## **Firecracker Boys:**

Bulletin of the Atomic Scientists ,1995-05 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world      **Nuking Alaska** Peter Dunlap-Shohl,2023-06-27 As if in midcentury Alaska you needed more ways to die From the creator of the critically acclaimed graphic novel My Degeneration A Journey Through Parkinson s comes an unnervingly funny tale of life in Alaska during the tensest times of the Cold War Peter Dunlap Shohl grew up on the front lines of the Cold War in the 1950s and 60s where Alaska residents lived in the shadow of a nuclear arsenal nine times the size of the Soviet Union s This graphic novel recounts the surprising and tragicomic details of the nuclear threats faced by Alaskans including Project Chariot championed by Edward Teller and his firecracker boys in the late 1950s and early 60s the nearly nuclear disaster caused by the Great Alaskan Earthquake of 1964 and the 1971 test of a nuclear warhead on the island of Amchitka Dunlap Shohl shares the terrible consequences that these events and others had for humans and animals alike all in the service of atoms for peace Drawn with Dunlap Shohl s characteristic editorial cartooning style Nuking Alaska is a fast paced reminder of how close we came to total annihilation just a half century ago and how terribly relevant the nuclear threat remains to this day      They Came But Could Not Conquer Diane J. Purvis,2024 In They Came but Could Not Conquer Diane J Purvis reveals the centuries long histories of environmental destruction and settler violence against Alaska Natives and their villages by successive European empires and states Russian British French and American      Project Plowshare Scott Kaufman,2012-12-15 Inspired by President Dwight D Eisenhower s Atoms for Peace speech scientists at the Atomic Energy Commission and the University of California s Radiation Laboratory began in 1957 a program they called Plowshare Joined by like minded government officials scientists and business leaders champions of peaceful nuclear explosions maintained that they could create new elements and isotopes for general use build storage facilities for water or fuel mine ores increase oil and natural gas production generate heat for power production and construct roads harbors and canals By harnessing the power of the atom for nonmilitary purposes Plowshare backers expected to protect American security defend U S legitimacy and prestige and ensure access to energy resources Scott Kaufman s extensive research in nearly two dozen archives in three nations shows how science politics and environmentalism converged to shape the lasting conflict over the use of nuclear technology Indeed despite technological and strategic promise Plowshare s early champions soon found themselves facing a vocal and powerful coalition of federal and state officials scientists industrialists environmentalists and average citizens Skeptical politicians domestic and international pressure to stop nuclear testing and a lack of government funding severely restricted the program By the mid 1970s Plowshare was in the words of one government official dead as a doornail However the thought of using the atom for peaceful purposes remains alive      **The Atomic West** Bruce W. Hevly,John M. Findlay,2011-12-01 The Manhattan Project

the World War II race to produce an atomic bomb transformed the entire country in myriad ways but it did not affect each region equally Acting on an enduring perception of the American West as an empty place the U S government located a disproportionate number of nuclear facilities particularly the ones most likely to spread pollution in western states The Manhattan Project manufactured plutonium at Hanford Washington designed and assembled bombs at Los Alamos New Mexico and detonated the world s first atomic bomb at Alamogordo New Mexico on June 16 1945 In the years that followed the war the U S Atomic Energy Commission selected additional western sites for its work Many westerners initially welcomed the atom Like federal officials they too regarded their region as empty or underdeveloped Facilities to make test and base atomic weapons sites to store nuclear waste and even nuclear power plants were regarded as assets By the 1960s and 1970s however regional attitudes began to change At a variety of locales ranging from Eskimo Alaska to Mormon Utah westerners devoted themselves to resisting the atom and its effects on their environments and communities Just as the atomic age had dawned in the American West so its artificial sun began to set there The Atomic West brings together contributions from several disciplines to explore the impact on the West of the development of atomic power from wartime secrecy and initial postwar enthusiasm to public doubts and protest in the 1970s and 1980s An impressive example of the benefits of interdisciplinary studies on complex topics The Atomic West advances our understanding of both regional history and the history of science and does so with human communities as a significant focal point The book will be of special interest to students and experts on the American West environmental history and the history of science and technology

**The Firecracker Boys** Dan O'Neill, 2007-11-06 In 1958 Edward Teller father of the H bomb unveiled his plan to detonate six nuclear bombs off the Alaskan coast to create a new harbor However the plan was blocked by a handful of Eskimos and biologists who succeeded in preventing massive nuclear devastation potentially far greater than that of the Chernobyl blast The Firecracker Boys is a story of the U S government s arrogance and deception and the brave people who fought against it launching America s environmental movement As one of Alaska s most prominent authors Dan O Neill brings to these pages his love of Alaska s landscape his skill as a nature and science writer and his determination to expose one of the most shocking chapters of the Nuclear Age Amchitka and the Bomb Dean Kohlhoff, 2002 Amchitka and the Bomb reconstructs thoroughly the decision by the Atomic Energy Commission to use Amchitka Island in the Aleutians as a test site for nuclear missile weaponry utterly disregarding the fact that the island was a wildlife refuge It will be an important contribution to environmental and Alaska studies and to national defense studies Stephen Haycox University of Alaska Anchorage

*Provisional Cities* Renata Tyszczyk, 2017-11-02 This book considers the provisional nature of cities in relation to the Anthropocene the proposed geological epoch of human induced changes to the Earth system It charts an environmental history of curfews admonitions and alarms about dwelling on Earth Provisional cities are explored as exemplary sites for thinking about living in this unsettled time Each chapter focuses on cities settlements or proxy urbanisations including past

disaster zones remote outposts in the present and future urban fossils The book explores the dynamic changing and contradictory relationship between architecture and the global environmental crisis and looks at how to re position architectural and urban practice in relation to wider intellectual environmental political and cultural shifts The book argues that these rounder and richer accounts can better equip humanity to think through questions of vulnerability responsibility and opportunity that are presented by immense processes of planetary change These are cautionary tales for the Anthropocene Central to this project is the proposition that living with uncertainty requires that architecture is reframed as a provisional practice This book would be beneficial to students and academics working in architecture geography planning and environmental humanities as well as professionals working to shape the future of cities House of Caravans Shilpi Suneja,2023-09-19 A sweeping and richly evocative debut novel of a family bound by memory and legacy love and loss and a homeland forever changed Lahore British India 1943 As resentment of colonial rule grows so do acts of rebellion Seduced by idealistic visions at seventeen Chhote Nanu is imprisoned for planting a bomb on behalf of the resistance leaving his brother Barre to fight for his freedom But Chhote is consumed not by thoughts of family and liberation but by the beautiful half English woman he met before his arrest Who was she really and who was the child with her Kanpur India 2002 Karan Khatri is studying in the States when his younger sister Ila informs him that their grandfather Barre Nanu has died and asks that he return home When he arrives he finds their estranged mother at odds with their embittered granduncle Chhote As hard truths and harmful legacies of familial and religious prejudice resurface an already fractured family must learn to heal after being driven apart by years of contentious secrets and unresolved heartache Spanning generations Shilpi Suneja s *House of Caravans* is a masterfully told and moving portrayal of a family and a nation divided by the lasting consequences of colonialism What Ever Happened to the Faculty? Mary Burgan,2006-11-24 Publisher description *Deep Cut* Christine Keiner,2020-12-15 This book is openly available in digital formats thanks to a generous grant from the Andrew W Mellon Foundation The Atlantic Pacific Central American sea level canal is generally regarded as a spectacular failure However *Deep Cut* examines the canal in an alternative context as an anticipated infrastructure project that captured attention from the nineteenth through the late twentieth centuries Its advocates included naturalist Alexander von Humboldt physicist Edward Teller and U S presidents John F Kennedy Lyndon Johnson and Jimmy Carter The waterway did not come to fruition but as a proposal it served important political and scientific purposes during different eras especially the years spanning the Cold War and the environmental decade of the 1970s Historian Christine Keiner shows how the evolving plans for the sea level ship canal performed distinct kinds of work for diverse historical actors in light of shifting scientific environmental and diplomatic values Dismissing it as a failed scheme prevents us from considering the political cultural and epistemological processes that went into constructing the seaway as an innovative diplomatic solution to rising U S Panama tensions an exciting research opportunity for evolutionary biologists a superior hydrocarbon highway for the oil industry or a serious

ecological threat to marine biodiversity Invoking past dreams and nightmares of peaceful nuclear explosives invasive sea snakes and the 1970s energy crisis Deep Cut uses the Central American seaway proposal to examine the changing roles of environmental diplomacy and state sponsored environmental impact assessment More broadly Keiner amplifies an emerging conversation around the environmental scientific and political histories and legacies of unrealized megaprojects Judging Edward Teller Istvan Hargittai, Professor and Head of the Structural Chemistry Research Group of the Hungarian Academy of Sciences Istvan Hargittai, 2010-12-31 A personal acquaintance of Teller's presents the definitive balanced portrait of the scientist against the backdrop of a turbulent period of history and reveals the contradictory nature of this complex man in all his strengths flaws and brilliance *The Nuclear-Water Nexus* Per Hogselius, Siegfried Evens, 2025-07-01 An edited collection that takes a deep dive into the complex interactions between nuclear energy and water Splitting atoms is a water intensive business To operate efficiently and safely a standard nuclear reactor needs around 50 cubic meters 13 000 gallons of water per second equivalent to the flow of a mid sized river or large irrigation canal In *The Nuclear Water Nexus* Per Hogselius and Siegfried Evens bring together 25 authors from 12 countries to explore the resulting entanglements between society technology and nature to show how nuclear energy's dependence on water has shaped the atomic age in decisive ways Water has been the key factor in forging a global nuclear geography as the water needs of nuclear facilities require them to be located near the sea major rivers canals or lakes As an unintended consequence of such locations nuclear facilities have become vulnerable to droughts floods erosion and climate change with much higher stakes than most other energy installations Consequently the wet geography of nuclear energy translates into threats to the wet environment in the form of both radioactive contamination and thermal pollution Water has over the years generated social conflicts and cooperation between nuclear energy and other water intensive activities such as agriculture fisheries navigation military activities hydropower production drinking water supply landscaping leisure and tourism and even fossil fuel extraction This book examines these processes through a set of in depth case studies Contributors Elisabetta Bini Kate Brown Peter Burt Joanna L Dyl Siegfried Evens Carlos Gonzalvo Elizabeth Hameeteman Per Hogselius Sonali Huria Roman Khandozhko Achim Klu ppelberg Maximilian P Lau Sabine Loewe Hannatzsch Ana l Marrec Victor McFarland Jan Henrik Meyer Sarah E Robey Diego Sesma Mart n S Duygu Sever Kumar Sundaram Jonathon Turnbull Thomas Turnbull Mar Rubio Varas Agn s Villette Heather Williams **Boots, Bikes, and Bombers** Ginny Wood, 2012-06-15 Born in Washington in 1917 Ginny Hill Wood served as a Women's Airforce Service pilot in World War II and flew a military surplus airplane to Alaska in 1946 Settling in Fairbanks she went on to cofound Camp Denali Alaska's first wilderness ecotourism lodge This title presents an oral history of Ginny Hill Wood Battleground Alaska Stephen Haycox, 2016-04-08 No American state is more antistatist than Alaska And no state takes in more federal money per capita which accounts for a full third of Alaska's economy This seeming paradox underlies the story Stephen Haycox tells in *Battleground Alaska* a history of the fraught dynamic between

development and environmental regulation in a state aptly dubbed The Last Frontier Examining inconvenient truths the book investigates the genesis and persistence of the oft heard claim that Congress has trampled Alaska s sovereignty with its management of the state s pristine wilderness At the same time it debunks the myth of an inviolable Alaska statehood compact at the center of this claim Unique isolated and remote Alaska s economy depends as much on absentee corporate exploitation of its natural resources particularly oil as it does on federal spending This dependency forces Alaskans to endorse any economic development in the state putting them in conflict with restrictive environmental constraint Battleground Alaska reveals how Alaskans abiding resentment of federal regulation and control has exacerbated the tensions and political sparring between these camps and how Alaska s leaders have exploited this antistatist sentiment to promote their own agendas specifically the opening of the Arctic National Wildlife Refuge to oil drilling Haycox builds his history and critique around four now classic environmental battles in modern Alaska the establishment of the ANWR in the 1950s the construction of the Trans Alaska Pipeline in the 1970s the passage of the Alaska National Interests Lands Conservation Act in 1980 and the struggle that culminated in the Tongass Timber Reform Act of 1990 What emerges is a complex tale with no clear cut villains and heroes that explains why Alaskans as a collective almost always opt for development even as they profess their genuine love for the beauty and bounty of their state s environment Yet even as it exposes the potential folly of this practice Haycox s work reminds environmentalists that all wilderness is inhabited and that human life depends as it always has on the exploitation of the earth s resources

**The Environmental Justice Reader** Joni Adamson, Mei Mei Evans, Rachel Stein, 2022-02-08 From the First National People of Color Congress on Environmental Leadership to WTO street protests of the new millennium environmental justice activists have challenged the mainstream movement by linking social inequalities to the uneven distribution of environmental dangers Grassroots movements in poor communities and communities of color strive to protect neighborhoods and worksites from environmental degradation and struggle to gain equal access to the natural resources that sustain their cultures This book examines environmental justice in its social economic political and cultural dimensions in both local and global contexts with special attention paid to intersections of race gender and class inequality The first book to link political studies literary analysis and teaching strategies it offers a multivocal approach that combines perspectives from organizations such as the Southwest Network for Environmental and Economic Justice and the International Indigenous Treaty Council with the insights of such notable scholars as Devon Pe a Giovanna Di Chiro and Valerie Kuletz and also includes a range of newer voices in the field This collection approaches environmental justice concerns from diverse geographical ethnic and disciplinary perspectives always viewing environmental issues as integral to problems of social inequality and oppression It offers new case studies of native Alaskans protests over radiation poisoning Hispanos struggles to protect their land and water rights Pacific Islanders resistance to nuclear weapons testing and nuclear waste storage and the efforts of women employees of maquiladoras to obtain safer living and working

environments along the U S Mexican border The selections also include cultural analyses of environmental justice arts such as community art and greening projects in inner city Baltimore and literary analyses of writers such as Jimmy Santiago Baca Linda Hogan Barbara Neely Nez Perce orators Ken Saro Wiwa and Karen Yamashita artists who address issues such as toxicity and cancer lead poisoning of urban African American communities and Native American struggles to remove dams and save salmon The book closes with a section of essays that offer models to teachers hoping to incorporate these issues and texts into their classrooms By combining this array of perspectives this book makes the field of environmental justice more accessible to scholars students and concerned readers

*Unfreezing the Arctic* Andrew Stuhl, 2016-11-03 This account of a region transformed and threatened offers a timely historical reflection on the important social role of science and scientists Historical Geography In recent years environmentalists have pointed urgently to the melting Arctic as a leading indicator of climate change While climate change has unleashed profound transformations in the region many commentators mislabel them as unprecedented In reality the landscapes of the North American Arctic as well as relations among scientists Inuit and federal governments are products of the region s colonial past And even as policy analysts activists and scholars clamor about the future of our world s northern rim few truly understand its past In *Unfreezing the Arctic* Andrew Stuhl brings a fresh perspective to this defining challenge of our time Stuhl weaves together a wealth of episodes into a transnational history of the North American Arctic providing a richer understanding of its social and environmental transformation Drawing on historical records and extensive ethnographic fieldwork as well as time spent living in the Northwest Territories he examines the long running interplay of scientific exploration colonial control the experiences of Inuit residents and multinational investments in natural resources With a comprehensive look at a century of scientific activity he covers the political economic environmental and social history of this transboundary region A worthy addition to the recent wave of work on northern history Bridging the histories of colonialism resource management military activity and Indigenous self determination Stuhl focuses on Alaska and northwest Canada including the Beaufort Sea Mackenzie Delta and surrounding region Canadian Journal of History The author intends to donate all royalties from this book to the Alaska Youth for Environmental Action AYE and East Three School s On the Land Program

**Wildfire and Americans** Roger G. Kennedy, 2007-04-15 Three years after Roger Kennedy retired as director of the National Park Service from his Santa Fe home he watched as the Cerro Grande Fire moved across the Pajarito Plateau and into Los Alamos Two hundred and thirty five homes were destroyed more than 45 000 acres of forest were burned and the nation s nuclear laboratories were threatened even before the embers had died a blame game erupted Kennedy s career as a public servant which encompasses appointments under five presidential administrations convinced him that the tragedy would produce scapegoats and misinformation and leave American lives at risk That was unacceptable even unforgivable *Wildfire and Americans* is a passionate deeply informed appeal that we acknowledge wildfire not as a fire problem but as a people problem Americans

are in the wrong places damningly because they were encouraged to settle there Politicians scientists and CEOs acting out of patriotism hubris and greed have placed their fellow countrymen in harm s way And now with global warming we inhabit a landscape that has become much more dangerous Grounded in the conviction that we owe a duty to our environment and our fellow man Wildfire and Americans is more than a depiction of policies gone terribly awry It is a plea to acknowledge the mercy we owe nature and mankind

**Pathways to the Present** Mansel G. Blackford, 2007-02-28 Ranging from the Hawaiian Archipelago to the Aleutian Islands from Silicon Valley to Guam Pathways to the Present is a thoroughly researched and concisely argued account of economic and environmental change in the postwar American Pacific Following a brief survey of the history of the Pacific the author takes the Hawaiian Islands as the center of American activities in the region and looks at interactions among native Hawaiian developmental military and environmental issues in the archipelago after World War II He then turns to land and water use problems that have intersected with more nebulous quality of life concerns to generate policy controversies in the Seattle region and the San Francisco Bay area especially Silicon Valley Economic expansion and environmentalism in Alaska are examined through the lens of changes occurring along the Aleutians From there the study considers Hiroshima after its destruction by the atomic bomb in 1945 looking at residents desire to combine urban planning concepts The author investigates the effort to remake Hiroshima as a high tech city in the 1990s an attempt inspired by the perceived success of Silicon Valley and postwar planning on Okinawa where American influences were particularly strong The final chapter takes into account issues raised on Guam regarding the growth of tourism and the use of the island for military purposes and links these to developments in the Philippines to the west and American Samoa to the south
