Religion and State Formation in Postrevolutionary Mexico Ben Fallaw, 2013-01-21 The religion question the place of the Church in a Catholic country after an anticlerical revolution profoundly shaped the process of state formation in Mexico From the end of the Cristero War in 1929 until Manuel vila Camacho assumed the presidency in late 1940 and declared his faith Mexico's unresolved religious conflict roiled regional politics impeded federal schooling undermined agrarian reform and flared into sporadic violence ultimately frustrating the secular vision shared by Plutarco Elías Calles and Lázaro Cárdenas Ben Fallaw argues that previous scholarship has not appreciated the pervasive influence of Catholics and Catholicism on postrevolutionary state formation By delving into the history of four understudied Mexican states he is able to show that religion swayed regional politics not just in states such as Guanajuato in Mexico's central west Rosary Belt but even in those considered much less observant including Campeche Guerrero and Hidalgo Religion and State Formation in Postrevolutionary Mexico reshapes our understanding of agrarian reform federal schooling revolutionary anticlericalism elections the Segunda a second Cristero War in the 1930s and indigenism the Revolution's valorization of the Mesoamerican past as the font of national identity

Religion and Educational Research David Kabisch, 2019 Religious education is always a local or regional practice This is evident in the studies in the present volume on religion and education The production and the transfer of knowledge in this field are particular and take place in certain historical contexts so that both can be understood as historical processes With regard to these theoretical assumptions the authors of the present volume deliver case studies concerning religious education research in Germany Ireland Sweden Argentina as well as other countries Several questions from these contributions might be relevant for further studies Is religion being underrated in educational research Is education on the other hand being

underrated in religious studies Do these questions depend on national traditions in educational as well as religious research Are there transnational exchanges between countries through networks guilds and media And finally what might be the additional benefits of such research compared to international comparative studies *Religion and Politics* John T. S. Madeley, 2019-07-15 This title was first published in 2003 This subject area of this work cross cuts conventional disciplinary boundaries in the study of comparative politics Connections between religion and politics can be identified in all of the thematic areas covered by the articles within *Revista Estudios Paraguayos* 2019 - 2 Carlos Peris, 2022-07-21

International organizations have consistently influenced education reforms in Latin America but not all countries have adopted the same policy recommendations This book offers a unique comparative analysis of secondary education reforms in Chile Argentina and Colombia from the 1960s to the 2010s with a focus on three key areas manpower planning state retrenchment market based versus active state and ideas about having a right to a quality education in an era of government accountability While responding to similar policy recommendations these countries have differed in how they have implemented decentralization incorporated private actors allocated authority over curriculum and established instruments of accountability Claudia Diaz Rios traces the legacies of previous education policies and local struggles among stakeholders in reshaping and sometimes rejecting foreign recommendations Translating Global Idea will be an invaluable resource for scholars of comparative politics and the globalization of education particularly those interested in policy development in middle and low income countries as well as practitioners invested in promoting education policy changes in Latin America

Liberals, Politics, and Power Vincent C. Peloso, Barbara A. Tenenbaum, 1996

Looking at the Latin American liberal project during the century of postindependence this collection of original essays draws attention to an underappreciated dilemma confronting liberals idealistic visions and fiscal restraints Liberals Politics and Power focuses on the inventiveness of nineteenth century Latin Americans who applied liberal ideology to the founding and maintenance of new states The impact of liberalism in Latin America the contributors show is best understood against the larger backdrop of struggles that pitted regional demands against the pressures of foreign finance a powerful church against a decentralized state and aristocratic desire to retain privilege against rising demands for social mobility Moving beyond the traditional historiographical division between Eurocentric and dependency theories the essays attempt to account for a uniquely Latin American liberal ideology and politics by exploring the political dynamics of such countries as Mexico Colombia Argentina and Peru Contributors discuss liberal efforts to build a viable legal order through elections and to implement a means of public finance that could fund the states operations Essays that span the entire century address issues such as the emergence of caudillos the role of artisans and popular participation in elections in light of fiscal and other impediments to progress In their introduction Vincent C Peloso and Barbara A Tenenbaum provide a hemispheric overview of liberalism that illustrates its similarities across Latin America By exploring the liberal constitutional and economic order lying beneath apparently dictatorial states this pathbreaking volume underlines the importance of fiscal policy in the fashioning of state power Liberals Politics and Power serves not only as a guide to the liberal principles and practices that governed state formation in nineteenth century Latin America but also as a means to evaluate the complex relationship between ideas and practical politics
