Cyber-Development, Cyber-Democracy and Cyber-Defense Elias G. Carayannis, David F. J. Campbell, Marios Panagiotis Efthymiopoulos, 2014-08-14 In this volume contributors from academia industry and policy explore the inter connections among economic development socio political democracy and defense and security in the context of a profound transformation spurred by globalization and supported by the rapid development of information and communication technologies ICT This powerful combination of forces is changing the way we live and redefining the way companies conduct business and national governments pursue strategies of innovation economic growth and diplomacy Integrating theoretical frameworks empirical research and case studies the editors and contributors have organized the chapters into three major sections focusing on cyber development cyber democracy and cyber defense The authors define cyber development as a set of tools methodologies and practices that leverage ICT to catalyze and accelerate social political and economic development with an emphasis on making the transition to knowledge based economies One underlying understanding here is that knowledge knowledge creation knowledge production and knowledge application innovation behave as crucial drivers for enhancing democracy society and the economy By promoting dissemination and sharing of knowledge cyber democracy allows a knowledge conversion of the local into the global gloCal and vice versa resulting in a gloCal platform for communication and knowledge interaction and knowledge enhancement Meanwhile technology enabled interconnectivity increases the need to adopt new methods and actions for protection against existing threats and possible challenges to emerge in the future The final section contemplates themes of cyber defense and security as well as emerging theories and values legal aspects and trans continental links NATO international organizations and bilateral relations between states Collectively the authors present a unique collection of insights and perspectives on the challenges and opportunities inspired by connectivity

e-Development Toward the Knowledge Economy E. Carayannis, C. Sipp, 2005-12-15 Profiling Smart Development A thorough comparative empirical review of real and best e Development policies and practices towards the Knowledge Economy Based on the analysis of policies practices and empirical development case studies this book provides a methodology for matching development stage and development strategy identifying best and real policies and practices for the most appropriate use of information and communication technologies ICT and knowledge to foster innovation and entrepreneurship and trigger catalyze and accelerate sustainable development

Enabling Enterprise Transformation Nagy K. Hanna, 2009-12-11 Private enterprises in advanced economies have been learning to use information and communication technology ICT to innovate and transform their processes products services and business models significantly improving productivity and competitiveness Moreover the ICT industry itself has become a major source of job creation and a contributor to economic growth and business transformation A key question today is whether and how developing countries can learn to benefit from the ICT revolution and what roles the government and private sector can play Already a number of

developing countries have been inspired by the example of India and China and are now seeking to jump on the outsourcing bandwagon Nevertheless with few exceptions in the developing world little attention has been paid by policymakers and practitioners to invest systematically and proactively in ICT enabled growth poverty reduction and grassroots innovation Most communities and small and medium sized enterprises in developing countries for example face multiple constraints to adopting and leveraging this general purpose technology and lack the capabilities for maximizing its potential In *Enabling Enterprise Transformation* Nagy Hanna draws on his rich experience of over 35 years at the World Bank and other aid agencies as a development strategist and ICT policy expert the most current research and best practices from around the world to provide practical tools for promoting economic and social transformation through ICT He assesses various initiatives to develop and diffuse ICT such as innovation funds incubators parks public private partnerships and comprehensive promotion programs He argues for the strategic options now open for developing countries to participate in ICT production to deploy ICT to transform industries and services and to leverage ICT as a new national infrastructure for improving the business environment and enhancing the competitiveness of the whole economy The challenge for leaders in developing countries is to create such social and institutional dynamics for learning about ICT use and adaptation at many levels Lessons gained so far from programs to build these social learning and innovation capabilities at the institutional and grassroots levels should be shared among developing countries and a dialogue among business leaders policymakers development agencies educational institutions and the general citizenry must be advanced

e-Transformation: Enabling New Development Strategies Nagy K. Hanna, 2009-11-11 Could information and communication technology ICT become the transformative tool for a new style of global development Could ICT promote knowledge based innovation driven and smart adaptive participatory development As countries seek a way out of the present period of economic contraction they are trying to weave ICT into their development strategies in the same way organizations have learned to use ICT to transform their business models and strategies This integration offers a new path to development that is responsive to the challenges of our times In *e Transformation* Nagy Hanna identifies the key ingredients for the strategic integration of ICT into national development with examples from around the world He draws on his rich experience of over 35 years at the World Bank and other aid agencies to outline the strategic options involved in using ICT to maximize developmental impact transforming public service institutions networking businesses for innovation and competitiveness and empowering communities for social inclusion and poverty reduction He identifies the key interdependencies in e transformation and offers a holistic framework to tap network effects and synergies across all elements of the process including leadership cyber policies institutions human resources technological competencies information infrastructure and ICT uses for government business and society Integrating analytical insights and practical applications across the fields of development political economy public administration entrepreneurship and technology management the author candidly argues that e transformation like all bold

ideas faces implementation challenges In particular the aspiration reality gap needs to be systematically addressed if ICT enabled innovation and transformation is to become a development practice E transformation is first and foremost about thinking strategically and creatively about the options made possible by the information technology revolution in the context of globalization To this end the author provides tools and best practices designed to nurture innovation select entry points prioritize among competing demands and sequence and scale up He outlines the roles of all participants political managerial entrepreneurial social and technical whose leadership is essential for successful innovation

Technological Learning for Entrepreneurial Development (TLED) in the Knowledge Economy (Ke) Elias G. Carayannis, Denisa Popescu, Caroline Mélanie Sipp, McDonald Stewart, 2009

The role of technological learning and ICT information and communication technologies are explored especially in relation to the ways in which these foster entrepreneurial development in the knowledge economy A conceptual framework is developed comparing initiatives policies and practices in economies at different levels of development The research assesses the means to promote learning and entrepreneurship including a variety of real and virtual intra structures and infra technologies Locating knowledge as a crucial factor of economic activity the study surveys e development business incubators the conjunction of ICT and incubators and technology clusters vs knowledge clusters The three dimensions of analysis of e development in the

knowledge economy include the economic organizational and technology level. These three dimensions of evaluation inform each of the case studies under consideration from developed countries, developing countries and emerging economies. The findings of this study inform recommendations for future development in the knowledge economy and society at large. The findings also point to a number of priorities of new venture formation: ICT and Internet access, connections with investors and lenders, competent and experienced management and advisory boards, planning and securing facilities. The identified priorities of new venture formation include the ability to evaluate and respond to risk, the protection of the product, the stimulation of the existing market and the availability of skilled workers. Recommendations for the development of both public and private policy are made.

CBS The New Economy in Development A. D'Costa, 2006-09-05. The Role of Business Incubators in the Economic Growth of India Apoorv R. Sharma, Balvinder Shukla, Manoj Joshi, 2019-07-08. To study the role of business incubators in the economic growth of India, it is imperative to understand whether or not incubators reduce the mortality of start-ups. Are incubators instrumental in providing an effective platform for accelerating the growth of start-ups? Do the existing incubators meet the expectations of start-ups? Are incubated start-ups able to attract funding from venture capitalists? These are only some of the questions that fall within the scope of this research. In this book, the authors explore the subject in depth in an attempt to respond to them. For the purpose of this study, primary and secondary research data were used. In the context of American, European and Chinese incubator industries, this data was readily available. However, due to its nascent stage, there was not enough secondary data available in the context of the Indian incubation industry. Therefore, primary research was carried out. Thus, in order to design the research, structured interviews with the founders of start-ups and incubator managers were conducted. The findings of the study reveal that despite the gaps between the offering of incubators and the expectations of start-ups, there is a positive impact of business incubators on job creation, wealth generation and the creation of intellectual property.

Creative Regions Philip Cooke, Dafna Schwartz, 2008-03-25. This unique book focuses on regional creativity, analysing the different factors that can affect creativity and innovation process within regions in the knowledge economy. Approaching creativity from technological, organizational and regional viewpoints, it attempts to break down the influence of oppositional approaches and take account of multi-level interactions in economy and policy. The variety of papers presented looks at how regions can be creative and competitive, how research and development is outsourced and the scientific knowledge and technology transferred, what types of technology-based cultural activities can operate, the relevant financing and development of knowledge entrepreneurship. Whilst many of these aspects are driven by market forces, Creative Regions demonstrates that the regional and national public sectors have a significant role to play and is essential reading on how to
