Equality in Education, 2014-01-01 Equality in Education Fairness and Inclusion is a scholarly call to action As the book reminds us governments come and go and in doing so they busy themselves with policy to mark their patch Inequality and exclusion remain stubborn foes that are proving to be somewhat impervious to glossy policy pronouncements The change that Hugo Claus calls for requires careful analysis and bold actions The editors have assembled a collection of insightful essays that assist in that project Professor Roger Slee Victoria University Melbourne Australia This book attempts to consider the notion of fairness and inclusion in the context of education from different national perspectives which is a laudable undertaking The Editors have managed to put together a diverse informative and interesting account of equality and fairness that transcends international borders The Editors are to be commended on their remarkable achievement in bringing together so many authors to discuss such an important subject yet producing a cohesive collection of chapters that elucidate the diverse nature of equity in education Professor Divya Jindal Snape University of Dundee UK

Education and Equality Danielle Allen, 2016-06-14 This book features Danielle Allen's 2014 Tanner Lectures delivered at Stanford University along with comments from four distinguished contributors Harvard philosopher Tommie Shelby education and globalization scholar Marcelo Suarez-Villa UCLA Michael Rebell executive director of the Campaign for Educational Equity at Teachers College Columbia and Pulitzer winning playwright Quiara Alegria Hudes along with Allen's response to the commentaries Why it is so hard to think about education and equality in relation to each other Allen asks For all of our talk about the two we don't actually talk much about how education itself relates to equality regardless of whether the equality we have in mind is human political or social or connected to economic fairness The basic problem that motivates these lectures then is the following Allen thinks that education itself a practice of human development has important contributions to make to the defense of human equality the cultivation of political and social equality and the emergence of fair economic orders But she thinks we have lost sight of just how education relates to those egalitarian concerns If we are to do right by the students we purport to educate in whatever context and at whatever level we need to recover that vision Allen's goal therefore is to recover our understanding of just how education and equality are intrinsically connected to each other

Integrations Lawrence Blum, Zoë Burkholder, 2021-05-12 Education plays a central part in the history of racial inequality in America with people of color long advocating for equal educational rights and opportunities Though school desegregation initially was a boon for educational equality schools began to re-segregate in the 1980s and schools are now more segregated than ever In Integrations historian Zoë Burkholder and philosopher Lawrence Blum set out to shed needed light on the enduring problem of segregation in American schools From a historical perspective the authors analyze how ideas about race influenced the creation and

development of American public schools. Importantly, the authors focus on multiple marginalized groups in American schooling: African Americans, Native Americans, Latinxs, and Asian Americans. In the second half of the book, the authors explore what equal education should and could look like. They argue for a conception of educational goods including the development of moral and civic capacities that should and can be provided to every child through schooling, including integration itself. Ultimately, the authors show that in order to grapple with integration in a meaningful way, we must think of integration in the plural, both in its multiple histories and the many possible meanings of and courses of action for integration.

Education, Equality and Society Bryan Wilson, 2023-03-31. Originally published in 1975, the essays in this book explore a particular level at which the concept of equality must be applied if educational equality is to be realised. Whilst each stands independently of the others, there are points of convergence and overlap in the perspectives of the writers, each of whom represents a different discipline: education, sociology, psychology, philosophy, and politics. The relationship between equality and unity, uniformity, and justice are discussed, and at every level, false assumptions are revealed.

Educational Equality Harry Brighouse, 2010-05-18. Considers the philosophical debates surrounding equality and education.

Education, Equality and Human Rights Mike Cole, 2017-10-19. The fourth edition of *Education, Equality and Human Rights* has been fully updated to reflect the economic, political, social, and cultural changes in educational and political policy and practice as austerity continues and in the light of the EU referendum. Written by a carefully selected group of experts, each of the five equality issues of gender, race, sexuality, disability, and social class are covered as areas in their own right as well as in relation to education. Key issues explored include human rights, equality and education, women and equality, historically and now, gender and education, perspectives throughout time, racism in the UK from the Empire to the present, racism and education from imperial times to the May government, the making and remaking of sexualities, the challenges surrounding teaching and learning about sexuality in schools, the struggle for disability equality, inclusive education, social class, Marxism and socialism, social class inequality and education. With an uncompromising and rigorous analysis of education and human rights and a foreword from Professor Peter McClaren, *Education, Equality and Human Rights* is an essential resource across a wide range of disciplines and for all those interested in education, social policy, and human rights.
