in the Health Sciences M. Sandra Wood, Ellen Brassil Horak, Bonnie Snow, 2019-12-09 This book first published in 1986 provides a comprehensive and detailed look at online biomedical database searching by end users. Experts fully assess the numerous implications of end user searching and synthesize a wide variety of views and successful practices. By examining the types of users, institutional settings, products used, and applications, this important volume probes the specific variations among programs and provides a solid overview of end user searching in the health science field. The volume includes informative chapters on determining content and structure of online educational materials, training the end user, the issues in implementing end user search systems, and much more. International Dictionary of Library Histories David H.

Stam, 2001-11 Following the format of Fitzroy Dearborn's highly successful International Dictionary of Historic Places and International Dictionary of University Histories, the International Dictionary of Library Histories provides basic information for each institution, location, and holdings, followed by an extensive 1,000-5,000 word essay on its history, as well as a Further Reading list. In addition, the dictionary includes introductory articles on the history of various types of libraries and a library history in various regions of the world. The dictionary profiles more than 200 institutions from around the world, including the world's most important research libraries and other libraries with globally or regionally notable collections, innovative traditions, and significant and interesting histories. The essays take advantage of the growing scholarship of library history to provide insightful overviews of each institution, including not only the traditional values of these libraries but their innovations, as well as developments in automated systems and electronic delivery. The profiles will emphasize the unique materials of research in these institutions: archives, manuscripts, personal and institutional papers. The introductory articles on types of libraries include topics ranging from theological libraries to prison libraries, from the ancient to the digital. An international team of more than 200 leading scholars in the field have contributed essays to the project. **Women's**

Studies Serials Kristin H. Gerhard, 2020-09-23 Women's Studies Serials: A Quarter Century of Development examines the history, growth, and present status of women's studies collections available in the United States and around the world. This text investigates the accessibility to women's studies periodicals, how they are used, and by whom, and identifies areas where further research is needed to help collection managers and librarians make the best selection decisions for their serials collections. Women's Studies Serials will help you choose serials that meet the needs of your patrons and that comply with the limitations of your budget. Offering you charts, tables, and statistical data, Women's Studies Serials covers many topics that will help you build a thorough and accessible women's studies collection or renovate an existing collection, including the problems, influences, and expectations involved in women's studies faculty's daily work with magazines and journals, choosing the best CD-ROM products for women's studies research, based on cost, coverage, content, and recommendations for acquisition techniques, and insights for teaching cataloging in an interdisciplinary dynamic and evolving information environment, examining academic women's studies serials on the World Wide Web, and determining whether they are helpful.
