**Standing Together** Beverly J. Klug, 2012-11-28 The majority of American Indian students attend public schools in the United States However education mandated for American Indian students since the 1800s has been primarily education for assimilation with the goal of eliminating American Indian cultures and languages Indeed extreme measures were taken to ensure Native students would act white as a result of their involvement with Western education Today's educational mandates continue a hegemonic one size fits all approach to education This is in spite of evidence that these approaches have rarely worked for Native students and have been extremely detrimental to Native communities This book provides information about the importance of teaching American Indian students by bridging home and schools using students cultural capital as a springboard for academic success Culturally Responsive Pedagogy is explored from its earliest beginnings following the 1928 Meriam Report Successful education of Native students depends on all involved and respect for the voices of American Indians in calling for education that holds high expectations for native students and allows them to be grounded in their cultures and languages Culturicide, Resistance, and Survival of the Lakota James V. Language Revitalization Processes and Prospects Kendall A. King, 2001 This work explores educational and community efforts to revitalize the Quichua language in two indigenous Andean communities of southern Ecuador Analyzing the linguistic social and cultural processes of positive language shift this book contributes to our understanding of formal and informal educational efforts to revitalize threatened languages American Book Publishing Record, 2003 and Indian Country Dennis K. Norman, Joseph P. Kalt, 2015-05-07 The book describes the nation building strategy by which an increasing number of Native communities have set about reclaiming powers of self determination strengthening their cultures and developing their economies A piece of this movement has been the establishment of new models for tribally driven and requested relations between universities and American Indian Alaskan Native communities and organizations Building on the Harvard Project on American Indian Economic Development's experience with more than 120 nation building projects over two decades Universities and Indian Country posits that the tenets of nation building can provide a strategy for expanding and diversifying universities perspectives of knowledge in a multicultural world while also producing results that are requested by and useful to Native communities This groundbreaking volume extends the dialogue begun by the Harvard project providing another venue for the sharing of knowledge and information The projects presented address a wide range of topics including the regulation of genetic research human resource development tribal fund raising development of tribal museums and freedom of the press in Indian Country Universities and Indian Country's focus on the concerns and questions of Native communities themselves provides insight not only into how projects came together but also into what significance they have to the tribal partners This compilation is a valuable resource for any student professional or community member concerned with issues of nation building and self determination Democratization and Memories of Violence Mneesha Gellman, 2016-08-05 Ethnic minority communities make claims for cultural rights from states in different ways depending on how governments include them in policies and practices of accommodation or assimilation However institutional explanations don't tell the whole story as individuals and communities also protest using emotionally compelling narratives about past wrongs to justify their claims for new rights protections Democratization and Memories of Violence Ethnic minority rights movements in Mexico Turkey and El Salvador examines how ethnic minority communities use memories of state and paramilitary violence to shame states into cooperating with minority cultural agendas such as the right to mother tongue education Shaming and claiming is a social movement tactic that binds historic violence to contemporary citizenship

Combining theory with empirics the book accounts for how democratization shapes citizen experiences of interest representation and how memorialization processes challenge state regimes of forgetting at local state and international levels Democratization and Memories of Violence draws on six case studies in Mexico Turkey and El Salvador to show how memory based narratives serve as emotionally salient leverage for marginalized communities to facilitate state consideration of minority rights agendas This book will be of interest to postgraduates and researchers in comparative politics development studies sociology international studies peace and conflict studies and area studies
