Firearms and Violence National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Law and Justice, Committee to Improve Research Information and Data on Firearms, 2004-12-13 For years proposals for gun control and the ownership of firearms have been among the most contentious issues in American politics For public authorities to make reasonable decisions on these matters they must take into account facts about the relationship between guns and violence as well as conflicting constitutional claims and divided public opinion In performing these tasks legislators need adequate data and research to judge both the effects of firearms on violence and the effects of different violence control policies Readers of the research literature on firearms may sometimes find themselves unable to distinguish scholarship from advocacy Given the importance of this issue there is a pressing need for a clear and unbiased assessment of the existing portfolio of data and research Firearms and Violence uses conventional standards of science to examine three major themes firearms and violence the quality of research and the quality of data available The book assesses the strengths and limitations of current databases examining current research studies on firearm use and the efforts to reduce unjustified firearm use and suggests ways in which they can be improved Firearms & Violence in American Life George D. Gary Kleck, 2017-07-12 By 1990 there were approximately 200 million guns in private hands in the United States and around half of American households contained a gun Over 30 000 people a year are killed with guns in suicides homicides and accidents and Americans use guns for defensive purposes as many as a million times a year There is little doubt that gun violence and control are issues of vital importance and they continue to inspire national debate It is doubtful however that most gun debates are worth listening to Not surprisingly they generally leave their participants exactly where they began with their biases intact and onlookers perplexed Written deliberately to counter an atmosphere of hysteria and extremism Point Blank now in paperback offers logical argument supported by empirical information It confronts fundamental questions head on On its initial publication in 1993 Point Blank won the Michael J Hindelang Award of the American Society of Criminology for the book that made the most outstanding contribution to criminology Point Blank reports both original research and assesses existing evidence drawn from a wide variety of academic disciplines including criminology sociology law and medicine

*Guns and Violence* Joyce Lee Malcolm, 2009-06-01 Behind the passionate debate over gun control and armed crime lurk assumptions about the link between guns and violence Indeed the belief that more guns in private hands means higher rates of armed crime underlies most modern gun control legislation But are these assumptions valid Investigating the complex and controversial issue of the real relationship between guns and violence Joyce Lee Malcolm presents an incisive thoroughly researched historical study of England whose strict gun laws and low rates of violent crime are often cited as proof that gun control works To place the private ownership of guns in context Malcolm offers a wide ranging examination of English society from the Middle Ages to the late twentieth century analyzing changing attitudes toward crime and punishment the impact of war economic shifts and contrasting legal codes on violence She looks at the level of armed crime in England before its modern restrictive gun legislation the limitations that gun laws have imposed and whether those measures have succeeded in reducing the rate of armed crime Malcolm also offers a revealing comparison of the experience in England experience with that in the modern United States Today Americans own some 200 million guns and have seen eight consecutive years of declining violence while the English prohibited from carrying weapons and limited in their right to self defense have suffered a dramatic increase in rates of violent crime This timely and thought provoking book takes a crucial step in illuminating the actual relationship between guns and violence in modern society

**Priorities for Research to Reduce the Threat of Firearm-Related Violence** National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Law and Justice, Institute of Medicine, Executive Office, Institute of Medicine, Committee on Priorities for a Public Health Research Agenda to Reduce the Threat of Firearm-Related Violence, 2013-11-03 In 2010 more than 105 000 people were injured or killed in the United States as the result of a firearm related incident Recent highly publicized tragic mass shootings in Newtown CT Aurora CO Oak Creek WI and Tucson AZ have sharpened the American public's interest in protecting our children and communities from the harmful effects of

firearm violence While many Americans legally use firearms for a variety of activities fatal and nonfatal firearm violence poses a serious threat to public safety and welfare In January 2013 President Barack Obama issued 23 executive orders directing federal agencies to improve knowledge of the causes of firearm violence what might help prevent it and how to minimize its burden on public health One of these orders directed the Centers for Disease Control and Prevention CDC to along with other federal agencies immediately begin identifying the most pressing problems in firearm violence research The CDC and the CDC Foundation asked the IOM in collaboration with the National Research Council to convene a committee tasked with developing a potential research agenda that focuses on the causes of possible interventions to and strategies to minimize the burden of firearm related violence Priorities for Research to Reduce the Threat of Firearm Related Violence focuses on the characteristics of firearm violence risk and protective factors interventions and strategies the impact of gun safety technology and the influence of video games and other media

**Gun Culture or Gun Control?** Peter

Squires,2012-12-06 In 1996 the shooting and killing of 16 young children in a Dunblane primary school provoked wide reaching parliamentary reform to British gun laws Within months virtually all privately owned handguns had been outlawed Gun Culture or Gun Control presents the first substantial analysis of the social and political reactions to events in Dunblane and also examines many of the wider issues relating to gun control in the United Kingdom Rigorously comparative throughout Peter Squires provides a non partisan exploration of the differences between attitudes to firearms and their control in Britain and in the United States Amongst the topics the author considers are the social history of firearms on both sides of the atlantic the differing policy directions adopted in Britain and the USA media coverage of the gun question firearms and policing the future of the gun in society

*Reducing Gun Violence in America* Daniel W. Webster,Jon S.

Vernick,2013-01-25 The staggering toll of gun violence which claims 31 000 U S lives each year is an urgent public health issue that demands an effective evidence based policy response The Johns Hopkins University convened more than 20 of the world s leading experts on gun violence and policy to summarize relevant research and recommend policies that are both constitutional and have broad public support Collected for the first time in one volume this reliable empirical research and legal analysis will help lawmakers opinion leaders and concerned citizens identify policy changes to address mass shootings along with the less publicized gun violence that takes an average of 80 lives every day Selected recommendations include Background checks Establish a universal background check system for all persons purchasing a firearm from any seller High risk individuals Expand the set of conditions that disqualify an individual from legally purchasing a firearm Mental health Focus federal restrictions on gun purchases by persons with serious mental illness on the dangerousness of the individual Trafficking and dealer licensing Appoint a permanent director to ATF and provide the agency with the authority to develop a range of sanctions for gun dealers who violate gun sales or other laws Personalized guns Provide financial incentives to states to mandate childproof or personalized guns Assault weapons and high capacity magazines Ban the future sale of

assault weapons and the future sale and possession of large capacity ammunition magazines Research funds Provide adequate federal funds to the Centers for Disease Control and Prevention National Institutes of Health and National Institute of Justice for research into the causes and solutions of gun violence The book includes an analysis of the constitutionality of many recommended policies and data from a national public opinion poll that reflects support among the majority of Americans including gun owners for stronger gun policies      Guns and Violence Laura K. Egendorf,2005 Gun related violence is an issue that grips most American communities The authors in this book debate whether gun violence is a serious problem what measures can reduce violent incidents the constitutionality of gun control and whether guns are the best tool for self defense      *Promising Strategies to Reduce Gun Violence* David I. Sheppard,1999      **At Gunpoint** Dr Rahn Kennedy Bailey,2018-08-13 Firearms violence is as American as apple pie in a country where the right to bear arms is enshrined in the U S Constitution Yet our forefathers could not have imagined armor piercing bullets automatic assault rifles in the hands of criminals and suspects using such weapons to kill concert attendees church goers and school children Dr Rahn Bailey and his coauthors take a hard look at firearm violence from the seat of a medical professional the issues behind such violence and finally how the medical community should be responding to such issues There is a notion by some pushed by the National Rifle Association that the only way to stop a bad guy with a gun is a gun is a good guy with a gun Dr Bailey and his colleagues take on that notion head on His has seen firearm violence up close as a physician and what it does to the victim and everyone around him or her As an African American psychiatrist Dr Bailey has something to say on the subject that is authoritative noteworthy and one many should hear There is a prevailing feeling among some that bringing more guns into a situation will actually make an area or situation safer That simply is not true Dr Bailey s book will examine the impact of suicide and guns active shooters how guns are used interpersonally Many are dying needlessly simply because guns have been introduced into a situation That does not mean fist fights do not lead to deaths or conflicts with knives bats rocks etc will leave people dead When someone can take a weapons that can fire off hundreds of rounds of ammunition in minutes even seconds victims have little chance to survive much less fight back Gun violence is a health care issue and must be acknowledged as such researched and treated in such a manner Dr Bailey and his colleagues will make that case in the following pages      In the Line of Fire Joseph Francis Sheley,James D. Wright, Their findings confirm the prevalence of firearms in these selected populations but challenge a number of common stereotypes concerning gun possession and use by juveniles Fear rather than the needs of criminal activity drug trafficking and gang affiliation motivates juveniles to arm themselves The authors urge a policy aimed at reducing such motivation rather than attempting to remove guns from the hands of youth      Under the Gun Peter H. Rossi,2017-09-29 In 1978 the Social and Demographic Research Institute of the University of Massachusetts Amherst received a grant from the National Institute of Justice to undertake a comprehensive review of the literature on weapons crime and violence in the United States The purpose of the project is best described as a sifting and winnowing of

the claims and counterclaims from both sides of the Great American Gun War the perennial struggle in American political life over what to do if anything about guns about violence and about crime The review and analysis of the available studies consumed the better part of three years the results of this work are contained in this volume The intention of any review is to take stock of the available fund of knowledge in some topical area Under the Gun is no different our goal has been to glean from the volumes of previous studies those facts that in our view seem firmly and certainly established those hypotheses that seem adequately supported by or at least approximately consistent with the best available research evidence and those areas or topics about which it seems we need to know a lot more than we do One of our major conclusions can be stated in advance despite the large number of studies that have been done many critically important questions have not been adequately researched and some of them have not been examined at all Much of the available research in the area of weapons and crime has been done by advocates for one or another policy position As a consequence the manifest intent of many studies is to persuade rather than to inform We have tried to approach the topic from a purely agnostic point of view treating as an open question what policies should be enacted with regard to gun or crime control Thus we have tried to judge each study on its own merits on the basis of the routine standards normally applied to social scientific research and not on the basis of how effectively it argues for a particular policy direction It would of course be presumptuous to claim that we have set aside all our own biases in conducting this study Whether or not our treatment is fair and objective is clearly something for the reader and not us to decide

Cramer, 2018-10-18 The Behavioral Science of Firearms focuses on applying behavioral science principles and knowledge to inform and improve firearm related policy practice and research The authors provide comprehensive coverage of relevant case law and legal statutes as well as issues pertaining to violence suicide and gun safety Additional topics include civilian firearm ownership suitability considerations for relevant professions such as the military law enforcement and corrections self care and more Concepts are presented via a best practices model that promotes empirically supported decision making Drawing on a range of arenas such as psychology sociology criminal justice and law The Behavioral Science of Firearms is an essential resource for a wide readership including practitioners institutional and law enforcement personnel legislators and academicians and students in fields such as psychology criminal justice and public health
