Finishing The Structure Construction Systems:

Components and Systems Gerald Staib, Andreas Dörrhöfer, Markus Rosenthal, 2013-01-07 Construction systems reduced to the smallest possible number of identical elements have long been used by architects to build structures as well as dismantle and change them as quickly efficiently and economically as possible Think of the architecture of the nomads the Crystal Palace designed by the architect John Paxton for the London World s Fair of 1851 or the modern construction systems of the nineteenth and twentieth centuries in steel concrete and wood Coupled with modern digital planning and production methods modular precast construction systems that are adaptable for many combinations and capable of being combined with one other will play an increasingly important role in architecture in the future The volume *Components and Systems* offers an in depth and clearly organized presentation of the various types of precast building components from semifinished products to building with components open and closed systems and skeleton and panel construction all the way to spatial cell constructions The systems are accompanied by detailed drawings and color photographs Discussions of transporting and assembling the various systems round off the topic and make this book an indispensable practical companion Seit jeher werden in der Architektur auf m glichst wenige gleiche Elemente reduzierte Bausysteme verwendet um m glichst schnell effizient und konomisch ein Bauwerk errichten oder auch abbauen und ver ndern zu k nnen Man denke an die Architektur der Nomaden den Kristallpalast der 1851 anl sslich der in London stattfindenden Weltausstellung von dem Architekten John Paxton entworfen wurde oder die modernen Bausysteme des 19 und 20 Jahrhunderts in Stahl Beton oder Holz Elementierte vorgefertigte f r viele Kombinationen anpassungsf hige und untereinander kombinierbare Systeme werden zuk nftig gekoppelt mit modernen digitalen Planungs und Produktionsmethoden einen immer wichtigeren Aspekt in der Architektur darstellen Der neue Band *Elemente und Systeme* zeigt fundiert und bersichtlich die verschiedenen Arten vorgefertigter Bauteile auf von Halbfabrikaten ber das Bauen mit Komponenten offenen und geschlossenen Systemen Skelett und Paneelbauweisen bis zu Raumzellenkonstruktionen Erg nzt werden die Systeme durch detaillierte Zeichnungen und Farbfotos Transport und Montage der verschiedenen Systeme runden das Thema ab und machen dieses Buch in der Praxis unverzichtbar

Finishing in Architecture Paul Emmons, Marcia Feuerstein, Negar Goljan, 2025-06-30 *Finishing in Architecture* *Polishing Completing Ending* explores the topic of finishing and the fascinating physical and metaphysical implications of its various conceptions in architecture Finishing is essential to all human practices and concepts of time yet simultaneously it is largely impossible to identify an entirely finished state of being As mortals we organize our worlds into

beginnings and endings starts and finishes Architecture's temporality however may contain something of both the mortal and immortal within it a desire for permanence combined with lamentation over its impossibility While many approaches to finishing construct two opposed ontological conditions the finished and the unfinished this dualistic ploy neglects the complexity of architectural practice cultural reception and historiographic shifts in semiotics during the lifetime of a building More nuanced approaches are examined in this collection of 38 essays and creative works from a diverse group of scholars architects and artists who conceptualize finishing not simply as a final outcome but as an extended action a mood that presumes an end is near all the while working continuously toward but never achieving completion It is here that the concept of finishing is not a state of being but a state of becoming as an active thickening of time when the end is thought to be imminent but not yet attained Finishing more than a final endpoint is a void state that is extended through efforts framing its territory while never quite containing it From the material to the procedural and the conceptual this volume explores the practices of finishing in architecture within three currents surfaces projects and most broadly architectural times It will be of interest to students and instructors of architecture and design architectural historians and other scholars
