Education And Social Control

Education And Social Control:

Social Control and Education Brian Davies, 2011-12-08 Social control is a central sociological concept which has generated many influential models of man in society This book examines these major models and examines the rise of compulsory schooling in Britain and the USA and shows us which aspects of education and social control have been elaborated or neglected in the sociology of education down to the mid 1970s *Social Control and Education* (RLE Edu L) Brian Davies, 2012-05-04 Social control is a central sociological concept which has generated many influential models of man in society This book examines these major models and examines the rise of compulsory schooling in Britain and the USA and shows us which aspects of education and social control have been elaborated or neglected in the sociology of education down to the mid 1970s **Education and Social Control** Rachel Sharp, Anthony Green, Jacqueline Lewis, 2017-04-28 First published in 1975 this book offers a critique of some of the new perspectives in the sociology of education This is achieved through a case study of a progressive child centred school The book suggests that a liberal approach to education fails to appreciate how thoroughly a complex stratified industrial society penetrates the school It argues that the practice of progressive education may be a modern form of conservatism and an effective form of social control both in the narrow sense of achieving classroom discipline and in the wider sense of contributing to the promotion of a static social order It cautions against naive utopian solutions which see the freedom and self development of the child as an individualized process unrelated to a social context which may undermine the ideals of freedom and spontaneous self development In addition to offering a study of the implementation of the open approach to child development and pedagogy the book can also be read as a piece of critical sociology intended to make the reader look again at the way in which problems have been generated and solutions proposed within sociology and education **Maladjusted Schooling** John F. Schostak, 2011-12-08 The problems this book discusses are the same now as they were 25 years ago unemployment poor housing inadequate facilities poverty racism violence What is the function of a school in such a situation Although many schools hold reformist ideals their practice is constrained by organisational demands School organisation is based upon a coercive theory of social control which is intolerant of expressions of individuality by teachers and pupils Needs for individuality may be mistaken for deviance and deviance is at least in part produced by or exacerbated by school organisation The author maintains that schooling is therefore largely maladjusted to the needs of individuals *Handbook of the Sociology of Education* Maureen T. Hallinan, 2006-11-24 The aim of the Handbook of Sociology of Education is to present the most theoretically grounded and empirically rigorous sociological analyses of schools to date The authors are distinguished researchers in the field Their contributions to the Handbook offer major theoretical perspectives on the schooling process and describe significant empirical studies of schools and their effects on individuals and society The research presented in the Handbook is built on three fundamental tenets of sociology First the authors adopt the perspective that schools are a central institution in society

An understanding of the function of schooling in social life is enhanced by viewing schools as interrelated with other societal institutions. The study of how the context of schooling influences education processes is critical to an understanding of school outcomes. Rather than being determined solely by ascribed and achieved characteristics, an individual's cognitive and social development are influenced heavily by the structures and networks in which the individual is embedded. Communities, families, schools, and social groups are critical elements in the educative process. By viewing the school as a societal institution and highlighting the interaction between context and individual behavior, the Handbook chapters provide a broader and deeper understanding of the determinants of learning in contemporary society. The second sociological insight that guides the research in the Handbook is that the school is a social system. Education for Social Control American Academy of Political and Social Science, 1935

Education and Social Control Rachel Sharp, Anthony Green, Jacqueline Lewis, 1975-01-01

Principles of Education Soti Shivandra Chandra, Rajendra Kumar Sharma, 2004

This is a comprehensive book covering I Principles Of Education, II Philosophy Of Education, Both Western And Indian, and III Sociology Of Education. It covers the syllabi of all the Indian universities for the paper Principles Of Education for B Ed and M Ed classes. The book has been presented in an analytical style. The conclusions on controversial subjects have been arrived at through a synthetic approach. Subject matter has been drawn from authentic books by Western and Indian authors. Language of treatment has been kept as simple as possible. Examples have been drawn from the Indian context. Thus, the authors have left no stone unturned to make this book an authentic textbook on the subject.

Understanding the Educational Experiences of Imprisoned Men Helen Nichols, 2021-02-28

Understanding the Educational Experiences of Imprisoned Men explores how adult male prisoners interpret and give value to their experiences of education, presenting an opportunity to consider how education can be beneficial to prisoners, including and beyond the enhancement of employability skills. While the primary aim for education in prison has been to increase employability skills to prevent reoffending, further attention needs to be given to the broader outcomes of educational experiences and the importance of the development of other personal attributes, including self-confidence, empowerment, and the ability to engage in positive relationships. This book considers how education is also used by men in prison to cope with prison life, to reconsider their identity, and to develop and maintain relationships. It also discusses the relationships that prisoners have with their teachers and other prison staff, as well as the relationships that different types of prison staff have between each other. In addition, the role that education can play in the process of desistance from crime is discussed to provide an understanding of what changes occur in men who participate in educational courses. This book will be of interest to not only students and scholars with an interest in imprisonment, rehabilitation, and criminal justice practice, but also educationalists, those who work in the prison setting, and in social work. It may also appeal to those involved in community development programmes and broader sociological research.
