentially

significant trend in the formation of public opinion Five years on the prospects for a prolonged slump in economic activity remain high and the policy choices going forward are contentious But the policy changes made between 2007 and 2010 will likely constrain any new initiatives in the future Coping with Crisis offers unmatched analysis of the decisions made in the developed world during this critical period It is an essential read for scholars of comparative politics and anyone interested in a comprehensive account of the new international politics of austerity      **Breaking the Silos** Ofra Walter,Phil

Fitzsimmons,Jonathan Kasler,Surekha Routray,2024-08-20 This book offers a new look at well being from a multidisciplinary standpoint Research from industry clearly indicates that factors such as creativity critical awareness well being interdisciplinary understanding of positive psychology and the ability to form strong relationships will determine the viability of organizations as collectively we enter the second half of the twenty first century Thus a sound understanding of how these facets become melded into entrepreneurship the workplace environment and creative innovation is a requirement for individuals in the workplace With a dearth of information about these facets as individual components and as a collective whole this book draws these elements of overall well being into a multidisciplinary focus Thus with chapters covering diverse fields such as philosophy education economics mathematics and medicine the book offers a fresh approach to how positive psychology impacts entrepreneurship      *Coping with Crisis: Europe's Challenges and Strategies* Jale Tosun,Anne

Wetzel,Galina Zapryanova,2016-03-17 How has the economic and financial crisis that started in 2007 affected European integration Observers have been speculating about whether the crisis will ultimately lead to a strengthening or weakening of the European Union This book studies the effects of the crisis on EU policy making and institutional arrangements on one hand and citizens EU attitudes and political parties electoral strategies on the other It concludes that at least in the short run the crisis has overall created an opportunity for European integration rather than an obstacle First it has triggered events of proposed and actual far reaching policy and institutional change Second negative effects on public opinion have not yet systematically translated into tendencies of stagnation or disintegration The book brings together established scholars of European integration whose diverse research expertise contributes to an improved theoretical and empirical understanding of how the economic and financial crisis has affected EU policies institutions and citizens This book was published as a special issue of the Journal of European Integration      **Change the System, Not the Climate!** Dave Holmes,2007
