Alfred,2012-12-06 This book was written to myself at about the time I began graduate studies in anthropology the sort of thing a Samuel Beckett character might do It is about the conduct of research In a very real sense the purpose is partially to compensate for the inadequacies of my professors Perhaps this is what education is about The effort has not been an unqualified success but it has been extremely gratifying I was trained in anthropology After completing the Ph D I went to Stanford on a post doctoral fellowship At the time this was a novelty and the depart ment was not prepared for such a thing To stay occupied I began attending lectures

seminars and discussion groups in mathematics and statistics This was about the luckiest choice I ever made The excitement was easily as intense as that which I experienced upon encountering anthropology On one occasion I innocently and independently proved a theorem that had first been done 2000 years earlier It is currently used as an exercise in high school mathematics so it is neither difficult nor arcane Learning all this did not tarnish my sense of discovery On reflection I am puzzled by my failure to have seen all this beauty when I was exposed to it as an undergraduate The unparalleled excellence of the Stanford program was undoubtedly responsible for my belated conversion
