Reproduction of Inequality and Social Exclusion Uddhab Pyakurel,2021-01-05 This book is a detailed account of how hierarchy has been maintained historically by the Nepali state affirming the uniqueness of a caste based social order by bringing outsiders especially ethnic groups and religious minorities into the caste fold Focusing on the contemporary state of Dalits the community that was and is put at the bottom of a very hierarchical social order in Nepal the author argues that the traditional caste based social order is still prevalent in the new Nepal even after the recent socio political and constitutional changes Illustrated by scientifically employed and interpreted data mainly in the three sectors of education politics and employment the book postulates that people who were and are born into the high caste still have more access to the resources and opportunities available in society in comparison with those born into the lower caste It further argues that although reservation policies are in place to address social exclusion these could not bring expected outcomes mainly due to the lack of engagement if not ignorance of both dominant groups and the community in the margin The absence of clarity among political actors on the positive discrimination and affirmative actions has contributed to backtracking the recently created space in line with inclusive Nepal

with making education more equitable including teachers school leaders parents carers and policymakers

Social Identity and Working Class Support for the Populist Radical Right Eric G. Castater, Kyung Joon Han, 2025-02-04 Why are blue collar workers increasingly supporting the populist radical right in Western Europe Previous explanations for this phenomenon suggest that it is the result of their economic and cultural grievances and their general discontent towards the political system Social Identity and Working Class Support for the Populist Radical Right argues that these explanations are unable to account for why the working class despite their deteriorating economic position in recent decades would prefer to vote for a party family that they agree with more on cultural issues the populist radical right than economic issues the populist radical or mainstream left To explain this puzzle the book develops a theory utilizing the literature on social identity It argues and empirically finds that political and economic conditions relatively unfavourable to the working class increase blue collar worker support for the populist radical right in Western Europe by strengthening these workers national identity and thus also the salience they place on cultural issues Castater and Han s analysis suggests that if governing parties desire to reduce support for the populist radical right they should incorporate labour organizations into the welfare state reform process enact economic policies that improve the well being of a broad swath of the working class and reduce the types of economic inequality that most affect blue collar workers
